

# Contents

Preface	v
<b>Chapter 1 Introduction</b>	<b>3</b>
1.1 Basic Concepts . . . . .	3
1.2 Images and Compositions . . . . .	8
1.3 Basic Problems in Fuzzy Relational Calculus . . . . .	12
1.4 Aspects in Artificial Intelligence . . . . .	14
1.5 Fuzzy Finite Machines and Fuzzy Algebras . . . . .	17
1.6 Fuzzy Grammars in Syntactic Pattern Recognition . . . . .	19
1.7 Bibliographical Notes . . . . .	22
<b>Chapter 2 Fuzzy Relations. Direct Problem Resolution</b>	<b>25</b>
2.1 Basic Notions . . . . .	25
2.2 Fuzzy Relations – Compositions and Properties . . . . .	31
2.3 Fuzzy Relations and Membership Matrices . . . . .	41
2.4 Bibliographical Notes . . . . .	47
<b>Chapter 3 Fuzzy Relational Equations</b>	<b>49</b>
3.1 Inverse Problem Formulation . . . . .	50
3.2 Fuzzy Linear Equations . . . . .	51
3.3 Fuzzy Linear Systems of Equations . . . . .	59
3.3.1 Basic Notions . . . . .	60
3.3.2 Simplifications . . . . .	61
3.3.3 Lower Solutions . . . . .	75
3.3.4 Universal algorithm . . . . .	82
3.4 Solving Fuzzy Relational Equations . . . . .	88
3.5 Bibliographical Notes . . . . .	91
<b>Chapter 4 Fuzzy Relational Inclusions</b>	<b>95</b>
4.1 Preliminaries . . . . .	95

4.2	Fuzzy Linear Systems of Inequalities . . . . .	98
4.3	Fuzzy Relational Inclusions . . . . .	108
4.4	Applications in Fuzzy Linear Programming . . . . .	109
4.5	Bibliographical Notes . . . . .	112
<b>Chapter 5 Fuzzy Linear Systems – Dual Approach</b>		<b>113</b>
5.1	Basic Concepts . . . . .	113
5.2	Solving Fuzzy Linear Systems . . . . .	117
5.3	Fuzzy Relational Equations . . . . .	126
5.4	Dual Approach to Inverse Problem Resolution . . . . .	128
5.5	Bibliographical Notes . . . . .	130
<b>Chapter 6 Direct and Inverse Problems in Intuitionistic Fuzzy Relational Calculus</b>		<b>131</b>
6.1	Intuitionistic Fuzzy Relations. Compositions . . . . .	131
6.2	Intuitionistic Fuzzy Matrices. Direct and Inverse Problems . . . . .	137
6.3	Intuitionistic Fuzzy Relational Equations . . . . .	139
6.4	Bibliographical Notes . . . . .	140
<b>Chapter 7 <math>\mathbb{L}</math>-Fuzzy Finite Machines</b>		<b>143</b>
7.1	$\mathbb{L}$ -Fuzzy Finite Machines. Behavior . . . . .	143
7.2	Equivalences . . . . .	158
7.3	Reduction and Minimization . . . . .	162
7.4	Intuitionistic Fuzzy Finite Machines . . . . .	163
7.5	Bibliographical Notes . . . . .	167
<b>Chapter 8 Fuzzy Languages in Syntactic Pattern Recognition</b>		<b>169</b>
8.1	Finite $\mathbb{L}$ -Fuzzy Acceptors and Regular $\mathbb{L}$ -Fuzzy Languages . . . . .	170
8.2	Intuitionistic Fuzzy Languages in Syntactic Pattern Recognition . . . . .	177
8.3	Bibliographical Notes . . . . .	183
<b>Chapter 9 Applications as Inference Engine</b>		<b>185</b>
9.1	Architecture of System with Artificial Intelligence . . . . .	185
9.2	Fuzzy Linear System of Equations as Inference Engine . . . . .	187
9.3	Intuitionistic Fuzzy Linear System as Inference Engine . . . . .	196
9.4	Bibliographical Notes . . . . .	198
<b>Chapter 10 Software Description</b>		<b>201</b>
10.1	Unary Matrix Operations . . . . .	201
10.2	Binary Matrix Operations . . . . .	203
10.3	Compositions . . . . .	204
10.4	Inverse Problem . . . . .	208
10.4.1	Max–Min Composition . . . . .	208
10.4.2	Min–Max Composition . . . . .	234

10.5 Intuitionistic Fuzzy Relational Calculus . . . . .	235
10.6 Engineering Examples . . . . .	237
<b>Appendix A Solved Samples</b>	<b>247</b>
<b>Appendix B List of Symbols</b>	<b>257</b>
<b>Appendix C List of Abbreviations</b>	<b>259</b>
Bibliography	261
Index	287
