

CONTENTS

Preface	v
Program	vi
Financial Markets with Asymmetric Information: Information Drift, Additional Utility and Entropy	1
S. Ankirchner and P. Imkeller	
A Localization of the Lévy Operators Arising in Mathematical Finances	23
M. Arisawa	
Model-free Representation of Pricing Rules as Conditional Expectations	53
S. Biagini and R. Cont	
A Class of Financial Products and Models Where Super-replication Prices are Explicit	67
L. Carassus, E. Gobet, and E. Temam	
Risky Debt and Optimal Coupon Policy and Other Optimal Strategies	85
D. Dorobantu and M. Pontier	
Affine Credit Risk Models under Incomplete Information	97
R. Frey, C. Prosdocimi, and W. J. Runggaldier	
Smooth Rough Paths and the Applications	115
K. Hara and T. Lyons	
From Access to Bypass: A Real Options Approach	127
K. Hori and K. Mizuno	
The Investment Game under Uncertainty: An Analysis of Equilibrium Values in the Presence of First or Second Mover Advantage.	151
J. Imai and T. Watanabe	
Asian Strike Options of American Type and Game Type	173
M. Ishihara and H. Kunita	
Minimal Variance Martingale Measures for Geometric Lévy Processes	193
M. Jeanblanc, S. Kloeppel, and Y. Miyahara	

Cubature on Wiener Space Continued C. Litterer and T. Lyons	197
A Remark on Impulse Control Problems with Risk-sensitive Criteria H. Nagai	219
A Convolution Approach to Multivariate Bessel Proceses T. V. Nguyen, S. Ogawa, and M. Yamazato	233
Spectral Representation of Multiply Self-decomposable Stochastic Processes and Applications N. V. Thu, T. A. Dung, D. T. Dam, and N. H. Thai	245
Stochastic Growth Models of an Isolated Economy . . . K. Nishioka	259
Numerical Approximation by Quantization for Optimization Problems in Finance under Partial Observations H. Pham	275
