

CONTENTS

A Conversation with Yuan Shih Chow	v
Publications of Yuan Shih Chow	xix
Preface	xxvii
Sequential Analysis	1
Maximizing Expected Value with Two Stage Stopping Rules	3
<i>D. Assaf, L. Goldstein and E.S. Cahn</i>	
Normal Approximation for Two-Stage Winner Design	28
<i>K.K.G. Lan, Y. Soo and Z. Shun</i>	
A Restricted Minimax Determination of the Initial Sample Size in Stein's and Related Two-Stage Procedure	44
<i>J.S. Lee and M. Woodroffe</i>	
Incorporating Overrunning Data into the Analysis of Both Primary and Secondary Endpoints in a Sequential Trial	56
<i>A. Liu, C. Wu and K.F. Yu</i>	
Probability Theory	69
Central Limit Theorems for Instantaneous Filters of Linear Random Fields on Z^2	71
<i>T.-L. Cheng and H.C. Ho</i>	

A Study of Inverses of Thinned Renewal Processes <i>W.-J. Huang and C.-D. Huang</i>	85
Stochastic Games of Control and Stopping for a Linear Diffusion <i>I. Karatzas and W. Sudderth</i>	100
On Dirichlet Multinomial Distributions <i>R. W. Keener and W.B. Wu</i>	118
The Optimal Stopping Problem for S_n/n and Its Ramifications <i>T.L. Lai and Y.-C. Yao</i>	131
Bold Play and the Optimal Policy for Vardi's Casino <i>L. Shepp</i>	150
The Upper Limit of a Normalized Random Walk <i>C.-H. Zhang</i>	157
Semiparametric Statistics	169
Analysis of a Sequence of Dependent 2×2 Tables <i>S. G. Kou and Z. Ying</i>	171
A New Test of Symmetry about an Unknown Median <i>W. Miao, Y.R. Gel and J.L. Gastwirth</i>	199
The Cox Proportional Hazards Model with a Partially Known Baseline <i>M. Zhou</i>	215
Nonparametric Statistics	233
The Logistic Distribution and a Rank Test for Non-Transitivity <i>B.M. Brown, R.H. Hettmansperger and T.P. Hettmansperger</i>	235
A Note on the Consistency in Bayesian Shape-Restricted Regression with Random Bernstein Polynomials <i>I.-S. Chang, C.A. Hsiung, C.-C. Wen, and Y.-J. Wu</i>	245

A Stabilized Uniform Q-Q Plot to Detect Non-Multinormality <i>K.-T. Fang, J. Liang, F.J. Hickernell and R. Li</i>	254
Bayesian Stochastic Estimation of the Maximum of a Regression Function <i>C.-D. Fuh and I. Hu</i>	269
The L_1 -Norm Kernel Estimator of Conditional Median for Stationary Processes <i>Z. Lin and D. Li</i>	281
Statistical Applications	297
From Microstructures to Properties: Statistical Aspects of Computational Materials Science <i>C. Ji</i>	299
The Impact of Population Stratification on Commonly Used Statistical Procedures in Population-Based QTL Association Studies <i>H. Qin, H. Zhang and Z. Li</i>	311
Probability Modeling and Statistical Analysis of Standardized Test Data for Purposes of Understanding and Measuring Test Equity, Latent Ability Space Multi-Dimensionality, and Skills Diagnostic Assessment <i>W. Stout</i>	334
