

# Contents

<i>Preface</i>	ix
1. Introduction	1
2. PCF and its Operational Semantics	13
3. The Scott Model of PCF	23
3.1 Basic Domain Theory . . . . .	25
3.2 Domain Model of PCF . . . . .	32
3.3 LCF – A Logic of Computable Functionals . . . . .	34
4. Computational Adequacy	37
5. Milner’s Context Lemma	43
6. The Full Abstraction Problem	45
7. Logical Relations	51
8. Some Structural Properties of the $D_\sigma$	57
9. Solutions of Recursive Domain Equations	65
10. Characterisation of Fully Abstract Models	77

11. Sequential Domains as a Model of PCF	87
12. The Model of PCF in $\mathcal{S}$ is Fully Abstract	95
13. Computability in Domains	99
<i>Bibliography</i>	117
<i>Index</i>	119
