

Contents

Preface	vii
Chapter 1	
Preliminaries	1
0. Conventional Review	1
1. Noetherian Rings	6
2. Factorization of Elements in a Domain	9
3. Field Extensions	18
4. Symmetric Polynomials	28
5. Trace and Norm	33
6. Free Abelian Groups of Finite Rank	40
7. Noetherian Modules	45
Chapter 2	
Local Rings, DVRs, and Localization	53
1. $\text{Spec}R$, $m\text{-Spec}R$, and Radicals	53
2. Local Rings and DVRs	58
3. The Ring of Fractions and Localization	67
4. The Module of Fractions	73
Chapter 3	
Integral Extensions and Normalization	79
1. Integral Extensions	79
2. Noether Normalization	85
3. Normal Domains and Normalization	90
4. Normal Domains and DVRs	94

Chapter 4

The Ring \mathcal{A}_K in $K = \mathbb{Q}(\vartheta)$	99
1. \mathcal{A}_K is Normal and Free of \mathbb{Z} -Rank $[K : \mathbb{Q}]$	102
2. $\mathbb{Q}(\sqrt{d})$ and $\mathbb{Q}(\omega)$	108
3. Factorization of Elements in \mathcal{A}_K	112
4. From \mathcal{A}_K to Dedekind Domains	117

Chapter 5

Algebraic Geometry	127
1. Finite Field Extension and Nullstellensatz	127
2. Irreducible V and the Prime $\mathbf{I}(V)$	134
3. Point P and the Local Ring $\mathcal{O}_{P,V}$	146
4. Nonsingular Points and DVRs	151
5. Normalization of Algebraic Curves	157
6. Parametrize a Rational Curve via Normalization	162
7. Rational Curves and Diophantine Equations	167
