

CONTENTS

Preface	v
List of Participants	vi
Organizing Committee	ix
Integral curves for contact and Engel structures <i>J. Adachi</i>	1
On the realisation of a map of certain class as a desingularization map <i>K. Bekka, T. Fukui and S. Koike</i>	33
Hermitian pairings and isolated singularities <i>J. Hillman</i>	46
Zariski's moduli problem for plane branches and the classification of Legendre curve singularities <i>G. Ishikawa</i>	56
Introduction to algebraic theory of multivariate interpolation <i>S. Izumi</i>	85
Fundamental properties of germs of analytic mappings of an- alytic sets and related topics <i>S. Izumi</i>	109
Singularity theory of smooth mappings and its applications: A survey for non-specialists <i>S. Izumiya</i>	124

Birational geometry and homological mirror symmetry <i>L. Katzarkov</i>	176
Desingularization and equisingularity at undergraduate level <i>T.C. Kuo and L. Paunescu</i>	207
General self-similarity: An overview <i>T. Leinster</i>	232
Generalized Plücker-Teissier-Kleiman formulas for varieties with arbitrary dual defect <i>Y. Matsui and K. Takeuchi</i>	248
Derived Picard groups and automorphism groups of derived categories <i>J. Miyachi</i>	271
Analytic approach to deformation of normal isolated singularities <i>K. Miyajima</i>	279
An infinite version of homological mirror symmetry <i>A. Neeman</i>	290
Stable reduction and topological invariants of complex polynomials <i>P. Norbury</i>	299
Singularities appearing in a stable perturbation of a map-germ <i>M. Ohsumi</i>	323
Existence problem for fold maps <i>K. Sakuma</i>	342
On completely integrable first order ordinary differential equations <i>M. Takahashi</i>	388
Cyclides as surfaces which contain many circles <i>N. Takeuchi</i>	419
Euler number formulas in terms of singular fibers of stable maps <i>T. Yamamoto</i>	427
