Preface	v
1. Banks M&As: Motives and Evidence	
1.1 Overview	1
1.2 M&As Trends in the European Union	3
1.3 Reasons and Motives for Banks M&As	8
1.3.1 Firm level motives and external factors of M&As	8
1.3.1.1 Firm level motives	9
1.3.1.2 External factors	20
1.3.2 Practitioners' views on reasons for banks M&As	25
1.4 Studies on Banks' M&As	33
1.4.1 Characteristics of banks involved in M&As	33
1.4.2 Premium paid on banks' M&As	36
1.4.3 Evidence on merged banks' operating performance	38
1.4.4 Evidence on merged banks' stock market performance	42
1.4.5 Evidence on European banks M&As	47
2. Studies on the Prediction of Acquisition Targets	
2.1 Introduction	53
2.2 Studies Employing Statistical Techniques	54
2.3 Studies using Econometric Techniques	66
2.4 Other Studies	85
2.5 Conclusions	99
3. Methodological Framework for the Development of Acquisition Targets Prediction Model	
3.1 Introduction	103
3.2 Sampling Considerations	104
3.2.1 Definition of acquisitions	104
3.2.2 Training and testing samples	107
3.2.2.1 Holdout sample	107
3.2.2.2 Resampling techniques	108

3.2.2.3 Population drift	110
3.2.3 Proportion of acquired and non-acquired firms in sample.....	111
3.3 Variables Selection Process	114
3.3.1 Financial theory and human judgement.....	115
3.3.2 Univariate statistical tests of mean differences.....	116
3.3.3 Factor analysis	117
3.4 Method Selection.....	118
3.4.1 Discriminant analysis.....	119
3.4.2 Logit analysis.....	120
3.4.3 UTilités Additives DIScriminantes (UTADIS).....	122
3.4.4 Multi-group Hierarchical DIScrimination (MHDIS).....	125
3.4.5 Classification and Regression Trees (CART).....	131
3.4.6 Nearest neighbours	132
3.4.7 Support Vector Machines (SVMs).....	134
3.5 Aspects of Model Evaluation	135
3.5.1 The classification matrix.....	135
3.5.2 Issues to consider when choosing evaluation measure	140
3.5.3 Out-of-sample performance — model's testing.....	143
3.6 Conclusion.....	144
4. Data and Preliminary Analysis	
4.1 Introduction	145
4.2 Data Sources	147
4.3 Samples Construction.....	148
4.4 Identification of Candidate Variables	154
4.5 Financial Variables and Country (Industry) Adjustment.....	162
4.6 Variables Reduction Process	165
4.6.1 Descriptive statistics	165
4.6.2 Univariate test of two groups mean differences.....	169
4.6.3 Correlation analysis	172
4.7 Conclusion.....	174
5. Development of Acquisitions Prediction Models	
5.1 Introduction	175
5.2 Summary of Results of Model Comparisons.....	178
5.3 Development and Evaluation of Prediction Models	184
5.3.1 Discriminant analysis.....	187
5.3.2 Logit analysis.....	197
5.3.3 UTADIS.....	205
5.3.4 MHDIS	208
5.3.5 CART.....	212
5.3.6 Nearest neighbours	220

5.3.7 SVMs	222
5.4 Conclusions	225
6. Integration of Prediction Models	
6.1 Introduction	229
6.2 Integrated (Multi-Classifiers) Models	230
6.2.1 Majority voting	233
6.2.2 Stacked generalization approach.....	236
6.3 Development and Evaluation of Integration Models	238
6.3.1 Application of the majority voting rule.....	239
6.3.2 Application of stacked generalization approach	241
6.3.3 Comparison of majority voting and stacked models.....	246
6.4 Conclusions	246
7. Conclusions	
7.1 Introduction	249
7.2 Why Prediction Models for EU Banks	249
7.3 Summary of the Findings	250
7.4 Why Classification Results Differ Across Methods?	253
7.5 Suggestions for Further Research.....	255
Bibliography	257
Index	277
