

## CONTENTS

Preface	v
Dynamical systems, stability, and chaos <i>R. Ball and P. Holmes</i>	1
Instability theory and predictability of atmospheric disturbances <i>J. S. Frederiksen</i>	29
Multiple equilibria and atmospheric blocking <i>M. J. Zidikheri, J. S. Frederiksen and T. J. O’Kane</i>	59
Coherent patterns of interannual variability of the atmospheric circulation: the role of intraseasonal variability <i>C. S. Frederiksen and X. Zheng</i>	87
Regimes of the wind-driven ocean flows <i>H. A. Dijkstra</i>	121
Nonlinear resonance and chaos in an ocean model <i>A. Kiss</i>	149
Low frequency ocean variability: feedbacks between eddies and the mean flow <i>A. McC. Hogg, W. K. Dewar, P. D. Killworth and J. R. Blundell</i>	171
Periodic motion versus turbulent motion: scaling laws, bursting and Lyapunov spectra <i>L. van Veen, S. Kida and G. Kawahara</i>	187

Maximum entropy N-particle Lagrangian clusters in turbulence and application to scalar fields	203
<i>M. S. Borgas</i>	
A review of recent investigations into high Reynolds number wall-turbulence	227
<i>J. P. Monty and M. S. Chong</i>	
What are we learning from simulating wall turbulence?	247
<i>J. Jiménez</i>	
Coherent structures generated by a synthetic jet	261
<i>J. H. Watmuff</i>	
Two-point turbulence closures revisited	281
<i>W. D. McComb</i>	
Turbulence closures and subgrid-scale parameterizations	315
<i>J. S. Frederiksen and T. J. O’Kane</i>	
Statistical dynamical methods of ensemble prediction and data assimilation during blocking	355
<i>T. J. O’Kane and J. S. Frederiksen</i>	
Distilled turbulence. A reduced model for confinement transitions in magnetic fusion plasmas	395
<i>R. Ball</i>	
Zonal flow generation by modulational instability	415
<i>R. L. Dewar and R. F. Abdullatif</i>	
Nonlinear simulation of drift wave turbulence	431
<i>R. Numata, R. Ball and R. L. Dewar</i>	
The transition to ion-temperature-gradient-driven plasma turbulence	443
<i>J. A. Krommes</i>	

Spectral transfer analysis in plasma turbulence studies	457
<i>H. Xia and M. G. Shats</i>	
Coherent structures in toroidal electron plasmas: simulation and experiments	471
<i>R. Ganesh and S. Pahari</i>
