

Appendix

Contents and Instructions for Installation of Software CDs

System Architect CD

To install System Architect, get an installation code by visiting: <http://www.telelogic.com/eapda/>, and fill out a form that will auto-send to you an e-mail with a code. This code allows you to use the software for 30 days.

(1) Install Products

System Architect (SA):	Powerful modelling software designed to provide all the tools necessary for development of successful enterprise systems.
SA Information Web Publisher:	An add-on option to System Architect that enables you to generate complete websites of model information from the SA repository (called Encyclopedia).
SA Compare:	An add-on option to System Architect that enables you to compare two SA encyclopedias.
SA Catalog Manager:	An add-on option to System Architect that enables you to manage and specify role-based access control to shared, enterprise-level encyclopedias.

- (2) Browse CD Products** Enables you to browse through all CD directories, including the Manuals, which contains these manuals:
- Conversion.pdf
 - Extensibility_usrprops.pdf
 - Extensibility_VBA.pdf
 - Installation Guide.pdf
 - Popkin_Process.pdf
 - UserGuide.pdf
- (3) Contact Us** Mailing addresses, telephone numbers, Fax, websites, and e-mail addresses of Telelogic Inc. in the USA and Europe.

Enterprise Architect CD

To install Enterprise Architect simply place the CD in D drive of your laptop or PC.

(1) Enterprise Architect Trial CD (3 options)

- Installation File for the trial version of Enterprise Architect Version 6.5 Build 797
- Installation File for the trial Linux Version of Enterprise Architect Version 6.5 Build 797
- Installation File for the read only Version of Enterprise Architect Version 6.5 Build 797

(2) MDG Integration for Visual Studio

At the click of a button, Model Driven Generation (MDG) Integration allows you to reverse engineer and generate .Net code from UML elements using EA's template driven Code Engineering Framework.

- Installation file for the MDG Integration for Visual Studio 2005.
- Multimedia demonstration of MDG Integration for Visual Studio 2005.

(3) MDG Link for Visual Studio.NET and Eclipse

MDG Link creates a close coupling between EA and the development environment, MDG Link for Visual Studio.NET to provide a lightweight bridge between EA and Visual Studio.NET 2003, whilst MDG Link for Eclipse is used to bridge between EA and Eclipse

(4) MDG Technologies

The Model Driven Generator (MDG) Technologies allow for a logical collection of resources pertaining to a specific technology to be bundled into one centralized location in Enterprise Architect. With MDG Technologies the user has the option of granular importation of UML Profiles, UML Patterns, Code templates and Language types to be contained in a single, easy to access area contained in the Enterprise Architect Resource View.

(5) UML Resources

- EA User Manual in PDF format (on CD)
- EA User Manual (online)
- UML Tutorials
- UML Patterns, and
- XML Schema Generation
