

Contents

<i>Preface</i>	v
Hybrid Methods for Optimisation <i>E. S. Fraga</i>	1
An MILP Model for Multi-class Data Classification <i>G. Xu, L. G. Papageorgiou</i>	15
Implementation of Parallel Optimization Algorithms Using Generalized Branch and Bound Template <i>M. Baravykaitė, J. Žilinskas</i>	21
Application of Stochastic Approximation in Technical Design <i>V. Bartkutė, L. Sakalauskas</i>	29
Application of the Monte-Carlo Method to Stochastic Linear Programming <i>L. Sakalauskas, K. Žilinskas</i>	39
Studying the Rate of Convergence of the Steepest Descent Optimisation Algorithm with Relaxation <i>R. J. Haycroft</i>	49

A Synergy Exploiting Evolutionary Approach to Complex Scheduling Problems	59
<i>J. A. Vázquez Rodríguez, A. Salhi</i>	
Optimal Configuration, Design and Operation of Hybrid Batch Distillation/Pervaporation Processes	69
<i>T. M. Barakat, E. Sørensen</i>	
Optimal Estimation of Parameters in Market Research Models	79
<i>V. Savani</i>	
A Redundancy Detection Approach to Mining Bioinformatics Data	89
<i>H. Camacho, A. Salhi</i>	
Optimal Open-Loop Recipe Generation for Particle Size Distribution Control in Semi-Batch Emulsion Polymerisation	99
<i>N. Bianco, C. D. Immanuel</i>	
Application of Parallel Arrays for Parallelisation of Data Parallel Algorithms	109
<i>A. Jakušev, V. Starikovičius</i>	
CAD Grammars: Extending Shape and Graph Grammars for Spatial Design Modelling	119
<i>P. Deak, C. Reed, G. Rowe</i>	
Multidimensional Scaling Using Parallel Genetic Algorithm	129
<i>A. Varoneckas, A. Žilinskas, J. Žilinskas</i>	
Multidimensional Scaling in Protein and Pharmacological Sciences	139
<i>J. Žilinskas</i>	

On Dissimilarity Measurement in Visualization of Multi-dimensional Data	149
<i>A. Žilinskas, A. Podlipskytė</i>	
Correction of Distances in the Visualization of Multi-dimensional Data	159
<i>J. Bernatavičienė, V. Šaltenis</i>	
Forecasting of Bankruptcy with the Self-organizing Maps on the Basis of Altman's Z-score	169
<i>E. Merkevičius</i>	
The Most Appropriate Model to Estimate Lithuanian Business Cycle	177
<i>A. Jakaitienė</i>	
Evaluating the Applicability of Time Temperature Integrators as Process Exploration and Validation Tools	187
<i>S. Bakalis, P. W. Cox, K. Mehauden, P. J. Fryer</i>	
Optimal Deflection Yoke Tuning	197
<i>V. Vaitkus, A. Gelžinis, R. Simutis</i>	
Analysis of an Extractive Fermentation Process for Ethanol Production Using a Rigorous Model and a Short-Cut Method	207
<i>O. J. Sánchez, L. F. Gutiérrez, C. A. Cardona, E. S. Fraga</i>	
Application of Generic Model Control for Autotrophic Biomass Specific Growth Control	217
<i>J. Repšytė, R. Simutis</i>
