

Contents

1	Nonlinear and Chaotic Maps	1
1.1	One-Dimensional Maps	1
1.1.1	Exact and Numerical Trajectories	3
1.1.2	Fixed Points and Stability	15
1.1.3	Invariant Density	17
1.1.4	Liapunov Exponent	22
1.1.5	Autocorrelation Function	26
1.1.6	Discrete Fourier Transform	28
1.1.7	Fast Fourier Transform	30
1.1.8	Logistic Map and Liapunov Exponent for $r \in [3, 4]$	36
1.1.9	Logistic Map and Bifurcation Diagram	38
1.1.10	Random Number Map and Invariant Density	39
1.1.11	Random Number Map and Random Integration	42
1.1.12	Circle Map and Rotation Number	44
1.1.13	Newton-Raphson Method	45
1.1.14	Feigenbaum's Constant	47
1.1.15	Symbolic Dynamics	49
1.1.16	Chaotic Repeller	52
1.2	Two-Dimensional Maps	53
1.2.1	Introduction	53
1.2.2	Phase Portrait	54
1.2.3	Fixed Points and Stability	63
1.2.4	Liapunov Exponents	64
1.2.5	Correlation Integral	66
1.2.6	Capacity	67
1.2.7	Hyperchaos	70
1.2.8	Domain of Attraction	74
1.2.9	Newton Method in the Complex Domain	75
1.2.10	Newton Method in Higher Dimensions	77
1.2.11	Ruelle-Takens-Newhouse Scenario	79
1.2.12	JPEG file	81
2	Time Series Analysis	83
2.1	Introduction	83
2.2	Correlation Coefficient	84

2.3	Liapunov Exponent from Time Series	85
2.3.1	Jacobian Matrix Estimation Algorithm	86
2.3.2	Direct Method	88
2.4	Hurst Exponent	95
2.4.1	Introduction	95
2.4.2	Implementation for the Hurst Exponent	98
2.4.3	Random Walk	102
2.5	Complexity	107
3	Autonomous Systems in the Plane	111
3.1	Classification of Fixed Points	111
3.2	Homoclinic Orbit	113
3.3	Pendulum	114
3.4	Limit Cycle Systems	116
3.5	Lotka-Volterra Systems	120
4	Nonlinear Hamilton Systems	124
4.1	Hamilton Equations of Motion	124
4.1.1	Hamilton System and Variational Equation	126
4.2	Integrable Hamilton Systems	128
4.2.1	Hamilton Systems and First Integrals	128
4.2.2	Lax Pair and Hamilton Systems	129
4.2.3	Floquet Theory	132
4.3	Chaotic Hamilton Systems	135
4.3.1	Hénon-Heiles Hamilton Function and Trajectories	135
4.3.2	Hénon Heiles and Surface of Section Method	137
4.3.3	Quartic Potential and Surface of Section Technique	139
5	Nonlinear Dissipative Systems	142
5.1	Fixed Points and Stability	142
5.2	Trajectories	147
5.3	Phase Portrait	151
5.4	Liapunov Exponents	154
5.5	Generalized Lotka-Volterra Model	157
5.6	Hyperchaotic Systems	160
5.7	Hopf Bifurcation	163
5.8	Time-Dependent First Integrals	166
6	Nonlinear Driven Systems	168
6.1	Introduction	168
6.2	Driven Anharmonic Systems	171
6.2.1	Phase Portrait	171
6.2.2	Poincaré Section	172
6.2.3	Liapunov Exponent	174
6.2.4	Autocorrelation Function	176

6.2.5	Power Spectral Density	180
6.3	Driven Pendulum	180
6.3.1	Phase Portrait	180
6.3.2	Poincaré Section	183
6.4	Parametrically Driven Pendulum	185
6.4.1	Phase Portrait	185
6.4.2	Poincaré Section	187
6.5	Driven Van der Pol Equation	188
6.5.1	Phase Portrait	188
6.5.2	Liapunov Exponent	191
6.6	Parametrically and Externally Driven Pendulum	193
7	Controlling and Synchronization of Chaos	197
7.1	Introduction	197
7.2	Ott-Yorke-Grebogi Method	198
7.2.1	One-Dimensional Maps	198
7.2.2	Systems of Difference Equations	202
7.3	Small Periodic Perturbation	206
7.4	Resonant Perturbation and Control	209
7.5	Synchronization of Chaos	209
7.5.1	Synchronization Using Control	209
7.5.2	Synchronizing Subsystems	212
7.6	Phase Coupled Systems	216
8	Fractals	222
8.1	Introduction	222
8.2	Iterated Function System	224
8.2.1	Introduction	224
8.2.2	Cantor Set	225
8.2.3	Heighway's Dragon	228
8.2.4	Sierpinski Gasket	231
8.2.5	Koch Curve	232
8.2.6	Fern	235
8.3	Mandelbrot Set	237
8.4	Julia Set	240
8.5	Weierstrass Function	242
9	Cellular Automata	244
9.1	Introduction	244
9.2	One-Dimensional Cellular Automata	246
9.3	Two-Dimensional Cellular Automata	248
9.4	Button Game	253

10 Solving Differential Equations	257
10.1 Introduction	257
10.2 Euler Method	258
10.3 Lie Series Technique	259
10.4 Runge-Kutta-Fehlberg Technique	263
10.5 Ghost Solutions	264
10.6 Symplectic Integration	268
10.7 Verlet Method	273
10.8 Störmer Method	275
10.9 Invisible Chaos	276
10.10 First Integrals and Numerical Integration	277
11 Neural Networks	279
11.1 Introduction	279
11.2 Hopfield Model	283
11.2.1 Introduction	283
11.2.2 Synchronous Operations	285
11.2.3 Energy Function	288
11.2.4 Basins and Radii of Attraction	289
11.2.5 Spurious Attractors	290
11.2.6 Hebb's Law	290
11.2.7 Example	292
11.2.8 Program	294
11.2.9 Asynchronous Operation	299
11.2.10 Translation Invariant Pattern Recognition	300
11.3 Similarity Metrics	301
11.4 Kohonen Network	306
11.4.1 Introduction	306
11.4.2 Algorithm	307
11.4.3 Example	309
11.4.4 Traveling Salesman Problem	315
11.5 Perceptron	319
11.5.1 Introduction	319
11.5.2 Boolean Functions	322
11.5.3 Linearly Separable Sets	323
11.5.4 Perceptron Learning	324
11.5.5 One and Two Layered Networks	328
11.5.6 Perceptron Learning Algorithm	329
11.5.7 The XOR Problem and Two-Layered Networks	332
11.6 Multilayer Perceptrons	337
11.6.1 Introduction	337
11.6.2 Cybenko's Theorem	338
11.6.3 Back-Propagation Algorithm	339
11.7 Chaotic Neural Networks	348

- 12 Genetic Algorithms** **350**
- 12.1 Introduction 350
- 12.2 The Sequential Genetic Algorithm 351
- 12.3 Schemata Theorem 355
- 12.4 Bitwise Operations 357
- 12.5 A Bit Vector Class 364
- 12.6 Maximum of One-Dimensional Maps 367
- 12.7 Maximum of Two-Dimensional Maps 375
- 12.8 Finding a Fitness Function 384
- 12.9 Problems with Constraints 389
 - 12.9.1 Introduction 389
 - 12.9.2 Knapsack Problem 391
 - 12.9.3 Traveling Salesman Problem 397
- 12.10 Simulated Annealing 406
- 12.11 Parallel Genetic Algorithms 409

- 13 Gene Expression Programming** **423**
- 13.1 Introduction 423
- 13.2 Example 426

- 14 Optimization** **435**
- 14.1 Lagrange Multiplier Method 435
- 14.2 Karush-Kuhn-Tucker Conditions 440
- 14.3 Support Vector Machine 444
 - 14.3.1 Introduction 444
 - 14.3.2 Linear Decision Boundaries 444
 - 14.3.3 Nonlinear Decision Boundaries 448

- 15 Discrete Wavelets** **453**
- 15.1 Introduction 453
- 15.2 Multiresolution Analysis 455
- 15.3 Pyramid Algorithm 457
- 15.4 Biorthogonal Wavelets 463
- 15.5 Two-Dimensional Wavelets 469

- 16 Discrete Hidden Markov Processes** **472**
- 16.1 Introduction 472
- 16.2 Markov Chains 474
- 16.3 Discrete Hidden Markov Processes 478
- 16.4 Forward-Backward Algorithm 482
- 16.5 Viterbi Algorithm 485
- 16.6 Baum-Welch Algorithm 486
- 16.7 Distances between HMMs 487
- 16.8 Application of HMMs 488

17 Fuzzy Sets and Fuzzy Logic	502
17.1 Introduction	502
17.2 Operators for Fuzzy Sets	510
17.2.1 Logical Operators	510
17.2.2 Algebraic Operators	513
17.2.3 Defuzzification Operators	515
17.2.4 Fuzzy Concepts as Fuzzy Sets	516
17.2.5 Hedging	518
17.2.6 Quantifying Fuzzyness	519
17.2.7 C++ Implementation of Discrete Fuzzy Sets	520
17.2.8 Applications: Simple Decision-Making Problems	540
17.3 Fuzzy Numbers and Fuzzy Arithmetic	547
17.3.1 Introduction	547
17.3.2 Algebraic Operations	548
17.3.3 LR-Representations	552
17.3.4 Algebraic Operations on Fuzzy Numbers	554
17.3.5 C++ Implementation of Fuzzy Numbers	556
17.3.6 Applications	562
17.4 Fuzzy Rule-Based Systems	563
17.4.1 Introduction	563
17.4.2 Fuzzy If-Then Rules	567
17.4.3 Inverted Pendulum Control System	568
17.4.4 Application	570
17.5 Fuzzy C-Means Clustering	572
17.6 Fuzzy Truth Values and Probabilities	576
Bibliography	577
Index	585
