

## Contents

<i>Preface</i>	v
1. Temporal Specification of Component Based Systems with Polymorphic Dynamic Reconfiguration <i>N. Aguirre and T. Maibaum</i>	1
2. Coordinated Composition of Software Components <i>F. Arbab</i>	35
3. On the Semantics of Componentware: A Coalgebraic Persecutive <i>L.S. Barbosa, M. Sun, B.K. Aichernig and N. Rodrigues</i>	69
4. A Theory for Requirements Specification and Architecture Design <i>M. Broy</i>	119
5. Component: From Mobile to Channels <i>F.S. de Boer, M.M. Bonsangue and J.V. Guillen-Scholten</i>	155
6. Formalizing the Transition from Requirements to Design <i>R.G. Dromey</i>	173
7. rCOS: A Relational Calculus of Components <i>Z. Liu, J. He and X. Li</i>	207

8.	Charaterising Object-Based Frameworks in First-Order Predicate Logic	239
	<i>S.-M. Ho and K.-K. Lau</i>	
9.	Formalization in Component Based Development	271
	<i>J.P. Holmegaard, J. Knudsen, P. Makowski and A.P. Ravn</i>	
10.	A Model-Driven Approach for Building Business Components	297
	<i>V. Kulkarni and S. Reddy</i>	
11.	A Formal Approach to Constructing Well-Behaved Systems Using Components	321
	<i>S. Moschoyiannis, J. Küster-Filipe and M.W. Shields</i>	
	<i>Subject Index</i>	351
