<i>The International Solvay Institutes</i>	v
<i>23rd Solvay Conference on Physics</i>	ix
<i>Opening Session</i>	xiii
1. History	1
1.1 Rapporteur talk: Solvay Redivivus, by Peter Galison . . . . .	1
1.1.1 Three Miracles . . . . .	1
1.1.2 SOLVAY -1: Einstein-Lorentz, Einstein-Poincaré . . . . .	6
1.1.3 Ignoramus, Ignorabimus at Solvays-5 and Solvay-6 . . . . .	10
1.1.4 Solvay Redivivus . . . . .	15
1.2 Discussion . . . . .	19
2. Quantum Mechanics	21
2.1 Rapporteur talk: Generalizing Quantum Mechanics, by James B. Hartle . . . . .	21
2.1.1 Abstract . . . . .	21
2.1.2 Introduction . . . . .	22
2.1.3 Quantum Mechanics Today . . . . .	24
2.1.4 Spacetime and Quantum Theory . . . . .	26
2.1.5 The Quantum Mechanics of Closed Systems . . . . .	27
2.1.6 Quantum Theory in 3+1 Form . . . . .	30
2.1.7 Generalized Quantum Theory . . . . .	32
2.1.8 A Quantum Theory of Spacetime Geometry . . . . .	33
2.1.9 Beyond Spacetime . . . . .	35
2.1.10 Emergence/Excess Baggage . . . . .	35
2.1.11 Emergence of Signature . . . . .	38
2.1.12 Beyond Quantum Theory . . . . .	39
2.1.13 Conclusion . . . . .	40
2.2 Discussion . . . . .	44

3.	Singularities	51
3.1	Rapporteur talk: Singularities, by Gary W. Gibbons . . . . .	51
3.1.1	Introduction . . . . .	51
3.1.2	Singularity Theorems . . . . .	51
3.1.3	Cosmic Censorship . . . . .	53
3.1.4	Classical Boundary Conditions and Stability . . . . .	54
3.1.5	Boundary Conditions in Cosmology . . . . .	55
3.1.6	Higher dimensional resolutions . . . . .	59
3.1.7	Singularities at the end of Hawking Evaporation . . . . .	61
3.1.8	Maldacena's Conjecture . . . . .	61
3.2	Discussion . . . . .	64
3.3	Prepared Comments . . . . .	65
3.3.1	Gary Horowitz: Singularities in String Theory . . . . .	65
3.4	Discussion . . . . .	69
3.5	Prepared Comments . . . . .	70
3.5.1	Eva Silverstein: Singularities: Closed String Tachyons and Singularities . . . . .	70
3.6	Discussion . . . . .	77
3.7	Prepared Comments . . . . .	77
3.7.1	Thibault Damour: Cosmological Singularities and $E_{10}$ . . . . .	77
3.8	Discussion . . . . .	82
3.9	Prepared Comments . . . . .	83
3.9.1	Abhay Ashtekar: Singularities: quantum nature of the big bang in loop quantum gravity . . . . .	83
3.10	Discussion . . . . .	87
4.	Mathematical Structures	91
4.1	Rapporteur talk: Mathematical Structures, by Robbert Dijkgraaf . . . . .	91
4.1.1	Abstract . . . . .	91
4.1.2	Quantum Theory and Mathematics . . . . .	91
4.1.3	The quantum geometry of string theory . . . . .	97
4.1.4	Non-perturbative string theory and branes . . . . .	107
4.1.5	D-branes . . . . .	112
4.1.6	The Role of Mathematics . . . . .	116
4.2	Discussion . . . . .	119
4.3	Prepared Comments . . . . .	123
4.3.1	Renata Kallosh: Stabilization of moduli in string theory . . . . .	123
4.3.2	Dieter Lüst: A short remark on flux and D-brane vacua and their statistics . . . . .	127
4.3.3	Michael Douglas: Mathematics and String Theory: Under- standing the landscape . . . . .	132
4.4	Discussion . . . . .	140

4.5	Prepared Comments . . . . .	143
4.5.1	Nikita Nekrasov: On string theory applications in condensed matter physics . . . . .	143
4.5.2	Shing-Tung Yau: Mathematical Structures: Geometry of Six-Dimensional String . . . . .	147
4.6	Discussion . . . . .	151
4.7	Prepared Comments . . . . .	153
4.7.1	Hermann Nicolai: $E_{10}$ and $K(E_{10})$ : prospects and challenges	153
4.7.2	Michael Atiyah: Beyond string theory? . . . . .	157
4.8	Discussion . . . . .	159
5.	Emergent Spacetime . . . . .	163
5.1	Rapporteur talk: Emergent Spacetime, by Nathan Seiberg . . . . .	163
5.1.1	Introduction . . . . .	163
5.1.2	Ambiguous space . . . . .	164
5.1.3	Non-standard theories without gravity . . . . .	168
5.1.4	Derived general covariance . . . . .	169
5.1.5	Examples of emergent space . . . . .	170
5.1.6	Emergent time . . . . .	175
5.1.7	Conclusions and speculations . . . . .	176
5.2	Discussion . . . . .	179
5.3	Prepared Comments . . . . .	182
5.3.1	Tom Banks: The Holographic Approach to Quantum Gravity	182
5.3.2	Igor Klebanov: Confinement, Chiral Symmetry Breaking and String Theory . . . . .	191
5.3.3	Juan Maldacena: Comments on emergent space-time . . . . .	195
5.3.4	Alexander Polyakov: Beyond space-time . . . . .	199
5.4	Discussion . . . . .	204
6.	Cosmology . . . . .	215
6.1	Rapporteur talk: The cosmological constant and the string landscape, by Joseph Polchinski . . . . .	216
6.1.1	The cosmological constant . . . . .	216
6.1.2	The string landscape . . . . .	225
6.1.3	Conclusions . . . . .	233
6.2	Discussion . . . . .	237
6.3	Prepared Comments . . . . .	242
6.3.1	Steven Weinberg . . . . .	242
6.3.2	Renata Kallosh: Inflationary models as a test of string theory	246
6.3.3	Andrei Linde: Eternal inflation in stringy landscape and the anthropic principle . . . . .	250
6.4	Discussion . . . . .	255

6.4.1	Paul J. Steinhardt: A modest proposal for solving the cosmological constant problem . . . . .	258
6.5	Discussion . . . . .	264
7.	Closing remarks, by David Gross	269
