

CONTENTS

<i>Preface</i>	v
1 Nonstandard Finite Difference Methods	1
<i>R. E. Mickens</i>	
1 General Comments	1
2 NSFD Methods: Basic Principles	2
3 Dynamic Consistency	4
4 Some Outstanding Problems	6
References	7
2 Application of Nonstandard Finite Difference Schemes to the Simulation Studies of Robotic Systems	11
<i>R. F. Abo-Shanab, N. Sepehri and C. Q. Wu</i>	
1 Introduction	12
2 Dynamic Model of the Robotic Systems	13
3 Constructing the Discrete Derivatives	15
4 Simulation Studies	18
5 Conclusions	44
References	45
3 Applications of Mickens Finite Differences to Several Related Boundary Value Problems	47
<i>R. Buckmire</i>	
1 Introduction	47
2 The Buckmire MFD Scheme	48
3 MFD Application to Two Singular Linear Boundary Value Problems	53

4	MFD Application to the Cylindrical Bratu-Gel'fand Problem	60
5	MFD Application to the One-Dimensional Bratu Problem	66
6	Conclusion	84
	References	85
4	High Accuracy Nonstandard Finite-Difference Time-Domain Algorithms for Computational Electromagnetics: Applications to Optics and Photonics	89
	<i>J. B. Cole</i>	
1	Introduction	89
2	Basic Concepts	91
3	High Accuracy FDTD Algorithm for the Absorbing Wave Equation	100
4	Nonstandard FDTD Solution of the Conducting Maxwell Equations	103
5	Nonstandard Finite Difference Version of the Mur Absorbing Boundary	112
6	Discretization and Numerical Stability	127
7	Numerical Models	143
8	Light Propagation in Subwavelength Structures	150
9	FDTD Algorithms for Electromagnetic Fields with Surface Plasmons	163
10	Summary	181
	References	187
5	Nonstandard Finite Difference Schemes for Solving Nonlinear Micro Heat Transport Equations in Double-Layered Metal Thin Films Exposed to Ultrashort Pulsed Lasers	191
	<i>W. Dai</i>	
1	Introduction	191
2	Governing Equations and an Energy Estimate	195
3	Nonstandard Finite Difference Scheme	198
4	Nonlinear Interfacial Problem	216
5	Conclusion	225
	References	246

6	Reliable Finite Difference Schemes with Applications in Mathematical Ecology	249
	<i>D. T. Dimitrov, H. V. Kojouharov and B. M. Chen-Charpentier</i>	
1	Introduction	250
2	Definitions and Preliminaries	251
3	Numerical Methods for Single-Species Population Models	253
4	Numerical Methods for Multi-Species Population Models	261
5	Numerical Examples	272
6	Conclusions	282
	References	284
7	Applications of the Non-Standard Finite Difference Method in Non-Smooth Mechanics	287
	<i>Y. Dumont</i>	
1	Introduction	287
2	A Short Introduction to the Theory of Differential Inclusion	289
3	Numerical Methods for Differential Inclusions	297
4	Frictional Oscillators	303
5	Vibro-Impact Oscillators	311
6	Conclusions	334
	References	337
8	Finite Difference Schemes on Unbounded Domains	343
	<i>M. Ehrhardt</i>	
1	Introduction	343
2	Fields of Applications	345
3	The Finite Difference Equations	351
4	Discrete TBCs via Exact Solutions	358
5	Discrete ABCs through Asymptotic Solutions	362
6	The Continued Fraction Approach	368
7	The Approximation by the Sum of Exponentials	370
8	Numerical Example	373
9	Future Directions	378
	Appendix A. The Z -Transformation	379
	References	382

9 Asymptotically Consistent Non-Standard Finite-Difference Methods for Solving Mathematical Models Arising in Population Biology	385
<i>A. B. Gumel, K. C. Patidar and R. J. Spiteri</i>	
1 Introduction	386
2 SIS Model	387
3 Transmission Dynamics of Two HIV Subtypes	396
4 A Predator-Prey Model	402
5 Concluding Remarks and Challenges	407
References	420
10 Nonstandard Finite Difference Methods and Biological Models	423
<i>S. R.-J. Jang</i>	
1 Introduction	423
2 Epidemic Models	426
3 A Multiple Populations Competition Model	448
4 Discussion	454
References	456
11 Robust Discretizations versus Increase of the Time Step for Chaotic Systems	459
<i>C. Letellier and E. M. A. M. Mendes</i>	
1 Introduction	459
2 Topological Analysis of Chaotic Systems	463
3 Motivations for Nonstandard Schemes	469
4 The Nonstandard Mickens Scheme	474
5 The Normand and Monaco-Cyrot Scheme	491
6 Conclusion	507
References	509

12 Contributions to the Theory of Non-Standard Finite Difference Methods and Applications to Singular Perturbation Problems	513
<i>J. M.-S. Lubuma and K. C. Patidar</i>	
1 Introduction	514
2 Towards a Definition of the Nonstandard Finite Difference Method	516
3 Singularly Perturbed First-Order Systems of ODEs	529
4 Singularly Perturbed Second-Order Problems	541
5 Singularly Perturbed Advection-Reaction Problems	548
6 Singularly Perturbed Reaction-Diffusion Problems	553
7 Conclusions	556
References	558
13 Frequency Accurate Finite Difference Methods	561
<i>A. L. Perkins, P. A. Orlin and F. Zand</i>	
1 Introduction	562
2 Average Value Spatial Difference	562
3 Temporal Derivative	572
4 Higher Order Spatial Derivatives	584
5 A Frequency Accurate Finite Difference Scheme for Burgers Equation	597
6 Historical Notes	612
References	614
14 Nonstandard Discretization Methods on Lotka-Volterra Differential Equations	615
<i>L.-I. W. Roeger</i>	
1 Introduction	615
2 Two-Dimensional Lotka-Volterra Systems	616
3 The May-Leonard Competitive System	626
4 Three-Dimensional Lotka-Volterra Competitive System	640
5 Conclusions and Open Problems	648
References	649
