Preface	v
Preface of Old Edition	vii
1. Introduction	1
1.1 Three Examples of Japanese Experience of Coastal Environment Change Due to Construction Works	3
1.1.1 Ookoze channel for flood control of the Shinano River	3
1.1.2 Reclamation work in Tokyo Bay	5
1.1.3 Coastal protection works in Suruga Bay	8
1.2 General View of River Sediment Supply to Coastal Area over the World	9
2. Review of Fundamental Fluid Mechanics	13
2.1 Brief History of Fluid Mechanic	13
2.2 Brief Review of Vector Analysis	14
2.2.1 Introduction of vector and scalar operators	14
2.2.2 The physical meaning of rotation	15
2.3 Conservation Laws of Fluid Mechanics	17
2.3.1 Mass conservation	17
2.3.2 Momentum conservation	19
2.3.3 Energy conservation	23
2.4 Irrotational Flow of Inviscid Fluid	24
2.4.1 Velocity potential	24
2.4.2 Stream function	25
2.4.3 Complex potential	26

3.	Basic Equations for Wave Motion (Linear Wave Theory)	31
3.1	Basic Equations	31
3.2	Linear Wave Theory	35
4.	Wave Induced Physical Phenomena	43
4.1	Mass Transport Velocity	43
4.2	The Bottom Boundary Layer	46
4.2.1	Formulation	46
4.2.2	Solution of the linearized boundary layer equation	48
4.2.3	The bottom shear stress	50
5.	Wave Transformation	53
5.1	Wave Shoaling	53
5.2	Wave Breaking	55
5.3	Wave Reflection and Transmission	58
5.4	Wave Refraction	58
5.5	Wave Diffraction	62
5.6	Mild Slope Equation	64
5.7	Wave Field Calculation by Boussinesq Equations	66
5.8	Examination of Breaker Height Formula	69
5.8.1	Introduction	69
5.8.2	Existing breaker height formulas	69
5.9	Energy Dissipation of Breaking Waves	73
5.9.1	Energy dissipation for regular waves	73
5.9.2	Energy dissipation for irregular waves	75
6.	Surfzone Dynamics	83
6.1	General View of Surfzone Dynamics	83
6.2	Numerical Model of Surfzone Velocity Field	86
6.2.1	Hydrodynamic model	86
6.2.2	Numerical formulation	88
6.3	A Three-Dimensional Large Eddy Simulation	91
6.3.1	Methodology	91
6.3.2	Numerical results	94

7.	Wind Waves	99
7.1	Wind Generated Waves	99
7.1.1	Individual wave statistics	100
7.1.2	Energy spectrum	101
7.2	Wave Forecasting	104
8.	Wave Induced Currents	109
8.1	Currents in Nearshore Field	109
8.2	Radiation Stress	110
8.2.1	The concept of radiation stress	110
8.2.2	Wave set-up and set-down	111
8.3	Nearshore Current System	114
8.3.1	Longshore current velocity distribution	114
8.3.2	Nearshore circulation	116
8.4	Undertow Profile	120
8.4.1	Governing equations	120
8.4.2	Vertical distribution of shear stress and eddy viscosity coefficient	120
8.4.3	Mean velocity	121
8.4.4	Comparison with experiments	122
9.	Wave Forces on Structures	125
9.1	Breakwater	125
9.2	Forces on Cylinder	127
9.3	Breaking Wave Pressure	128
9.4	Breaking Impact Pressure on Vertical Breakwater	133
9.5	Caisson Displacement	137
10.	Coastal Sediment Transport	143
10.1	Sand Transport	143
10.1.1	General description	143
10.1.2	Cross-shore transport formula	147
10.1.3	Longshore transport formula	150
10.1.4	Initiation of sand transport	151
10.1.5	Suspended sediment concentration in and outside the surf zone	152

10.2	Modelling of Time-Dependent Sand Transport at the Bottom Boundary Layer	157
10.2.1	The turbulent convection-diffusion equation for the sand concentration field	157
10.2.2	Formulation of boundary conditions	159
10.2.3	Sand concentration within the bottom boundary layer-comparison with laboratory data	161
10.3	Mud Transport	164
10.3.1	Mud behavior in coastal area	164
10.3.2	Cross-shore mud transport and beach deformation	167
11.	Beach Erosion and Beach Accretion	177
11.1	Cases in Developing Countries	177
11.1.1	General trend – Japan model	177
11.1.2	The case of Thailand	179
11.1.3	The case of Vietnam	179
11.1.4	Discussions	182
11.2	Sediment Production in River Basin and River Sediment Transport to Coasts	183
11.2.1	Introduction	184
11.2.2	Methodology	184
11.2.3	River profile change model	187
11.2.4	Sediment transport	190
11.2.5	Sediment evaluation	192
12.	Natural Disasters in Coastal Environment	197
12.1	Storm Surge	198
12.1.1	Basic mechanism	198
12.1.2	Numerical simulation	199
12.2	Tsunami	200
12.3	Case Study, Indian Ocean Tsunami (2004)	202
12.3.1	Surveys in Sri Lanka	202
12.3.2	Surveys in Indonesia	205
12.3.3	Tsunami disaster prevention	205
	Subject Index	207
	Author Index	213
