

CONTENTS

J. Álvarez López, X. Masa: Morphisms of pseudogroups and foliated maps	1
M. Asaoka: Codimension-one foliations with a transversely contracting flow	21
T. Asuke: On infinitesimal derivatives of the Bott class	37
A. Ayadi, H. Marzougui: Dense orbits for abelian subgroups of $GL(n, \mathbb{C})$	47
A. Biś, S. Hurder, J. Shive: Hirsch foliations in codimension greater than one	71
D. Bolotov: Extrinsic geometry of foliations on 3-manifolds	109
C. Bonatti, V. Grines, O. Pochinka: Classification of Morse-Smale diffeomorphisms with the chain of saddles on 3-manifolds	121
M. Czarnecki, P. Walczak: Extrinsic geometry of foliations	149
V. Grines, E. Zhuzhoma: Surface dynamical systems and foliations via geodesic laminations	169
T. Inaba: On rigidity of submanifolds tangent to nonintegrable distributions	203
S. D. Jung: Transversal twistor spinors on a Riemannian foliation	215
S. Kamatani, H. Kodama, T. Noda: A Birkhoff section for the Bonatti-Langevin example of Anosov flow	229
F. Kopei: A remark on a relation between foliations and number theory	245

Y. Kordyukov: Noncommutative spectral geometry of Riemannian foliations: Some results and open problems	251
T. Kuessner: A survey on simplicial volume and invariants of foliations and laminations	293
R. Langevin: Harmonic foliations of the plane, a conformal approach	315
S. Maksymenko: Consecutive shifts along orbits of vector fields	327
K. Mikami, T. Mizutani: A Lie algebroid and a Dirac structure associated to an almost Dirac structure	341
Y. Mitsumatsu: Convergence of contact structures to foliations	353
K. Richardson: Generalized equivariant index theory	373
V. Slesar: Vanishing results for spectral terms of a Riemannian foliation	389
D. Töben: The generalized Weyl group of a singular Riemannian foliation	399
T. Tsuboi: On the group of foliation preserving diffeomorphisms	411
P. Walczak: Conformally defined geometry on foliated Riemannian manifolds	431
S. Hurder: Problem Set	441
List of participants	477
Program	479
