

CONTENTS

Preface	v
Organising Committee and List of Participants	vii
I. NUCLEAR STRUCTURE	
I.1 Phenomenological Approaches	
Description of Nuclear Octupole and Quadrupole Deformation Close to the Axial Symmetry and Phase Transitions in the Octupole Mode	3
<i><u>P.G. Bizzeti</u> and A.M. Bizetti-Sona</i>	
Simultaneous Description of Four Positive and Four Negative Parity Bands	21
<i><u>A.A. Raduta</u> and C.M. Raduta</i>	
A Variational Method for Equilibrium Nuclear Shape	44
<i><u>D.N. Poenaru</u> and W. Greiner</i>	
Symmetric Three Center Shell Model	62
<i><u>R.A. Gherghescu</u> and W. Greiner</i>	
Precision Measurements with Ion Traps	78
<i>A. Jokinen</i>	
Connecting Critical Point Symmetries to the Shape/Phase Transition Region of the Interacting Boson Model	94
<i><u>D. Bonatsos</u>, E.A. McCutchan and N.V. Zamfir</i>	

X(3): An Exactly Separable γ -Rigid Version of the X(5) Critical Point Symmetry	112
<i>D. Bonatsos, D. Lenis, D. Petrellis,</i> <i>P.A. Terziev and I. Yigitoglu</i>	
Chaotic Behavior of Nuclear Systems	122
<i>J.M.G. Gómez, L. Muñoz, J. Retamosa,</i> <i>R.A. Molina, A. Relaño and E. Faleiro</i>	
Nuclear Physics for Astrophysics with Radioactive Nuclear Beams: Indirect Methods	141
<i>L. Trache</i>	
I.2 Microscopic Formalisms	
New Microscopic Approaches to the Nuclear Eigenvalue Problem	159
<i>N. Lo Iudice, F. Andreozzi, A. Porrino,</i> <i>F. Knapp and J. Kvasil</i>	
Nuclear Symmetries and Anomalies	182
<i>L. Zamick and A. Escuderos</i>	
Modern Shell-Model Calculations	200
<i>A. Covello</i>	
Nuclear Superfluidity in Exotic Nuclei and Neutron Stars	218
<i>N. Sandulescu</i>	
Beyond Mean Field Approaches and Exotic Nuclear Structure Phenomena	235
<i>A. Petrovici</i>	
Superfluid-Normal Phase Transition in Finite Systems and its Effect on Damping of Hot Giant Resonances	253
<i>N. Dinh Dang</i>	
Analysis of the Low-Lying Collective States Using the MAVA	271
<i>J. Kotila, J. Suhonen and D.S. Delion</i>	

I.3 Relativistic Nuclear Structure

- Covariant Density Functional Theory: Description of
Rare Nuclei 287
G.A. Lalazissis
- Mean-Field Description of Nuclei 319
T.J. Bürvenich

II. NUCLEAR MULTIFRAGMENTATION AND EQUATION OF STATE

- Isospin Transport in Heavy Ion Collisions and the Nuclear
Equation of State 339
M. Di Toro
- Statistical Equilibrium in a Dynamical Multifragmentation Path 357
A.H. Raduta
- The Role of Instabilities in Nuclear Fragmentation 373
V. Baran, M. Colonna and M. Di Toro
- Thermal Properties of Nuclear Systems: From Neutron Stars
to Finite Nuclei 391
F. Gulminelli
- Multifragmentation, Phase Transitions and the Nuclear
Equation of State 418
S.J. Yennello
- Transport Description of Heavy Ion Collisions and
Dynamic Fragmentation 436
H.H. Wolter
- The Nuclear Equation of State at High Densities 458
C. Fuchs

III. ALPHA DECAY, NUCLEAR REACTIONS, COLD FISSION AND NUCLEAR FUSION

Nuclear Molecular Structure	479
<i>G.G. Adamian, N.V. Antonenko, Z. Gagyi-Palffy, S.P. Ivanova, R.V. Jolos, Yu. V. Palchikov, <u>W. Scheid</u>, T.M. Shneidman and A.S. Zubov</i>	
New Spectroscopy with Cold Fission	497
<i>D.S. Delion and <u>A. Săndulescu</u></i>	
Hindrance in Deep Sub-Barrier Fusion Reactions	515
<i><u>Ș. Mișicu</u> and H. Esbensen</i>	
Questions of the Microscopical Optical Potential for Alpha-Particles at Low Energies	533
<i>M. Avrigeanu</i>	
Nuclear-Surface Effects in Pre-Equilibrium Processes	551
<i>V. Avrigeanu</i>	
Alpha Half-Time Estimates for the Superheavy Elements	569
<i>I. Silișteanu, A. Șandru, A.O. Silișteanu, B. Popovici, A. Neacșu and B.I. Ciobanu</i>	

IV. DARK MATTER, DOUBLE BETA DECAY, AND POSSIBLE MECHANISMS FOR DILEPTON PRODUCTION

Dark Matter in the Cosmos- Exploiting the Signatures of its Interaction with Nuclei	581
<i>J.D. Vergados</i>	
Neutrinos, Dark Matter and Nuclear Structure	600
<i>J. Suhonen</i>	

Probing in-Medium Vector Mesons by Dileptons at Heavy-Ion Colliders	616
<i>M.I. Krivoruchenko</i>	

Boson Mass Spectra in 331 Gauge Models with Minimal Higgs Mechanism	634
<i>I.I. Cotăescu</i>	

V. THEORETICAL AND EXPERIMENTAL RESULTS ON THE PROTON STRUCTURE

The Physics of Deep Inelastic Scattering at HERA	651
<i>C. Diaconu</i>
