|                                                                                                                                                      |    |
|------------------------------------------------------------------------------------------------------------------------------------------------------|----|
| <b>Section 3: Official In-Service Teacher Training System</b>                                                                                        |    |
| 3.1 How is In-Service Teacher Training Conducted in Japan?                                                                                           | 16 |
| Kazuyoshi Okubo<br><i>Hokkaido University of Education</i>                                                                                           |    |
| <b>Section 4: Mathematics Curriculum and Way of Implementation</b>                                                                                   |    |
| 4.1 How Has Mathematics Education Changed in Japan?                                                                                                  | 22 |
| Eizo Nagasaki<br><i>National Institute for Educational Policy Research of Japan</i>                                                                  |    |
| 4.2 How Have the Goals of the Mathematics Curriculum Changed?                                                                                        | 26 |
| Eizo Nagasaki<br><i>National Institute for Educational Policy Research of Japan</i>                                                                  |    |
| 4.3 How are Curriculum Standards Improved and Implemented?                                                                                           | 30 |
| Yutaka Ohara<br><i>Naruto University of Education</i>                                                                                                |    |
| 4.4 How is Each School's Mathematics Curriculum Formulated and Implemented?                                                                          | 36 |
| Shigeo Yoshikawa<br><i>Ministry of Education, Culture, Sports, Science and Technology, Japan</i>                                                     |    |
| 4.5 Teaching and Assessment Based on Teaching Guides                                                                                                 | 42 |
| Masao Tachibana<br><i>Morioka City Board of Education (previous position: Ministry of Education, Culture, Sports, Science and Technology, Japan)</i> |    |
| 4.6 Textbooks and Teaching Guides                                                                                                                    | 48 |
| Takeshi Miyakawa<br><i>University of Tsukuba</i>                                                                                                     |    |
| 4.7 What Kinds of Teaching Materials and Aids are Used in Japan?                                                                                     | 52 |
| Hiroko Tsuji<br><i>Hokkaido University of Education</i>                                                                                              |    |
| 4.8 What do Teachers and Teacher Trainees Think About Lesson Study?                                                                                  | 56 |
| Tadayuki Kishimoto<br><i>Toyama University</i>                                                                                                       |    |
| <b>Section 5: Comparisons of Features of Past International Comparative Studies</b>                                                                  |    |
| 5.1 Why Have Japanese Lessons Paid Attracted Attention and What are its Features?                                                                    | 60 |
| Hanako Senuma<br><i>National Institute for Educational Policy Research of Japan</i>                                                                  |    |

**Section 6: Understanding Japanese Mathematics****Lessons**

- 6.1 How do Japanese Teachers Explain and Structuralize Their Lessons? **64**  
 Yoshinori Shimizu  
*University of Tsukuba*
- 6.2 How do Japanese Teachers Evaluate Their Students in Their Lessons? **68**  
 Hiroyuki Ninomiya  
*Ehime University*

**Chapter 2: Methods and Types of Study Lessons****Section 1: Preparation for Lessons**

- 1.1 Annual Teaching Plan as a Plan for Nurturing Students: How should Annual Teaching Plans be Created to Impart Useful Skills and Creative Ways of Thinking? **74**  
 Yasuhiro Hosomizu  
*Attached Elementary School of University of Tsukuba*
- 1.2 Teaching Plans in which Questions Continuously Emerge: How to develop lessons in which students says, “Wow, it is really easy to calculate this way!” **78**  
 Yasuhiro Hosomizu  
*Attached Elementary School of University of Tsukuba*
- 1.3 Developing Creative Teaching Strategies Aimed at Imparting Diverse Ways of Thinking and Fostering Enjoyment of Learning **86**  
 Kozo Tsubota  
*Attached Elementary School of University of Tsukuba*

**Section 2: Unique Japanese Lesson Development****– Models and Examples**

- 2.1 The Problem-Solving Oriented Teaching Methods and Examples **92**  
 Satoshi Natusaka  
*Attached Elementary School of University of Tsukuba*
- 2.2 Discussion-Oriented Teaching Methods and Examples: Discussion-Oriented Lessons for Improving Students’ Expressive Skills **102**  
 Hiroshi Tanaka  
*Attached Elementary School of University of Tsukuba*

- 2.3 Problem-Discovery Oriented Teaching Methods and Examples: 112  
 What are Problem-Discovery Oriented Lessons?  
 Yoshikazu Yamamoto  
*Attached Elementary School of University of Tsukuba*

## Chapter 3: Trends of Research Topics in Japan Society of Mathematical Education

### Section 1: Lesson Study in Elementary Schools

- 1.1 What are the Features of Lesson Study Projects Conducted in 124  
 Elementary School Mathematics Departments?  
 Tadayuki Kishimoto  
*Toyama University*  
 Kozo Tsubota  
*Attached Elementary School of University of Tsukuba*
- 1.2 How Have the Goals of Mathematics Education Changed? 126  
 Tadayuki Kishimoto  
*Toyama University*  
 Kozo Tsubota  
*Attached Elementary School of University of Tsukuba*
- 1.3 How Have Research Trends at the Japan Society of 128  
 Mathematical Education National Conference Changed?  
 Tadayuki Kishimoto  
*Toyama University*  
 Kozo Tsubota  
*Attached Elementary School of University of Tsukuba*

### Section 2: Lesson Study in Junior High Schools

- 2.1 The Current Status of Lesson Study in Junior High Schools 130  
 Yutaka Oneda  
*Attached Elementary School of University of Tsukuba*
- 2.2 Changes in Curriculum and Class Hours in the New National 132  
 Course of Study  
 Yutaka Oneda  
*Attached Elementary School of University of Tsukuba*
- 2.3 Research Trends at the Japan Society of Mathematical 134  
 Education National Conference  
 Yutaka Oneda  
*Attached Elementary School of University of Tsukuba*

|                                                                                                                  |            |
|------------------------------------------------------------------------------------------------------------------|------------|
| <b>Section 3: Lesson Study in High Schools</b>                                                                   |            |
| 3.1 Current Status of Lesson Study in High Schools                                                               | <b>136</b> |
| Kazuhiko Murooka                                                                                                 |            |
| <i>Ochanomizu University Senior High School</i>                                                                  |            |
| 3.2 Changes in the High School Curriculum Based on the National Course of Study                                  | <b>140</b> |
| Kazuhiko Murooka                                                                                                 |            |
| <i>Ochanomizu University Senior High School</i>                                                                  |            |
