

TABLE OF CONTENTS

Preface	v
Organization	vii
Keynote Lectures 1	
Limit states design based codes for geotechnical aspects of foundations in Canada D. E. Becker	3
Risk assessment in rock engineering H. H. Einstein	5
Some movements toward establishing comprehensive structural design codes based on performance-based specification concept in Japan Y. Honjo	7
Development and implementation of Eurocode 7 T. L. L. Orr	9
Invited Lectures	11
New trend toward performance-based design in the construction industry K. Horikoshi, Y. Honjo, A. Iizuka	13
Risk analysis of lining structure in large-diameter shield tunnel H. W. Huang, Q. F. Hu, Y. Y. Yang	15
Energy approach to earthquake-induced slope failures for performance-based design T. Kokusho	17
A preliminary study on load and resistance factors for foundation piles in Taiwan H. D. Lin	19
Evaluating probability of seismic landslide based on the Chi Chi's events, Taiwan M. L. Lin, C. J. Chung, M. H. Ho	21
Serviceability limit state reliability-based design K. K. Phoon	23
Eurocode 7 for geotechnical design — basic principles and implementation in the European member states B. Schuppener, R. Frank	27

Session I: Code Concept and Harmonization	29
The study and revision of the probabilistic seismic hazard map and dam safety code of Taiwan	31
C. T. Cheng, S. J. Chiou, C. T. Li, P. S. Lin, Y. B. Tsai	
A simple reliability assessment of pile design: resolving some Hong Kong challenges	33
S. R. Lo, K. S. Li, J. Lam	
Geotechnical standards in Hong Kong	35
W. K. Pun, W. M. Cheung, L. S. Lui	
Implementation of Eurocode 7-1 geotechnical design in Germany	37
N. Vogt, B. Schuppener	
Introduction to international joint study of reliability-based design for port and harbor structure	39
G. Yoon, T. Nagao, W. Lu, K. Lee, H. Kim	
Session II: Performance Oriented Geotechnical Analysis	41
Effect of lateral cyclic load on axial capacity of pile group in loose sand	43
S. Basak	
Evaluation of design methods for large-diameter bored piles	45
Florence L. F. Chu and L. M. Zhang	
Engineering problems for performance-based design of earth structures	47
Y. Honjo, M. Honda, K. Ogawa, Y. Wakatuki	
Performance-oriented risk assessment and retrofitting strategy for electricity towers on slopes	49
C. H. Wang, M. H. Chang, C. F. Chang, D. C. Wu, K. P. Hsiung	
Session III: Geotechnical Reliability Analysis	51
Equivalence between reliability and factor of safety	53
J. Y. Ching, T. R. Chen	
Bearing capacity of open ended piles in port construction in Japan	55
Y. Kikuchi	
Variance of soil parameters: some common misconceptions	57
K. S. Li, S. R. Lo	

Reliability analysis of excavation-induced building damage	59
M. J. Schuster, C. H. Juang, E. C. L. Hsiao, M. J. S. Roth, G. T. C. Kung	
Session IV: Geohazards	61
The assessment and prediction of landslides and debris flows in Ta-Chia river after Taiwan Chi-Chi earthquake	63
C. T. Cheng, Y. L. Chang, S. J. Chiu, Y. S. Lin, C. Y. Ku, S. M. Shu, J. C. Chern, S. H. Yu, S. D. Yang, C. F. Wang, C. H. Chiao, L. T. Hwang	
Predicting landslides probabilities along mountain road in Taiwan	65
J. Y. Ching, H. J. Liao	
Optimal design of sand compaction pile based on liquefaction hazard analysis	67
J. H. Hwang, C. W. Yang, C. C. Lu	
Verifications and physical interpretations of the discriminant model for evaluating liquefaction potential on SPT-N value	69
S. Y. Lai, M. J. Hsieh, W. J. Chang, P. S. Lin	
Seismic performance-based design for canal embankment	71
Y. Otake, T. Hara, T. Horikawa, Y. Ito, T. Kato, M. Hosoyamada, Y. Kasai	
Session V: Engineering Practice and Challenges	73
Observational design approaches for safe and economical deep basement construction in the urban environment	75
I. Askew, J. A. Frame, D. Sein	
The performance of laterally loaded single pile in reclaimed land	77
C. S. Chen	
Settlement calculation of large-area thick raft foundation under irregular high-rise buildings	79
J. F. Gong, X. L. Huang, D. H. Di	
Geotechnical risk assessment and performance-based evaluation of a deep excavation in the Kaohsiung MRT system project	81
B. C. Hsiung, H. Y. Chuay	
An essay on typification of verification methods used in the design procedure of geotechnical structures	83
S. Kobayashi, K. Aita, T. Fujiyama, M. Honda, T. Kaneko, A. Morikage, A. Murakami, M. Nabetani, M. Nozu	

Session VI: Geotechnical Uncertainties and Variabilities	85
Reducing performance uncertainties with monitoring data J. Y. Ching, Y. H. Hsieh	87
Evaluation of spatial variability of weathered rock for pile design S. M Dasaka, L. M. Zhang	89
Analysis of uncertainties in analytical pile design methods in South Africa M. Dithinde, K. K. Phoon, M. de Wet, J. V. Retief	91
Probabilistic uncertainties in estimating the vertical bearing resistance of piles M. Suzuki, M. Shirato, S. Nakatani, K. Matsui	95
Soil parameters used in the new design code of port facilities in Japan Y. Watabe, M. Tanaka, Y. Kikuchi	97
Taiwan Special Project Series	99
Performance design of Taipei 101 foundation D. S. Chen	101
Design and construction issues of deep foundations for the Taiwan high speed rail S. W. Duann, J. R. Chen, T. C. Su, C. T. Chin	103
Experiences from Hsuehshan tunnel constructions L. P. Shi, Y. S. Hsieh	105
Author index	107
List of past ISSMGE TC23 proceedings	109
