

Contents

<i>Preface</i>	vii
<i>Acknowledgments</i>	ix
<i>List of Figures</i>	xv
Chapter 1. A Day without Yesterday	1
1.1 Instant of Creation	1
1.2 Size and Age of Earth, Sun and Milky Way	8
1.3 Einstein's Static Universe	11
1.4 Expanding Universe	12
1.5 Universe without Center	16
1.6 Karl Schwarzschild and Black Holes	18
1.7 Questions	19
1.8 Boxes 1–9	30
Chapter 2. Formation of Galaxies	37
2.1 Fragmentation of Giant Clouds into Galaxies and Galaxy Clusters	37
2.1.1 Galaxies and Stars	39
2.2 Types of Galaxies	41
2.2.1 Spiral Arm Galaxies	41
2.2.2 Elliptical Galaxies	44
2.2.3 Lenticular Galaxy	45
2.3 Fritz Zwicky and Galaxies as Gravitational Lenses	46
2.4 Unseen Matter and Energy	49
2.4.1 Dark Matter, Dark Energy	49
2.4.2 Hot and Cold Dark Matter	50
2.4.3 Distinguishing between Dark and Ordinary Matter	50

2.5	Globular Clusters	51
2.6	Box 10	52
Chapter 3. Birth and Life of Stars		53
3.1	The First Stars	53
3.2	Star Birth	54
3.3	Orion: A Stellar Nursery	54
3.4	Birth of Massive Stars in the Trifid Nebula	56
3.5	Galaxy Collisions and Star Birth	58
3.6	In the Fires of Stars	59
3.7	Thermonuclear Evolution of Stars	61
3.8	Questions	63
3.9	Boxes 11–12	66
Chapter 4. Supernovae: Death and Transfiguration of Stars		67
4.1	A Dying Star	67
4.2	The Guest Star	67
4.3	Core Collapse and Supernovae	70
4.4	Ghostly Neutrinos	72
4.5	Detecting Far-off Supernova	73
4.6	What Sustains a Star So Long Before Its Collapse	76
4.7	White Dwarfs and Chandrasekhar	76
4.8	The Pauli Principle	78
4.9	Neutron Stars	79
4.10	Discovery: Jocelyn Bell	80
4.11	Birth, Death, and Transfiguration	88
4.12	Reverend John Michell and the Idea of Black Holes	92
4.13	Questions	93
Chapter 5. Nebulae		94
5.1	The Milky Way and Nebula	94
5.2	Sir John Herschel and the Carina Nebula	99
5.3	Planetary Nebulae	102
5.4	The Cerro Tololo Observatory	103
5.5	Questions	105
Chapter 6. Spacetime, Relativity, and Superdense Matter		107
6.1	Einstein: Spacetime and Relativity	107
6.2	Superdense Matter	117

6.3	Spinning Neutron Stars	119
6.4	Questions	120
6.5	Boxes 13–18	121
Chapter 7.	Origins	126
7.1	Formation of the Solar System	126
7.2	Johannes Kepler	130
7.3	The Sun	133
7.4	The Sun and Arthur Eddington	136
7.5	Eventual Fate of Our Sun	138
7.6	The Planets	139
7.7	The Earth	142
7.8	The Moon and Tidal Locking	144
7.9	The Moon	145
7.10	Laplace (1749–1827)	146
7.11	Questions	150
7.12	Box 19	153
Chapter 8.	First Modern Astronomer	154
8.1	Galileo: Principle Discoveries	154
8.2	Youth	156
8.3	His Astronomical Research with the Telescope	160
8.4	The Earth Turns Round	164
8.5	Conflict with the Church	165
Chapter 9.	Life on Earth	168
9.1	Land and Waters of Earth	168
9.2	Conditions for Life on Earth	170
9.3	Evolution of Life on Earth	172
9.4	Earliest Life on Earth	173
9.5	Mass Extinctions	175
9.6	Northern Lights (Aurora Borealis)	176
9.7	Habitable Zone around Stars	177
Chapter 10.	Other Planets and Their Moons	180
10.1	Jupiter	180
10.2	Moons of Jupiter	185
10.3	Mars	188
10.4	Moons of Mars	188

10.5	The Ringed Planet, Saturn	190
10.6	Venus	193
10.7	Mercury	198
10.8	Uranus	198
10.9	Neptune	199
10.10	Pluto (a Dwarf Planet)	200
10.11	The Voyager Missions	202
10.12	Questions	203
Chapter 11. New Worlds		204
11.1	Edmond Halley: The Stars Also Move	205
11.2	The Sun Also Orbits	206
11.3	First Planets beyond Our Solar System	207
11.4	The Search for Exoplanets	209
11.5	Search for Life beyond the Solar System	211
	<i>Bibliography</i>	215
	<i>Index</i>	217
