

Contents

Preface.....	vii
Chapter 1: Introduction	1
1.1 What is Inframarginal Economics?.....	1
1.2 Economic Analysis of Division of Labor – A Literature Review.....	3
1.3 Inframarginal Economics vs. Neoclassical Economics	14
1.4 Inframarginal Analysis of Division of Labor.....	20
1.5 Structure of this Book.....	23
PART I: BASIC MODELS IN INFRAMARGINAL ECONOMICS	31
Chapter 2: Consumer-producer’s Decisions to Choose the Optimum Level and Pattern of Specialization	31
2.1 The Smithian Framework and Transaction Costs	31
2.2 Configurations and Corner Solutions in the Smithian Framework	34
2.3 The Optimum Resource Allocation for a Given Level and Pattern of Specialization.....	42
2.4 The Optimum Level and Pattern of Specialization.....	48
2.4.1 Inframarginal analysis of demand and supply	48
2.4.2 Inframarginal and marginal comparative statics of the decisions	51
2.5 Neoclassical and Smithian Laws of Supply and Elasticity of Substitution.....	52
Chapter 3: Smithian General Equilibrium and Its Welfare Implications	59
3.1 Neoclassical vs. Smithian General Equilibrium	59

3.2	How Does the Market Coordinate the Division of Labor and Utilize Network Effects?	62
3.2.1	Structure, corner equilibrium, and resource allocation for a given structure of division of labor.....	63
3.2.2	General equilibrium level and structure of division of labor – how does the market coordinate division of labor to utilize network effects.....	68
3.3	Inframarginal Comparative Statics of Smithian General Equilibrium.....	72
3.3.1	Inframarginal vs. marginal comparative statics of Smithian general equilibrium.....	72
3.3.2	Comparative statics of decisions vs. comparative statics of equilibrium	77
3.3.3	The inappropriateness of marginal cost pricing and the difference between neoclassical and Smithian general equilibrium	79
3.4	Efficiency of the Invisible Hand	80
3.4.1	The first welfare theorem in the Smithian framework	80
3.4.2	Economic development and disparity between the pareto optimum and the PPF	82
3.4.3	Interdependence and conflict between efficient resource allocation and efficient organization.....	84

Chapter 4: More General Smithian Models **91**

4.1	Theoretical Foundation of Inframarginal Economics	91
4.2	A General Smithian Model with <i>ex ante</i> Different Consumer-producers.....	93
4.3	The Existence of a Competitive Equilibrium.....	96
4.4	Equilibrium Organism and Efficiency of the Invisible Hand in Coordinating Division of Labor.....	105

Chapter 5: Trade Pattern and Professional Middlemen **111**

5.1	Why Can the Professional Middleman Make Money? What Are the Determinants of Business Success?	111
5.2	A Model with Trading Activities and Heterogeneous Parameters.....	112
5.3	The Decision to Be a Professional Middleman.....	114
5.4	Market Structures and Corner Equilibria.....	117
5.4.1	Basic vs. nonbasic structures	117
5.4.2	Definitions of corner and general equilibria	119
5.5	The Equilibrium Size of the Network of Division of Labor	122
5.6	Emergence of Professional Middlemen and a Hierarchical Structure of Economic Organization	126

5.7	Determinants of Trade Pattern and Successful Business	127
-----	---	-----

PART II: THE INSTITUTION OF THE FIRM AND PRICING THROUGH BARGAINING AND CONTRACTING		135
--	--	-----

Chapter 6: The Labor Market and the Institution of the Firm **135**

6.1	What is the Institution of the Firm?	135
6.2	Is It Fair to Have an Asymmetric Relationship between Boss and Employees? – The Story behind the Model	138
6.3	Emergence of the Firm from the Division of Labor	142
6.3.1	Economies of roundabout production	142
6.3.2	The corner equilibria in four structures	144
6.3.3	General equilibrium structure of transactions and residual rights	151
6.4	The Distinction Between <i>ex ante</i> and <i>ex post</i> Production Function and the Smithian Analysis of Demand and Supply	156
6.5	Economies of Division of Labor, Economies of the Firm, and Coase Theorem	158
6.6	The Economies of Division of Labor and the Size of Firms	162

Chapter 7: Pricing Mechanism Based on Bargaining **171**

7.1	Bargaining Game, Strategic Behavior, Opportunistic Behavior	171
7.2	Nash Bargaining Game	173
7.3	Endogenous Transaction Costs caused by Information Asymmetry	180
7.4	Alternating Offer Bargaining Games	183
7.5	Dynamic Bargaining Game and the Division of Labor	186
7.6	How Does Competition for a Greater Share of Gains from the Division of Labor Generate Endogenous Transaction Costs?	189
7.7	How Can Endogenous Transaction Costs be Eliminated by Consideration of Reputation?	192
7.8	Information Asymmetry, Dynamic Bargaining, and the Division of Labor	194
7.9	Non-credible Commitment and Soft Budget Constraint	202

Chapter 8: Endogenous Transaction Costs and Theory of Contract, Ownership, and Residual Rights **205**

8.1	Endogenous Transaction Costs and Moral Hazard	205
8.2	Neoclassical Principal-Agent Models	208
8.3	A Smithian General Equilibrium Model of Principal-Agent	214

8.4	The Trade off Between Endogenous Transaction Costs caused by Moral Hazard and Monitoring Cost and Incomplete Labor Contract	222
-----	--	-----

PART III: INFRAMARGINAL ANALYSIS OF TRADE AND GLOBALIZATION 237

Chapter 9: Emergence of International Trade from Domestic Trade and Emergence of New Products 237

9.1	Endogenous Trade Theory and Endogenous Number of Consumer Goods.....	237
9.2	A Smithian Trade Model with Fixed Learning Costs	241
9.3	How are Demand and Supply Functions Determined by Individuals' Levels of Specialization?	242
9.4	Inframarginal Comparative Statics of the Optimum Decisions	248
9.5	How is the Level of Division of Labor in Society Determined in the Market?.....	249
9.6	Inframarginal Comparative Statics of General Equilibrium and Many Concurrent Economic Phenomena.....	253
9.7	Emergence of International Trade from Domestic Trade	261
9.8	Comovement of Division of Labor and Consumption Variety	263
9.9	Trade off Between Economies of Specialization and Coordination Costs	268
9.10	A Neoclassical Model Endogenizing the Number of Consumption Goods on the Basis of the Trade off Between Economies of Scale and Consumption Variety.....	269
9.11	An Extended Murphy-Shleifer-Vishny Model with Compatibility between Economies of Scale and Competitive Market.....	278

Chapter 10: Exogenous Comparative Advantages in Technology and Endowment, Division of Labor, and Trade 283

10.1	Endogenous vs. Exogenous Comparative Advantage.....	283
10.2	A Ricardian Model with Exogenous Comparative Technological Advantage and Transaction Costs.....	285
10.3	Analysis of Decisions vs. Analysis of Equilibrium	294
10.4	Economic Development and Trade Policy.....	303
10.5	Comparative Endowment Advantage and Trading efficiency	314

Chapter 11: Inframarginal Analysis of Coexistence of Endogenous and Exogenous Comparative Advantage 329

11.1	Implications of the Coexistence of Endogenous and Exogenous Comparative Advantage	329
------	---	-----

11.2 A Smithian Model with Dual Structure331
 11.3 Trade Pattern and Income Distribution.....336

PART IV: URBANIZATION, POPULATION, AND THE TRADE OFF BETWEEN WORKING AND LEISURE 351

Chapter 12: Urbanization, Dual Structure Between Urban and Rural Areas, and the Division of Labor 351

12.1 Why and How Cities Emerge from the Division of Labor?.....351
 12.2 Emergence of Cities and of the Dual Structure Between Urban and Rural Areas354
 12.3 Why Can Geographical Concentration of Transactions Improve Trading Efficiency?360
 12.4 Simultaneous Endogenization of Level of Division of Labor, Location Pattern of Residences, Geographical Pattern of Transactions, and Land Prices370
 12.5 A Neoclassical Model of Urbanization based on the Trade off Between Economies of Scale and Transaction Costs384

Chapter 13: The Trade off between Working and Leisure, and the Effects of Resource Scarcity and Population Size on the Division of Labor 391

13.1 Why Can Division of Labor Enlarge the Scope for the Efficient Trade off Between Working and Leisure?.....391
 13.2 Why Can Leisure Time and Per Capita Consumption of Each Good Increase as Division of Labor Develops?395
 13.3 Why Can a Crisis of Resource Shortage Promote Evolution in Division of Labor and Productivity?.....399
 13.4 Implications of High Population Density for Evolution in Division of Labor through Its Effect on the Per Capita Expenditure on Infrastructure.....404

Chapter 14: Economics of Property Rights and Insurance and Risk of Coordination Failure of the Network of Division of Labor 411

14.1 Uncertainties in Transactions and the Economics of Property Rights ...411
 14.2 Trade offs among Economies of Division of Labor, Coordination Reliability, and Benefits of Competition416
 14.3 Endogenization of Coordination Reliability in Each Transaction422
 14.3.1 The Yang-Wills model endogenizing risk of coordination failure for each transaction423
 14.3.2 The efficient extent of externalities425

14.3.3	Perfect competition is inefficient.....	426
14.3.4	Risk of mass unemployment.....	428
14.3.6	Economics of property rights and the soft budget constraint....	430
14.4	Substitution between Precise Enforcement of Property Rights and Competition	435
14.5	Uncertainty and Risk Aversion.....	443
14.6	A Model with Insurance and Endogenous Specialization in the Absence of Moral Hazard.....	445
14.7	The Division of Labor and Endogenous Transaction Costs caused by Complete Insurance	451
PART V: HIERARCHICAL STRUCTURE OF DIVISION OF LABOR		465
Chapter 15: The Division of Labor in Roundabout Production and Emergence of New Machines and Related New Technology		465
15.1	Smithian vs. Neoclassical Views on the Emergence of New Producer Goods and Related New Technology	465
15.2	A Model with Endogenous Technical Progress, Endogenous Number of Producer Goods, and Endogenous Specialization	468
15.3	The Efficient Number of Producer Goods and Level of Specialization.....	470
15.4	The Corner Equilibria in 9 Structures.....	473
15.5	Concurrent Changes in the Level of Division of Labor, Productivity, and Input Diversity.....	478
15.6	<i>Ex post</i> Production Function, Emergence of New Machines, and Endogenous Technical Progress	480
15.7	Changes in Economic Structure and Topological Properties of Economic Organism	482
15.8	Evolution in the Number of Producer Goods and Economic Development.....	484
Chapter 16: Industrialization and the Division of Labor in Roundabout Production		495
16.1	The Features of Industrialization	495
16.2	A General Equilibrium Model Endogenizing Production Roundaboutness.....	501
16.3	Corner Equilibria and Emergence of New Industry.....	503
16.4	General Equilibrium and Industrialization.....	508
16.5	Changes in the Income Shares of the Industrial and Agricultural Sectors	512

16.6 The Number of Possible Structures of Transactions Increases More Than Proportionally as Division of Labor Evolves in Roundabout Production.....515

Chapter 17: Hierarchical Structure of the Network of Division of Labor and Related Transactions 527

17.1 The Theory of Hierarchy527
 17.2 One Way Centralized Hierarchy.....531
 17.3 A Decentralized Hierarchy of Transactions and the Division of Labor.....535
 17.4 Configurations and Market Structures541
 17.5 The General Equilibrium and Its Inframarginal Comparative Statics....550
 17.6 Network Hierarchy of Cities and Division of Labor.....553
 17.6.1 Consumer-producers, cities, and layers of a hierarchy of cities554
 17.6.2 Two types of transaction costs.....556
 17.6.3 The optimal number of layers in a hierarchical structure560

PART VI: INFRAMARGINAL ANALYSIS OF ECONOMIC DEVELOPMENT AND GROWTH 565

Chapter 18: Economic Growth Generated by Endogenous Evolution in Division of Labor 565

18.1 Economies of Specialized Learning by Doing and Endogenous Evolution in Division of Labor565
 18.2 A Smithian Dynamic Model with Learning by Doing.....570
 18.3 Optimum Speed of Learning by Doing and Evolution of Endogenous Comparative Advantage.....572
 18.3.1 The function of contracts572
 18.3.2 An individual’s dynamic decision problem574
 18.3.3 Dynamic equilibrium576
 18.4 Endogenous Evolution of the Extent of the Market, Trade Dependence, Endogenous Comparative Advantages, and Economic Structure.....590
 18.5 Empirical Evidences and Rethinking Development Economics and Endogenous Growth Theory.....592
 Appendix 18.1: The Relationship between the Control Theory and Calculus of Variations602

**Chapter 19: Concurrent Endogenous Evolution in Division of Labor,
in the Number of Goods, and in the Institution of the Firm** **605**

19.1	How Can We Simultaneously Endogenize Evolution in Division of Labor and in the Number of Producer Goods?	605
19.2	A Dynamic Equilibrium Model with Learning by Doing and an Endogenous Number of Producer Goods.....	607
19.3	Dynamic Equilibrium Level of Specialization and Input Variety.....	610
19.4	Concurrent Evolution of Specialization, Variety of Producer Goods, and the Institution of the Firm	620
	Appendix 19.1: Proof of Lemma 19.1	626
	Appendix 19.2: Proof of Proposition 19.1.....	628
	Appendix 19.3: Proof of Proposition 19.2.....	631

**Chapter 20: Experiments with Structures of Division of Labor and
Evolution in Organization Information Acquired by Society** **635**

20.1	How Does Organization Knowledge Acquired by Society Determine Economic Development?	635
20.2	A Static Model with Endogenous Length of Roundabout Production Chain and Endogenous Division of Labor	643
20.3	Interactions Between Dynamic Decisions and Evolution in Organization Information	645
20.4	Walrasian Sequential Equilibrium and Concurrent Evolution in Organization Information and Division of Labor.	651

**PART VII: MACROECONOMIC PHENOMENA AND ENDOGENOUS SIZE OF
NETWORK OF DIVISION OF LABOR** **673**

Chapter 21: Theory of Investment and Saving **673**

21.1	Neoclassical Theory of Investment and Saving	673
21.2	Neoclassical Models of Self-Saving and Interpersonal Loans.....	679
21.3	Smithian Theory of Investment and Savings	685
	21.3.1 Configuration sequence and structure sequence.....	687
	21.3.2 Dynamic corner equilibria in 16 structure sequences.....	690
21.4	Investment, Capital, and Division of Labor in Roundabout Production.....	694
	21.4.1 Dynamic general equilibrium	695
	21.4.2 Non-topological properties of economic growth and sudden decline of interest rates.....	701
	21.4.3 Endogenous decision horizon and effect of liberalization reforms on opportunities for lucrative investment.....	704

Chapter 22: Money and Division of Labor 709

22.1	Neoclassical vs. Smithian Theories of Money	709
22.2	A Smithian Model of Endogenous Monetary Regime	714
22.3	Possible Structures and Monetary Regimes.....	716

Chapter 23: Smithian Theory of Business Cycles and Unemployment 731

23.1	Rethinking Macroeconomics	731
23.2	Long-run Regular Efficient Business Cycles, Cyclical Unemployment, Long-run Economic Growth, and Division of Labor in Producing Durable Goods	741
23.3	A Smithian Dynamic Equilibrium Model of Business Cycles and Unemployment	747
23.4	Cyclical vs. Non-cyclical Corner Equilibria	750
23.4.1	Regime specification, configurations and market structures ...	750
23.4.2	The dynamic corner equilibrium in autarky.....	751
23.4.3	Market structure C	753
23.4.4	Market structure P	756
23.4.5	Welfare and policy implications of the model	760
23.5	General Price Level, Business Cycles, and Unemployment Rate	761
23.6	Emergence of Firms and Fiat Money from the Division of Labor.....	765
23.7	Mass Unemployment and the Stability of the Network of Division of Labor.....	769

Chapter 24: Effects of Monetary and Fiscal Policies on the Network Size of Division of Labor 779

24.1	The Role of Infrastructure Expenditure, Monetary and Fiscal Policies on the Evolution of Division of Labor	779
24.2	Infrastructure Expenditure and the Evolution of Division of Labor	784
24.3	Macroeconomic Policies and the Evolution of Division of Labor.....	795
24.3.1	Income-tax financing	798
24.3.2	Money financing (seigniorage).....	800
24.3.3	Income-tax financing versus money financing	802

PART VIII: POLITICAL ECONOMICS, THE ECONOMICS OF THE STATE, NEW ECONOMY, AND ENDOGENOUS NETWORK SIZE OF DIVISION OF LABOR	805
Chapter 25: Inframarginal Analysis of Political Economy	805
25.1 Inframarginal Analysis, Endogenous Transaction Cost caused by Externality, New Institutional Economics, and Smithian Models of Political Economies	805
25.2 Inframarginal Analysis of the Evolution of the State.....	810
25.3 Inframarginal Analysis of Effects of Political Monopoly on the Extent of the Market	816
Chapter 26: Inframarginal Analysis of e-Business and Franchising	827
26.1 Impersonal Networking Decisions, Franchising Networks and e-Business.....	827
26.2 A Smithian Model of Product Bundling	830
26.3 A Smithian Model of Franchising Networks	841
Bibliography.....	851
Index	891
