Detailed contents (per module)**Public water**

Sanitary engineering	11
Framework, contents, study goals	12
1. Introduction	13
2. What is sanitary engineering?	13
3. History of sanitary engineering	16
4. Public health	25
5. Sanitary engineering worldwide	29
Further reading	38
Questions and applications	39
Answers	40

Water companies

Amsterdam water	41
Framework, contents, study goals	42
1. Introduction	43
2. The Netherlands	44
3. Amsterdam	46
4. Developments in water consumption and distribution	56
5. Developments in drinking water production	64
6. Developments as enterprise	81
Further reading	85
Questions and applications	86
Answers	87

Drinking water companies	89
Framework, contents, study goals	90
1. Introduction	91
2. Technical setup for drinking water supply	91
3. Production	92
4. Distribution	104
5. Capacity	109
6. Organization	112
Further reading	115
Questions and applications	116
Answers	117

Planning and design	119
Framework, contents, study goals	120
1. Introduction	121
2. Planning process for public water supply	121
3. Design activities in the infrastructure's life cycle	123
4. Laws, permits and standards	134
5. The practice of designing	139
Further reading	148
Questions and applications	149
Answers	150
Finances	153
Framework, contents, study goals	154
1. Introduction	155
2. Water company as an enterprise	155
3. Investment costs	164
4. Operational costs	171
5. Cost comparison of alternatives	177
Further reading	180
Questions and applications	181
Answers	183
Technical facets	
<hr/>	
Water consumption	185
Framework, contents, study goals	186
1. Introduction	187
2. Annual consumption	187
3. Quality requirements for consumption	197
4. Fluctuations in consumption	198
5. Consumption forecasting	201
Further reading	205
Questions and applications	206
Answers	208
Water quality	211
Framework, contents, study goals	212
1. Introduction	213
2. Water on Earth	213
3. Water: physical and chemical properties	222
4. Health and drinking water quality	233

5. Drinking water legislation in the Netherlands	237
6. Water quality for other applications	243
Further reading	245
Questions and applications	246
Answers	248
Groundwater	251
Framework, contents, study goals	252
1. Introduction	253
2. Groundwater in the natural environment	253
3. Abstraction of groundwater	255
4. Treatment of groundwater	267
5. Treatment of riverbank groundwater	294
6. Groundwater legislation in the Netherlands	301
Further reading	302
Questions and applications	303
Answers	305
Surface water	309
Framework, contents, study goals	310
1. Introduction	311
2. Surface water in the natural environment	311
3. Intake of surface water	314
4. Direct treatment of surface water	317
5. Indirect treatment of surface water through infiltration	350
6. Dutch surface water legislation	357
Further reading	357
Questions and applications	358
Answers	360
Distribution	363
Framework, contents, study goals	364
1. Introduction	365
2. Parts of a distribution system	366
3. Transport	367
4. Storage	375
5. Distribution	378
6. Drinking water installations	384
