

CONTENTS

Preface

W.Y. Yun and T. Dohi

I. System and Network Reliability **1**

Optimal Burn-in for Minimizing Total Warranty Cost 3

J.H. Cha

An Efficient Approach to Enumerate SCG Arising in
CRNR Evaluation 11

S.K. Chaturvedi and R. Mishra

System Reliability Prediction Model using Truncated Weibull
Distribution for Manufacturing System Design 24

H.S. Hwang and G.S. Cho

Integrated Performance Model for Facility Design
System Performance-RAM-LCC 32

H.S. Hwang and G.S. Cho

Reliability Analysis of a Network Server System with
Illegal Access 40

M. Imaizumi, M. Kimura and K. Yasui

Reliability Analysis of a Repairable System with
Warm Standbys and Imperfect Coverage 48

J.B. Ke, K.H. Wang and J.Y. Ding

Enhancing Internet Network Reliability by Integrated
Framework of Multi-objective Genetic Algorithm and
Monte Carlo Simulation 56

D.H. Kim and J.R. Kim

In Heuristics for the Access Network Design Problem in UMTS Mobile Communication Networks <i>H.G. Kim, C.H. Paik and Y.J. Chung</i>	64
Two Stage Burn in Policy <i>S.H. Sheu and C.S. Lin</i>	72
Reliability Analysis of a Repairable System with Standby Switching Failures and Reboot Delay <i>K.H. Wang, J.W. Chen and J.B. Ke</i>	80
Quantitative Analysis of a Fault Tree with Priority AND Gates <i>T. Yuge and S. Yanagi</i>	89
A Consecutive- k_1 and k_2 -out-of- n System and Its Reliability <i>X. Zhao, L. Cui and X. Yang</i>	97
II. Optimization in Reliability Engineering	105
Efficient Algorithm for the System State Distribution of Multi-State k -out-of- n System <i>T. Akiba, H. Yamamoto and H. Nagatsuka</i>	107
Decision Support System for Reliability Analysis of Process Plant Shutdowns <i>M. Bertolini and M. Bevilacqua</i>	116
Evaluating Ability of a Branch and Bound Method Designed for Solving Bi-Objective NVP Design Problem <i>T. Hiroshima, H. Yamachi, Y. Tsujimura, H. Yamamoto and Y. Kambayashi</i>	124
Optimality of k -out-of- n Systems for Condition Monitoring Maintenance using Dependent Information <i>L. Jin, Y. Horikoshi and K. Suzuki</i>	132

Redundancy Allocation Problems with Multiple Component Choices using Simulated Annealing Algorithm	142
<i>H.G. Kim and C.O. Bae</i>	
Globally Solving the Redundancy Allocation Problem for the Case of Series-Parallel Systems	150
<i>J.H. Kim and J.S. Kim</i>	
Reliability Allocation with or without Cost Consideration	158
<i>G.L. Lee</i>	
A Multi Objective Genetic Algorithm for Solving Reliability Optimization Problem of a Communication Network System	166
<i>M. Mukuda and Y. Tsujimura</i>	
Genetic Algorithm for Solving Optimal Component Arrangement Problem of Circular Consecutive -k-out-of-n:F System	176
<i>K. Shingyochi, H. Yamamoto, Y. Tsujimura and Y. Kambayashi</i>	
Redundancy Optimization in Multi-level System with SA Algorithm	185
<i>W.Y. Yun, I.H. Chung and H.G. Kim</i>	
III. MAINTENANCE	193
A Near Optimal Preventive Maintenance Policy with the Effect of Age Reduction Factor	195
<i>M.C. Chen and C.Y. Cheng</i>	
The Optimal Periodic Preventive Maintenance Policy with Reliability Limit for the Case of Degradation Rate Reduction	203
<i>C.Y. Cheng and M.C. Chen</i>	

An Inventory with Partial Replenishment Subject to Compound Poisson Demands	211
<i>S.K. Choi, K.E. Lim and E.Y. Lee</i>	
Optimal (T, S)-Policies in a Discrete-Time Opportunity-based Age Replacement: An Empirical Study	219
<i>T. Dohi, N. Kaio and S. Osaki</i>	
A Maintenance and Inventory Control in a Connected-(p, r)-out-of-(m,n): F System	227
<i>Y.J. Ha and W.Y. Yun</i>	
Optimal Maintenance Policy for a System with Damage Repair	235
<i>K. Ito, T. Nakagawa and K. Teramoto</i>	
Discrete Repair-cost Limit Replacement Policies	243
<i>K. Iwamoto, T. Dohi and N. Kaio</i>	
Aperiodic Optimal Checkpoint Sequence under Steady-state System Availability Criterion	251
<i>K. Iwamoto, T. Maruo, H. Okamura and T. Dohi</i>	
Optimal Periodic Preventive Maintenance Policies Based on ARI_1 and ARI_∞ Models	259
<i>D.H. Kim and J.H. Lim</i>	
A Continuous-wear Limit Replacement-policy with Random Threshold under Periodic Inspections	267
<i>B.J. Lee, C.W. Kang, S.J. Kim and S.J. Bae</i>	
A Maintenance Model for Manufacturing Lead Time in a Production System with BMAP Input and Bilevel Setup Control	275
<i>H.W. Lee and N.I. Park</i>	

Optimal Inspection Policy with Alive Message <i>S. Mizutani, T. Nakagawa and T. Nishimaki</i>	285
Optimal Checkpoint Intervals for Error Detection by Multiple Modular Redundancies <i>K. Naruse, T. Nakagawa and S. Maeji</i>	293
Optimal Maintenance Policy of the System Considering External Environment Preventive Maintenance <i>J.H. Park, Y.B. Kim, G.H. Shin, J.W. Hong and C.H. Lie</i>	301
Approximately Optimal Testing Policies for Series Systems <i>M. Wang and C.M. Chang</i>	310
Optimal Preventive-maintenance Policy for Lease Products under a Threshold Value on Failure Rate <i>R.H. Yeh and W.L. Chang</i>	318
IV. Advanced Warranty Modeling	327
Optimum Production Run Length and Warranty Period Setting for the Imperfect Production System <i>C.H. Chen</i>	329
Optimal Age-replacement Policy for Repairable Products under Renewing Free-replacement Warranty <i>Y.H. Chien and J.A. Chen</i>	337
Spare Ordering Policy for Replacement under the Rebate Warranty <i>Y. H. Chien and J. A. Chen</i>	345
A Repair Cost Limit Policies with Fixed Warranty Period <i>C.H. Choi and W.Y. Yun</i>	353

Two-dimensional Warranty: Minimal/Complete Repair Strategy	361
<i>S. Chukova, Y. Hayakawa and M.R. Johnston</i>	
Optimal Production Run-length and Warranty Period for Items Sold with Rebate Combination Warranty	369
<i>B. C. Giri and T. Chakraborty</i>	
Analysis of Warranty Data with Covariates	377
<i>M.R. Karim and K. Suzuki</i>	
Imperfect Repair Policies under Two-dimensional Warranty	385
<i>W.Y. Yun and K.M. Kang</i>	
V. Software Reliability	393
Bivariate Extension of Software Reliability Modeling with Number of Test Cases	395
<i>T. Ishii, T. Fujiwara and T. Dohi</i>	
Nonhomogeneous Poisson Processes Based on Beta-mixtures in Software Reliability Models	403
<i>D.K. Kim, I.K. Yeo and D.H. Park</i>	
Simulation Methods for Parameter Estimation of Inflection S-shaped Software Reliability Growth Model	411
<i>H.S. Kim, D.H. Park and S. Yamada</i>	
A Study on Bootstrap Confidence Intervals of Software Reliability Measures Based on an Incomplete Gamma Function Model	419
<i>M. Kimura</i>	
Software Reliability Modeling Based on Mixed Poisson Distributions	427
<i>H. Okamura and T. Dohi</i>	

Coverage Growth Functions for Software Reliability Modeling	435
<i>J.Y. Park and T. Fujiwara</i>	
Estimating the Optimal Software Rejuvenation Schedule with Small Sample Data	443
<i>K. Rinsaka and T. Dohi</i>	
Incorporating Dynamic Software Metrics Data in Software Reliability Assessment	451
<i>K. Shibata, K. Rinsaka and T. Dohi</i>	
A User-oriented Reliability Assessment Method for Open Source Software	459
<i>Y. Tamura and S. Yamada</i>	
Performance Analysis for Software System with Processing Time Limit Based on Reliability Growth Model	467
<i>K. Tokuno and S. Yamada</i>	
VI. Accelerated Testing and Failure Analysis	475
Planning Accelerated Tests-A Review (Invited Paper)	477
<i>B.J.Yum, S. J. Park, H.S. Lim and M. Kim</i>	
Failure Analysis and Accelerated Degradation Test for AC Fan Motor	486
<i>J.S. Jung, J.W. Kim, J.K. Lee, H.J. Lee, J.S. Moon, J.C. Shin, S.W. Cha and M.S. Kim</i>	
An Analysis of Accelerated Performance Degradation Test Assuming the Arrhenius Stress-relationship	494
<i>T.H. Kang, S.W. Chung and W.Y. Yun</i>	

Optimum Design of Accelerated Life Tests under Two Failure Modes	502
<i>C.M. Kim</i>	
Analyses of Accelerated Life Tests from General Limited Failure Population	510
<i>C.M. Kim and J.H. Seo</i>	
Degradation Characteristics of Polymeric Humidity Sensors under High Temperature and Humidity	518
<i>S.M. Kim, D.H. Hwang, J.W. Park, J.K. Ham, M.S. Kim and G.T. Oh</i>	
The Reliability Estimation of Pipeline using FAD, FORM and SORM	525
<i>O.S. Lee and D.H. Kim</i>	
Reliability Evaluation of High Precision Oil Cooler	533
<i>S.W. Lee, S.W. Han and H.K. Lee</i>	
Design of Accelerated Life Test Sampling Plans with a Nonconstant Shape Parameter	541
<i>J.H. Seo, M. Jung and C.M. Kim</i>	
A Study on the Lifetime Prediction of the Rubber Materials for Refrigerator Component	549
<i>C.S. Woo and S.S. Choi</i>	
VII. Statistical Analysis and Reliability Modeling	557
Mixture Failure Rates: Ordering and Asymptotic Theory (Invited Paper)	559
<i>M. Finkelstein and V. Esaulova</i>	
Bayesian Estimation of Hazard Rate of a Mixture Model with Censored Lifetimes	569
<i>S. E. Ahn, C. S. Park, H. M. Kim and W.H. Kim</i>	

A Note on Parameter Estimation for Phase-type Distribution in Canonical Form	577
<i>H. Gotoh, H. Okamura and T. Dohi</i>	
Fuzzy Variable Reliability Modeling Based on Credibility Theory	585
<i>R. Guo</i>	
Small Sample Asymptotic Distribution of Cost-related Reliability Risk Measure	595
<i>R. Guo</i>	
Estimation of Failure Intensity and Maintenance Effect under Two Different Environments	603
<i>J.W. Kim, W.Y. Yun, J.S. Park and J.H. Kim</i>	
Characterizing a Negative Binomial Process for a Gamma Distributed Failure Rate	610
<i>W.H. Kim, S.E. Ahn and C.S. Park</i>	
On Nonparametric Testing Equality of Residual Life Times	618
<i>J.H. Lim and D.H. Park</i>	
Parameter Estimation of Shape Parameter of the Gamma Distribution Free from Location and Scale Information	626
<i>H. Nagatsuka, H. Yamamoto and T. Kamakura</i>	
Comparison of Two Information Structures with Noise in Bayesian Decision Analysis	634
<i>C.H. Qian, J. Chen and T. Nakagawa</i>	
VIII. Stochastic Models	643
Grey Reliability Analysis under L_1 Norm	645
<i>R. Guo and Y. H. Cui</i>	

Statistical Analysis of Intensity for a Queueing System <i>J. C. Ke and Y. K. Chu</i>	654
Application for Market Impact of Stock Price Using Cumulative Damage Model <i>S. Nakamura, M. Arafuka, T. Nakagawa and H. Kondo</i>	660
Some Results on a Markovian Deteriorating System with Multiple Imperfect Repair <i>N. Tamura</i>	668
Transient Analysis of Internet-worm Propagation Based on Simple Birth and Death Processes <i>K. Tateishi, H. Okamura and T. Dohi</i>	676
IX. Statistical Quality Control	685
Improved Inspection Schedule for a Batch Mode Production System <i>J.A. Chen and Y.H. Chien</i>	687
Evaluation of Multi-process Capability by a Fuzzy Inference Method <i>T.W. Chen and T.C. Wang</i>	693
A New Process Improvement Capability Index of Considering Cost to Select Supplier <i>K.S. Chen, S.L. Yang, J.M. Huang and C.Y. Hsieh</i>	703
Joint Optimization of Process Mean and Tolerance Limits for Multi-class Screening <i>S.H. Hong, I.J. Choi, M.K. Lee and H.M. Kwon</i>	709
Separate Response Surface Modeling for Multiple Response Optimization <i>Y.J. Kim</i>	717

A Global Criterion Approach to Multiple Response Optimization	724
<i>Y.J. Kim and B.R. Cho</i>	
Determination of Mean Value for a Production Process with Multiple Products	731
<i>M.K. Lee, S.H. Hong and H.M. Kwon</i>	
Some Advanced Control Charts for Monitoring Weibull-distributed Time between Events	739
<i>J. Y. Liu, M. Xie and T.N. Goh</i>	
The Relationship between PCIs and 6σ	747
<i>L.Y. Ouyang and C.H. Hsu</i>	
Confidence Intervals for Measures of Variability in Balanced Mixed Gauge R&R Study	752
<i>D.J. Park</i>	
Therapeutic Decision Making for Uncertainty Averse Patient	760
<i>T. Satow and H. Kawai</i>	
The Autocorrelated GWMA Control Chart	768
<i>S.H. Sheu and S.L. Lu</i>	
An Extended Exponentially Weighted Moving Average Control Chart for Monitoring Poisson Observations	776
<i>S.H. Sheu, T.C. Lin and S.H. Tai</i>	
Build up the Product Satisfaction Performance Measurement by Using 6-sigma Methodology and S/N Ratio Approach - An Example of PDA	783
<i>C.J. Tao, S.C. Chen and H.C. Tsung</i>	
Author Index	793
