

CONTENTS

Preface	v
A Phenomenological 3D Model Describing Stress-Induced Solid Phase Transformations with Permanent Inelasticity <i>F. Auricchio, A. Reali and U. Stefanelli</i>	1
Numerical Analysis of a Frictionless Piezoelectric Contact Problem Arising in Viscoelasticity <i>M. Barboteu, J. R. Fernández and Y. Ouafik</i>	15
A Stabilized MITC6 Triangular Shell Element <i>L. Beirão da Veiga, D. Chapelle and I. Paris</i>	30
A New Family of C^0 Finite Elements for the Kirchhoff Plate Model <i>L. Beirão da Veiga, J. Niiranen and R. Stenberg</i>	45
Modeling and Simulation of Piezoelectric-Active Control of Wind-Induced Vibrations on Beams <i>M. Betti, C. C. Baniotopoulos and G. E. Stavroulakis</i>	61
A Numerical Library for Shells Described by the Intrinsic Geometric Modeling via the Oriented Distance Function <i>J. Cagnol and V. Sansalone</i>	76
A Contact Problem for Viscoelastic Materials with Long Memory Involving Damage <i>M. Campo, J. R. Fernández and Á. Rodríguez-Arós</i>	93
Memory Effects Arising in the Homogenization of Composites with Inclusions <i>L. Faella and S. Monsurrò</i>	107

Numerical Experiments on the Controllability of the Ginzburg–Landau Equation <i>R. Garzón and V. Valente</i>	122
Homogenization of Thin Piezoelectric Perforated Shells <i>M. Ghergu, G. Griso and B. Miara</i>	140
Damaged Support Identification in Aluminium Curtain-Walls Using Neural Networks <i>P. Nazarko, L. Ziemianski, Ch. Efstathiades, C. C. Baniotopoulos and G. E. Stavroulakis</i>	147
Mathematical Results on the Stability of Quasi-Static Paths of Elastic-Plastic Systems with Hardening <i>A. Petrov, J. A. C. Martins and M. D. P. Monteiro Marques</i>	167
Mathematical Results on the Stability of Quasi-Static Paths of Smooth Systems <i>N. V. Rebrova, J. A. C. Martins and V. A. Sobolev</i>	183
Sensitivity Analysis of Acoustic Wave Propagation in Strongly Heterogeneous Piezoelectric Composite <i>E. Rohan and B. Miara</i>	193
New Results on the Stability of Quasi-Static Paths of a Single Particle System with Coulomb Friction and Persistent Contact <i>F. Schmid, J. A. C. Martins and N. Rebrova</i>	208
Numerical Experiments on Smart Beams and Plates <i>G. E. Stavroulakis, D. G. Marinova, G. A. Foutsitzi, E. P. Hadjigeorgiou, E. C. Zacharenakis and C. C. Baniotopoulos</i>	218
On Modeling, Analytical Study and Homogenization for Smart Materials <i>A. Timofte</i>	237
The Cardiovascular System as a Smart System <i>M. Tringelová, P. Nardinocchi, L. Teresi and A. Di Carlo</i>	253
Author Index	271
