

CONTENTS

Introduction	v
Part I Elementary School on Singularity Theory	
Introduction to Basic Toric Geometry <i>G. Barthel, L. Kaup and K.-H. Fieseler</i>	3
Poincaré-Hopf Theorems on Singular Varieties <i>J.-P. Brasselet</i>	57
Notes on Real and Complex Analytic and Semianalytic Singularities <i>D. B. Massey and D. T. Lê</i>	81
On Milnor's Fibration Theorem for Real and Complex Singularities <i>J. Seade</i>	127
Introduction to Complex Analytic Geometry <i>T. Suwa</i>	161
Part II Advanced School on Singularity Theory	
Metric Theory of Singularities. Lipschitz Geometry of Singular Spaces <i>L. Birbrair</i>	223
Lectures on Monodromy <i>W. Ebeling and S. M. Gusein-Zade</i>	234
Computational Aspects of Singularities <i>A. Frühbis-Krüger</i>	253
Lagrangian and Legendrian Varieties and Stability of Their Projections <i>V. V. Goryunov and V. M. Zakalyukin</i>	328
A Resolution of Singularities of a Toric Variety and a Non-degenerate Hypersurface <i>S. Ishii</i>	354
Problems in Topology of the Complements to Plane Singular Curves <i>A. Libgober</i>	370

Topology of Degeneration of Riemann Surfaces <i>Y. Matsumoto</i>	388
Graded Roots and Singularities <i>A. Némethi</i>	394
Chern Classes and Thom Polynomials <i>T. Ohmoto</i>	464
McKay Correspondence for Quotient Surface Singularities <i>O. Riemenschneider</i>	483
Lectures on the Topology of Polynomial Functions and Singularities at Infinity <i>D. Siersma and M. Tibăr</i>	520
Hodge Theory: The Search for Purity <i>C. A. M. Peters and J. H. M. Steenbrink</i>	556
Part III Workshop on Singularities in Geometry and Topology	
On Sufficiency of Jets <i>H. Brodersen</i>	585
Singularity Theory Approach to Time Averaged Optimization <i>A. Davydov and H. Mena-Matos</i>	598
Indices of Collections of 1-Forms <i>W. Ebeling and S. M. Gusein-Zade</i>	629
A Lefschetz Theorem on the Picard Group of Complex Projective Varieties <i>H. A. Hamm and D. T. Lê</i>	640
Braid Monodromy and π_1 of Discriminant Complements <i>M. Lönne</i>	661
Tangential Alexander Polynomials and Non-reduced Degeneration <i>M. Oka</i>	669
On Rigidity of Germs of Holomorphic Dicritic Foliations and Formal Normal Forms <i>E. Rosales-González</i>	705
Polar Multiplicities and Euler Obstruction of the Stable Types in Weighted Homogeneous Map Germs from \mathbb{C}^n to \mathbb{C}^3 , $n \geq 3$ <i>E. C. Rizziolli and M. J. Saia</i>	723

Logarithmic Vector Fields and Multiplication Table <i>S. Tanabé</i>	749
Some Surface Singularities Obtained via Lie Algebras <i>K. Nakamoto and M. Tosun</i>	779
Maxwell Strata and Caustics <i>M. van Manen</i>	787
Complex Curve Singularities: A Biased Introduction <i>B. Teissier</i>	825
Programme of the Conference	889
List of Participants	895
