

## CONTENTS

Preface	ix
Symmetry Reduction for an Inhomogeneous Nonlinear Diffusion Equation <i>M.L. Gandarias and M.S. Bruzón</i>	1
Applying a New Algorithm to Derive Nonclassical Symmetries <i>M.S. Bruzón and M.L. Gandarias</i>	7
Turbulence and Surface Gravity Waves on the Sun <i>N. Mole, R.Erdélyi and A.Kerekes</i>	13
The Linear Stability of Interfacial Solitary Waves in a Two-Layer Fluid <i>Takeshi Kataoka</i>	24
On the Transition to Diffusion Chaos in the Kuramoto–Tsuzuki Equation <i>Nikolai A. Magnitskii</i>	33
Fractional Calculus for Transport in Disordered Semiconductors <i>Vladimir V. Uchaikin and Renat T. Sibatov</i>	43
Resonant Influence of Spatial Oscillations of a Perturbation on Motion of a Nonlinear Oscillator <i>D.V. Makarov and M. Yu. Uleysky</i>	54
Chaotic Transport and Fractals in a Geophysical Jet Current <i>M.V. Budyansky and S.V. Prants</i>	62
Experiments on Pattern Formation in Reacting Systems with Chaotic Advection <i>T.H. Solomon, M.S. Paoletti and C.R. Nugent</i>	72
Properties of Chaotic Advection in a 2-Layer Model of Vortex Flow <i>D.V. Stepanov and K.V. Koshel</i>	82

Monte Carlo Simulation of Atomic Transport in a Laser Field <i>V. Yu. Argonov and S.V. Prants</i>	89
A Fuzzy Blue Sky Catastrophe <i>J.Q. Sun and Ling Hong</i>	98
Efficient and Reliable Stability Analysis of Solutions of Delay Differential Equations <i>Koen Verheyden, Tatyana Luzyanina and Dirk Roose</i>	109
Grazing Phenomena in a Harmonically Excited Oscillator with Dry-Friction on a Sinusoidally Time-Varying, Traveling Surface <i>Albert C.J. Luo, Brandon Gegg and Steve S. Suh</i>	121
Complex Dynamics in the Trajectory Control of Redundant Manipulators <i>B.M. Fernando Duarte, Maria da Graça Marcos and J.A. Tenreiro Machado</i>	134
Under-Damped Oscillator with Cross-Correlated Colored Noises Input Modulated by Periodic Signal <i>Yanfei Jin and Haiyan Hu</i>	144
A 3D Turning Model for the Interpretation of Machining Stability and Chatter <i>Steve Suh and Achala Y. Dassanayake</i>	149
Nonlinear Dynamics and Optimization of Spur Gears <i>Francesco Pellicano, Giorgio Bonori, Marcello Faggioni and Giorgio Scagliarini</i>	164
Global Bifurcation and Chaotic Behavior Research of a Truncated Conical Shallow Shell Rotating Around a Single Axle <i>Changping Chen, Liming Dai and Simon Y. Sun</i>	180

	xiii
Technology of Magnetic Flux Leakage Signal Detection Based on Scale Transformation Stochastic Resonance <i>Taiyong Wang, Shiguang Hu, Yonggang Leng, Ying Zhang and Li Zhao</i>	187
Periodic Motions and Bifurcations of Vibro-Impact Systems Near a Strong Resonance Point <i>Guanwei Luo, Yanlong Zhang, Jiangang Zhang and Jianhua Xie</i>	193
On the Nonlinear Dynamic Characteristics of Truck Rear Full-Floating Axle <i>T.N. Tongele</i>	204
Nonlinear Vibration Analysis of an Unbalanced Rotor on Rolling Element Bearings Due to Cage Run-Out <i>C. Nataraj and S.P. Harsha</i>	213
Perturbation Analysis of Nip Contact Delay System <i>L. Yuan and V.-M. Järvenpää</i>	222
Vibration Signal Analysis and Feature Extraction Based on Wavelet Energy Spectrum <i>Yongqiang Li and Jie Liu</i>	231
Experimental Analysis of Cumulants Scaling Properties in Fully Developed Intermittent Turbulence <i>Francois G. Schmitt</i>	240
Exact Solutions of a Second Grade Fluid in a Porous Medium <i>S. Islam and C.Y. Zhou</i>	247
Approximate Analytic Solutions of Stagnation-Point Flows in a Porous Medium <i>V. Kumaran and R. Tamizharasi</i>	259
Lump Solutions of 2D Generalized Gardner Equation <i>Y.A. Stepanyants, I.K. Ten and H. Tomita</i>	264

Wood Fracture Behavior Simulation Using Stochastic FEM <i>Mingbao Li, Jun Cao and Shiqiang Zheng</i>	272
A Novel Numerical Computation Based on FEM for Wood Temperature Distribution Field <i>Liping Sun, Mingbao Li and Shiqiang Zheng</i>	282
Elastic Wave Field in a Porous Medium Fully Saturated with a Newtonian Viscous Fluid <i>Liming Dai and Guoqing Wang</i>	292
Ball Bearing Remnant Life Prediction of Induction Motor – Impact Inspection Approach <i>Lanfu Luo, Liming Dai, Mingzhe Dong and Lisa Fan</i>	301
Nonlinear Airway Smooth Muscle Stiffness Changes Using Artificial Neural Network <i>A.M. Al-Jumaily, L. Chen and Y. Du</i>	308
In-Plane Free Vibrations of Compound High Speed Rotating Disks <i>Hamid R. Hamidzadeh</i>	314
Self-Excited Vibration and Stability Analyses for Axially Traveling Strings under Steady Wind Loadings <i>Yuefang Wang and Lefeng Lu</i>	322
Nonlinear Dynamical Analysis of Micro Self-Acting Gas Journal Bearing <i>Hai Huang, Guang Meng and Long Liu</i>	329
Parametric Modelling of Microresonators Dynamics with Considering Thermal Effects <i>M.A. Tadayon, H. Sayyaadi and G.N. Jazar</i>	338
Design and Analysis of General and Travelling Wave Dielectrophoresis <i>T. Kinkeldei and W.H. Li</i>	346

- Self-Propulsion of a Capsule on a Lubricated Surface Driven by Piezoelectric Actuators 353  
*Z.C. Feng*
- Decomposition-Modeling Smart Struts for Vehicle Suspension Development 365  
*Xubin Song*
- A Direct Model Reference Adaptive Control System Design and Simulation for the Vibration Suppression of a Piezoelectric Smart Structure 375  
*Tamara Nestorović Trajkov, Heinz Köppe and Ulrich Gabbert*
- A New Methodology of Modeling a Novel Large-Scale Magnetorheological Impact Damper 382  
*Yancheng Li, Jiong Wang and Linfang Qian*
- Nonlinear Characteristics of Magnetorheological Damper under Base Excitation 388  
*Yancheng Li, Jiong Wang and Linfang Qian*
- Analysis of Distributed Micro-Control Actions on Free Paraboloidal Membrane Shells 394  
*H.H. Yue, Z.Q. Deng and H.S. Tzou*
- MATLAB Simulation of Semi-Active Skyhook Control of a Quarter Car Incorporating an MR Damper and a Fuzzy Logic Controller 405  
*W.H. Li, R.S. Ujszaszi, B. Liu, X.Z. Zhang, P.B. Kosaish and X.L. Gong*
- An Effective Permeability Model to Predict Field-Dependent Modulus of Magnetorheological Elastomers 412  
*X.Z. Zhang, W.H. Li, B. Liu, P.B. Kosasih, X.L. Gong, X.C. Zhang and P.Q. Zhang*

The Simulation of Magnetorheological Elastomers Adaptive Tuned Dynamic Vibration Absorber for Automobile Engine Vibration Control <i>X.C. Zhang, X.Z. Zhang, W.H. Li, B. Liu, X.L. Gong and P.Q. Zhang</i>	418
Spatial Signal Characteristics of Shallow Paraboloidal Shell Structronic System <i>H.H. Yue, Z.Q. Deng and H.S. Tzou</i>	425
Investigation of Mechanical Characteristics of EAPap Actuator under Ambient Conditions <i>Lijie Zhao, Yuanxie Li, Heung Soo Kim, Jaehwan Kim and Chulho Yang</i>	434
On the Modeling of Ferromagnetic Shape Memory Alloy Actuators <i>H. Tan and M.H. Elahinia</i>	442
Dynamic Performance Analysis of Nonlinear Tuned Vibration Absorbers <i>Jeong-Hoi Koo, Amit Shukla and Mehdi Ahmadian</i>	454
Application of Magnetorheological Elastomer to Vibration Control <i>H.X. Deng and X.L. Gong</i>	462
Emulation and Analysis of the Response Time of the Magnetorheological Fluid Damper <i>N. Shen and J. Wang</i>	471
On Dynamic Transmitting Property of Circular Plate MR Clutch <i>Chongzhi Guo, Jiangchuan Guo, Yu Guo and Ziyang Ma</i>	476
Web-Based Traffic Noise Control Support System for Sustainable Transportation <i>Lisa Fan, Liming Dai and Anson Li</i>	484

Visual Tracking and Recognition Using Adaptive Probabilistic Appearance Manifold in Particle Filter	491
<i>Yanxia Jiang, Hongren Zhou and Zhongliang Jing</i>	
Region-Based Infrared and Visible Dynamic Image Fusion	498
<i>Bo Yang, Gang Xiao and Zhongliang Jing</i>	
Modeling of Complex Systems for Diagnosis	505
<i>Xudong W. Yu</i>	
Ada Programming for Solving Nonlinear Equations	519
<i>Trong Wu</i>	
The Study of 3-D Surface Reconstruction in Digital Image Processing	531
<i>Zhong Qu</i>
