

Contents

Preface	v
Part I Review Chapters	
Chapter 1	
Quantitative Imaging Techniques and Their Application to Wavy Flows	1
<i>J. Kristian Sveen and Edwin A. Cowen</i>	
Chapter 2	
PIV Measurements in the Bottom Boundary Layer of the Coastal Ocean	51
<i>W. A. M. Nimmo Smith, T. R. Osborn and J. Katz</i>	
Chapter 3	
Water Wave Induced Boundary Layer Flows Above a Ripple Bed	81
<i>Philip L.-F. Liu, Khaled A. Al-Banaa and Edwin A. Cowen</i>	
Chapter 4	
Ship Velocity Fields	119
<i>Joe Longo, Lichuan Gui and Fred Stern</i>	
Chapter 5	
The Air–Water Interface: Turbulence and Scalar Exchange	181
<i>S. Banerjee and S. MacIntyre</i>	
Chapter 6	
Internal Wave Fields Analyzed by Imaging Velocimetry	239
<i>John Grue</i>	
Part II Extended Abstracts	
Chapter 7	
Wave Breaking, Surface Motion, Surf Zone, Air–Sea Interaction and Wind Waves	279

- 7.1. PIV Measurements of Accelerations in Water Waves 279
A. Jensen, M. Huseby, D. Clamond, G. Pedersen and J. Grue
- 7.2. PIV Measurements of the Velocity Field in Steep Water Wave Events 282
D. Clamond, J. Grue, M. Huseby and A. Jensen
- 7.3. LDA Laboratory Measurements in the Surf Zone for the RANS Depth-Averaged Shallow-Water Equations..... 285
T. Feng and P. Stansby
- 7.4. Wave Acceleration Measurements Using PTV Technique..... 288
Kuang-An Chang, Edwin A. Cowen and Philip L.-F. Liu
- 7.5. Two-Color LIF-PIV for Gas Exchange at Air-Water Interface 291
Nobuhito Mori
- 7.6. Run-Up of Solitary Waves 294
Geir Pedersen, Stefan Mayer and Atle Jensen
- 7.7. DPIV Measurements for Unsteady Deep-Water Wave Breaking on Following Currents 297
Chin H. Wu, Aifeng Yao and Kuang-An Chang

Chapter 8

- PIV Methods, Boundary Layer Flows and Turbulence 301
- 8.1. A Digital High Speed Camera System Applied to PIV Measurements in Water Waves 301
J. Kristian Sveen and Atle Jensen
- 8.2. Three-Dimensional Stereoscopic Particle Tracking Velocimetry for a Large Domain (3DSPTV-LD) and Its Application..... 304
Yasunori Watanabe
- 8.3. Enhanced PIV Technique to Investigate Bottom Boundary Layer Dynamics 307
Ahmed S. M. Ahmed and Shinji Sato
- 8.4. The Turbulent Boundary Layer Structure Beneath a Gravity Wave and Its Proper Decomposition 311
Edwin A. Cowen and Stephen G. Monismith

8.5. Intermittency in Surf Zone Turbulence and Observations of Large-Scale Eddies Using PIV	314
<i>D. T. Cox and S. L. Anderson</i>	
8.6. Turbulence Distributions and Flow Structure in the Coastal Ocean from PIV Data.....	317
<i>W. A. M. Nimmo Smith, L. Luznik, W. Zhu, J. Katz and T. R. Osborn</i>	
Chapter 9	
Breakwaters and Internal Waves.....	321
9.1. Blocking Effects in Supercritical Flows Over Topography	321
<i>V. I. Bukreev, A. V. Gusev and V. Yu. Liapidevskii</i>	
9.2. Study of the Flow Pattern in a Perforated Breakwater Using PIV Measurements	324
<i>Jean-Marc Rousset and Tom Bruce</i>	
9.3. Pseudo Image Velocimetry of a Regular Wave Flow Near a Submerged Breakwater.....	327
<i>Francisco Taveira-Pinto</i>	
9.4. Laboratory Modelling of the Motion of an Internal Solitary Wave Over a Ridge in a Stratified Fluid.....	330
<i>Y. Guo, P. A. Davies, J. Kristian Sveen, J. Grue and P. Dong</i>	
9.5. Measurements of Velocities During Run-Up of Long Internal Waves on a Gently Sloping Beach.....	334
<i>J. Kristian Sveen and John Grue</i>	
9.6. Comparison of Modelling of Strong Internal Wave Events with PIV Studies of the Phenomenon.....	337
<i>Deborah J. Wood, J. Kristian Sveen and John Grue</i>
