Preface	ix
Acknowledgments	xi
1 Preliminaries	1
1.1 Introduction to Sequential Procedures	1
1.2 Sampling Inspection Plans	3
1.2.1 Sample Size Distribution	3
1.3 Stein's Two-stage Procedure	6
1.3.1 The Procedure	7
2 The Sequential Probability Ratio Test	11
2.1 The Sequential Probability Ratio Test (SPRT)	11
2.2 SPRT: It's Finite Termination and Bounds	13
2.3 The Operating Characteristic Function	19
2.4 The Average Sample Number	21
2.5 Wald's Fundamental Identity	29
2.5.1 Applications of the Fundamental Identity	30
2.6 Bounds for the Average Sample Number	33
2.7 Improvements to OC and ASN Functions	36
2.7.1 The OC Function	36
2.7.2 The Average Sample Number	38
2.8 Truncated SPRT	40
2.9 Optimal Properties of the SPRT	45
2.10 The Restricted SPRT	47
2.11 Large-Sample Properties of the SPRT	51
2.12 Problems	54
3 Tests for Composite Hypotheses	59
3.1 Method of Weight Functions	59
3.1.1 Applications of the Method of Weight Functions	60
3.2 Sequential t and t^2 Tests	61

- 3.2.1 Uniform Asymptotic Expansion and Inversion for an Integral 63
- 3.2.2 Barnard’s Versions of Sequential t - and t^2 -tests 65
- 3.2.3 Simulation Studies 65
- 3.2.4 Asymptotic Normality of the Statistic T 66
- 3.2.5 Finite Sure Termination of Sequential t - and t^2 -tests 69
- 3.2.6 Sequential t^2 -test (or t -test for Two-sided Alternatives) 71
- 3.2.7 The Sequential Test T 73
- 3.2.8 An Alternative Sequential Test T' 74
- 3.3 Sequential F-test 75
 - 3.3.1 Inversion Formula 77
- 3.4 Likelihood Ratio Test Procedures 79
 - 3.4.1 Generalized Likelihood Ratio Tests for Koopman-Darmois Families 86
- 3.5 Testing Three Hypotheses about Normal Mean 90
 - 3.5.1 Armitage-Sobel-Wald Test 90
 - 3.5.2 Choice of the Stopping Bounds 93
 - 3.5.3 Bounds for ASN 94
 - 3.5.4 Testing Two-sided Alternatives for Normal Mean 96
- 3.6 The Efficiency of the SPRT 99
 - 3.6.1 Efficiency of the SPRT Relative to the Fixed-Sample Size Procedure at the Hypotheses 99
 - 3.6.2 Relative Efficiency at $\theta \neq \theta_0, \theta_1$ 102
 - 3.6.3 Limiting Relative Efficiency of the SPRT 105
- 3.7 Bayes Sequential Procedures 106
 - 3.7.1 Bayes Sequential Binomial SPRT 106
 - 3.7.2 Dynamic Programming Method for the Binomial Case 111
 - 3.7.3 The Dynamic Programming Equation 112
 - 3.7.4 Bayes Sequential Procedures for the Normal Mean 114
- 3.8 Small Error Probability and Power One Test 117
- 3.9 Sequential Rank Test Procedures 123
 - 3.9.1 Kolmogorov-Smirnov Tests with Power One 123
 - 3.9.2 Sequential Sign Test 124
 - 3.9.3 Rank Order SPRT’s Based on Lehmann Alternatives: Two-Sample Case 127
 - 3.9.4 One-Sample Rank Order SPRT’s for Symmetry 130
- 3.10 Appendix: A Useful Lemma 138
- 3.11 Problems 139
- 4 Sequential Estimation 143**
 - 4.1 Basic Concepts 143
 - 4.2 Sufficiency and Completeness 144
 - 4.3 Cramér-Rao Lower Bound 152

4.4	Two-Stage Procedures	158
4.4.1	Stein's Procedure for Estimating the Mean of a Normal Distribution with Unknown Variance	158
4.4.2	A Procedure for Estimating the Difference of Two Means	162
4.4.3	Procedures for Estimating the Common Mean	164
4.4.4	Double-Sampling Estimation Procedures	167
4.4.5	Fixed Length Confidence Intervals Based on SPRT	173
4.5	Large-Sample Theory for Estimators	182
4.6	Determination of Fixed-width Intervals	191
4.7	Interval and Point Estimates for the Mean	196
4.7.1	Interval Estimation for the Mean	196
4.7.2	Risk-efficient Estimation of the Mean	201
4.8	Estimation of Regression Coefficients	203
4.8.1	Fixed-Size Confidence Bounds	203
4.9	Confidence Intervals for $P(X < Y)$	208
4.10	Nonparametric Confidence Intervals	210
4.10.1	Confidence Intervals for the p -point of a Distribution Function	210
4.10.2	Confidence Intervals for Other Population Parameters	210
4.10.3	Fixed-width Confidence Intervals for $P(X < Y)$	216
4.11	Problems	219
5	Applications to Biostatistics	227
5.1	The Robbins-Monro Procedure	227
5.2	Parametric Estimation	228
5.3	Up and Down Rule	230
5.4	Spearman-Karber (S-K) Estimator	231
5.5	Repeated Significance Tests	236
5.6	Test Statistics Useful in Survival Analysis	238
5.7	Sample Size Re-estimation Procedures	246
5.7.1	Normal Responses	246
5.7.2	Formulation of the Problem	247
5.7.3	Binary Response	254
5.8	Problems	262
6	Matlab Programs in Sequential Analysis	265
6.1	Introduction	265
6.2	Sequential Procedures	269
6.2.1	Sequential Probability Ratio Test (SPRT)	269
6.2.2	Restricted SPRT (Anderson's Test)	271
6.2.3	Rushton's Sequential t -test	273
6.2.4	Sequential t -test	275
6.2.5	Sequential t^2 -test	277

6.2.6	Hall's Sequential Test	279
6.2.7	Stein's Two-Stage Procedure (Confidence Interval)	281
6.2.8	Stein's Two-Stage Test	283
6.2.9	Robbins' Power One Test	285
6.2.10	Rank Order SPRT	287
6.2.11	Cox's Sequential Estimation Procedure	289
6.3	Distribution	290
