S. P. Novikov's Preface	xi
1 <i>L. S. Pontrjagin. Smooth manifolds and their applications in homotopy theory</i> <i>(Translated by V. O. Manturov)</i>	1
Introduction	1
CHAPTER I. Smooth manifolds and their maps	3
§1. Smooth manifolds	3
§2. Embedding of a manifold into Euclidean space	12
§3. Nonproper points of smooth maps	20
§4. Non-degenerate singular points of smooth mappings	26
CHAPTER II. Framed manifolds	40
§1. Smooth approximations of continuous mappings and deformations	40
§2. The basic method	45
§3. Homology group of framed manifolds	57
§4. The suspension operation	64
CHAPTER III. The Hopf invariant	68
§1. Homotopy classification of mappings of n -manifolds to the n -sphere	68
§2. The Hopf invariant of mappings $\Sigma^{2k+1} \rightarrow \mathbf{S}^{k+1}$	74
§3. Framed manifolds with Hopf invariant equal to zero	81
CHAPTER IV. Classification of mappings $S^{n+2} \rightarrow S^n$	91
§1. The Euclidean space rotation group	91
§2. Classification of mappings $\Sigma^3 \rightarrow S^2$	99
§3. Classification of mappings from $(n+1)$ -sphere to n -sphere	105
§4. Classification of mappings $\Sigma^{(n+2)} \rightarrow S^n$	115
References	129

2 *R. Thom.* Some “global” properties of differentiable manifolds

(Translated by V. O. Manturov with M. M. Postnikov’s comments (1958))

131

Introduction	131
CHAPTER I. Properties of differentiable mappings	132
§ 1. Definitions	132
§ 2. Pre-image of a regular value	132
§ 3. Properties of the critical values set $f(\Sigma)$	134
§ 3a. Pre-image of a manifold	135
§ 4. Pre-image of a manifold under a t -regular mapping	137
§ 5. The isotopy theorem	140
CHAPTER II. Submanifolds and homology classes of a manifold	141
§ 1. Formulation of the problem	141
§ 2. The space adjoint to a subgroup of the orthogonal group	142
§ 3. The main theorem	143
§ 4. The case when G reduces to the unit element $e \in O(k)$	146
§ 5. The structure of spaces $M(O(k))$ and $M(SO(k))$	146
§ 6. The homotopy type of $M(O(k))$	151
§ 7. The space $M(O(k))$ for small k	158
§ 8. The complex $M(SO(k))$. Stationary case	162
§ 9. The space $M(SO(k))$ for small k	166
§ 10. The multiplication theorem	168
§ 11. Summary of results	172
CHAPTER III. On Steenrod’s problem	174
§ 1. Statement of the problem	174
§ 2. Definition. Manifolds associated with a given finite polyhedron K	174
§ 3. Applications. The case of modulo 2 coefficients	176
§ 4. Operations ϑ_i^p	177
§ 5. Steenrod’s powers in cohomology algebras of differentiable manifolds	180
CHAPTER IV. Cobordant differentiable manifolds	181
§ 1. Invariants of cobordism classes	183
§ 2. Differentiable mappings of manifolds with boundary	183
§ 3. L -equivalent manifold	186

§ 4. The basic theorem	192
§ 5. Modulo 2 class groups \mathfrak{N}^k	193
§ 6. Multiplicative structure of the groups \mathfrak{N}_k	195
§ 7. The groups Ω^k	199
Editor's remarks	203
References	207
3 S. P. Novikov. Homotopy properties of Thom complexes (<i>Translated by V. O. Manturov</i>)	211
Introduction	211
CHAPTER I. Thom's spaces	213
§ 1. G -framed submanifolds. L -equivalence submanifold classes	213
§ 2. Thom spaces. Classifying properties of Thom spaces	215
§ 3. Cohomology of Thom spaces modulo p , where $p > 2$	217
§ 4. Cohomology of Thom spaces modulo 2	220
§ 5. Diagonal homomorphisms	224
CHAPTER II. Inner homology rings	226
§ 1. Modules with one generator	227
§ 2. Modules over the Steenrod algebra	230
§ 3. Modules over the Steenrod algebra. The case $p = 2$	232
§ 4. Inner homology rings	235
§ 5. Characteristic numbers and the image of the Hurewicz homomorphism in Thom spaces	237
CHAPTER III. Realization of cycles	242
§ 1. Possibility of G -realization of cycles	242
References	249
4 S. Smale. Generalized Poincaré's conjecture in dimensions greater than four	251
5 S. Smale. On the structure of manifolds	269
6 D. Quillen. On the formal group laws of unoriented and complex cobordism theory	285

7	<i>V. M. Buchstaber, A. S. Mishchenko, S. P. Novikov. Formal groups and their role in algebraic topology approach</i>	293
	<i>(Translated by V. O. Manturov)</i>	
	Introduction	293
	§ 1. Formal groups	293
	§ 2. Cobordism and bordism theories	296
	§ 3. The formal group of geometrical cobordisms	301
	§ 4. Two-valued formal groups and power systems	305
	§ 5. Fixed points of periodic transformations in terms of formal groups	308
	Appendix I	313
	Appendix II	318
