

CONTENTS

Preface	v
Highest Energy Universe	
AGASA Results and the Status of TA <i>M. Fukushima</i>	1
Results from the High Resolution Fly's Eye Experiment <i>C. C. H. Jui, for the HiRes Collaboration</i>	9
Astrophysical Origins of the Highest Energy Cosmic Rays <i>S. Inoue</i>	17
Cosmic Rays and Magnetic Fields in Large Scale Structure of the Universe <i>H. Kang</i>	28
Characterization of Microwave Continuum Emission from UHECR Extensive Air Showers <i>B. T. Stokes, N. G. Lehtinen, P. W. Gorham and G. S. Varner</i>	39
Around the Knee	
Cosmic Rays at the Knee <i>T. K. Gaisser</i>	45
The Anti Matter Spectrometer (AMS-02): A Particle Physics Detector in Space <i>R. Battiston</i>	56
Cosmic Neutrinos and the Energy Budget of Galactic and Extragalactic Cosmic Rays <i>F. Halzen</i>	71

Theoretical Aspects of High Energy Neutrinos and GRB <i>P. Mészáros and S. Razzaque</i>	84
GeV Sky	
Precise Measurement of Low Energy (<TeV) Cosmic-Ray Flux with BESS <i>A. Yamamoto, for the BESS Collaboration</i>	94
The PAMELA Cosmic Ray Telescope on Board Resurs-DK1 Satellite: An Overview of Heliospheric Observation Capabilities <i>M. Casolino</i>	102
Particle Acceleration in Kinetic Plasma Processes <i>M. Hoshino, S. Zenitani, K. Nagata and Y. Takagi</i>	108
The Swift Gamma-Ray Burst Mission: First Results <i>N. Gehrels, on behalf of the Swift Team</i>	119
Gamma-Ray Burst: Problems Delineated by HETE-2 and Other Observations <i>N. Kawai</i>	128
The Non-Thermal High Energy Emission from GRBs — Theoretical Predictions <i>E. Nakar</i>	136
Explosion Mechanism of Core-Collapse Supernovae and Collapsars <i>S. Nagataki</i>	146
TeV Sky	
Recent Results from CANGAROO <i>M. Mori, for the CANGAROO Team</i>	152
Observations of Galactic Gamma-Ray Sources with H.E.S.S. <i>D. Berge, for the H.E.S.S. Collaboration</i>	162

Particle Acceleration in Supernova remnants and the Resulting Nonthermal Emission	
<i>H. J. Völk</i>	175
Recent Results from the MAGIC Project and Outlook	
<i>J. A. Coarasa, for the MAGIC Collaboration</i>	189
All-Sky Survey High Resolution Air-Shower Detector (Ashra)	
<i>M. Sasaki</i>	197
TeV Gamma-Rays from Old Supernova Remnants	
<i>R. Yamazaki, K. Kohri, A. Bamba, T. Yoshida, T. Tsuribe and F. Takahara</i>	205
The CALET Project for Investigating High Energy Universe	
<i>S. Torii, for the CALET Collaboration</i>	211
MeV and keV Sky	
Initial Results from Suzaku	
<i>T. Takahashi, K. Mitsuda and H. Kunieda, on behalf of the Suzaku Team</i>	217
X-Ray Diagnostics of Acceleration Processes	
<i>A. Bamba</i>	226
Supernovae in the Universe	
<i>S. Yamada</i>	232
Search for Supernova Neutrinos at Super-Kamiokande	
<i>M. Nakahata</i>	243
Aspects of Neutrino Production in Supernovae	
<i>T. A. Thompson</i>	251
Special Lecture	
INTEGRAL	
<i>R. Sunyaev, E. Churazov, M. Revnivtsev and S. Sazonov</i>	261

Revealing the Dark TeV Sky: The Atmospheric Cherenkov Imaging Technique for Very High Energy Gamma-Ray Astronomy <i>T. C. Weekes</i>	282
Contributions	
JEM-EUSO Mission to Attach JEM/EF of ISS <i>T. Ebisuzaki, F. Kajino, M. Nagano, Y. Takizawa, Y. Kawasaki, M. Sato, M. E. Bertaina, T. Sawabe, T. Shibata, N. Sakaki, N. Inoue, Y. Uchibori and EUSO Collaboration</i>	303
Propagation of Ultra-High Energy Cosmic Rays above 10^{19} eV in a Structured Extragalactic Magnetic Field and Galactic Magnetic Field <i>H. Takami, H. Yoshiguchi and K. Sato</i>	307
High Energy Neutrino Emission from Gamma-Ray Bursts <i>K. Murase and S. Nagataki</i>	311
Simulation of Salt Neutrino Detector Performance for Ultra High-Energy Neutrino Detection <i>Y. Watanabe, M. Chiba, Y. Takayama, M. Fujii, O. Yasuda, F. Yabuki, Y. Shibasaki, T. Kamijo, Y. Chikashige, T. Kon, A. Amano, Y. Takeoka, Y. Shimizu, S. Mori, S. Ninomiya and M. Utsumi</i>	315
Measurement of Attenuation Length for UHF Radio Wave in Natural Rock Salt Samples Concerning Ultra High Energy Neutrino Detection <i>M. Chiba, Y. Watanabe, Y. Takayama, M. Fujii, O. Yasuda, F. Yabuki, Y. Shibasaki, T. Kamijo, Y. Chikashige, T. Kon, A. Amano, Y. Takeoka, Y. Shimizu, S. Mori, S. Ninomiya and M. Utsumi</i>	319
Particle Acceleration by Magnetohydrodynamic Turbulence <i>J. Cho and A. Lazarian</i>	323

SU(2) _L -Triplet Dark Matter and HEAT Anomaly in Cosmic Positron Experiment <i>S. Matsumoto, J. Hisano, O. Saito and M. Senami</i>	327
Cosmic Gamma-Ray Background Anisotropy from Dark Matter Annihilation <i>S. Ando and E. Komatsu</i>	331
High Energy Cosmic Rays, Neutrinos, and Photons from Gamma-Ray Bursts <i>K. Asano</i>	335
Damping of Fast Modes of MHD Turbulence and Electron Acceleration in Solar Flares <i>H. Yan</i>	339
Optical Measurements for CANGAROO-III <i>R. Kiuchi, M. Yuasa, M. Ohishi, A. Kawachi, M. Mori and the CANGAROO Collaboration</i>	345
Consideration of Cassegrain Imaging Atmospheric Cherenkov Telescopes <i>Y. Yukawa, M. Mori and T. Yoshikoshi</i>	349
Influence of a Non-Dipole Magnetic Field on the Peak Energies of Cyclotron Absorption Lines <i>O. Nishimura</i>	353
Magnetorotational Collapse of Very Massive Stars: Formation of Jets and Black Holes <i>Y. Suwa, T. Takiwaki, K. Kotake and K. Sato</i>	357
Relativistic Jets in Population III Supernova and Extremely Metal-Poor Stars <i>N. Tominaga, H. Umeda, K. Nomoto, K. Maeda and N. Iwamoto</i>	361

Core-Collapse Very Massive Stars: Evolution, Explosion, and Nucleosynthesis of Population III 500–1000 M_{\odot} Stars <i>T. Ohkubo, H. Umeda, K. Nomoto, T. Suzuki, K. Maeda, S. Tsuruta and M. J. Rees</i>	365
The Properties of the Unique Type Ib Supernova 2005bf and Implications for the difference between Type Ib/c Supernovae <i>M. Tanaka, N. Tominaga, K. Nomoto, K. Maeda, P. A. Mazzali and J. Deng</i>	369
Time Development of Relativistic Two-Temperature Plasma with Electron-Positron Pair Production <i>M. Kim and F. Takahara</i>	373
Current Status of CLIO for the Detection of Gravitational Waves <i>T. Akutsu, S. Miyoki, T. Uchiyama, K. Yamamoto, M. Ohashi, K. Kuroda, S. Kamagasako, N. Nakagawa, M. Tokunari, K. Kasahara, S. Telada, T. Tomaru, T. Suzuki, N. Sato, T. Shintomi, T. Haruyama, A. Yamamoto, D. Tatsumi, M. Ando, A. Araya, A. Takamori, S. Takemoto, H. Momose, H. Hayakawa, W. Morii and J. Akamatsu</i>	377
Development of an Automatic Birefringence Measuring Device of Mirror Substrates for LCGT <i>M. Tokunari, H. Hayakawa, K. Yamamoto, T. Uchiyama, S. Miyoki, M. Ohashi and K. Kuroda</i>	382
Quasar Luminosity Function from Recent Observations <i>K. Ichikawa</i>	388
Scientific Program	393
