

## CONTENTS

Preface	v
Organizing Committees	vii
<b>Part A PLENARY SESSION</b>	<b>1</b>
Opening Remarks: Experimental Tests of Chiral Symmetry Breaking <i>A. M. Bernstein</i>	3
$\pi\pi$ Scattering <i>H. Leutwyler</i>	17
Chiral Effective Field Theory in the $\Delta$ -resonance region <i>V. Pascalutsa</i>	30
Some Recent Developments in Chiral Perturbation Theory <i>Ulf-G. Meißner</i>	43
Chiral Extrapolation and Nucleon Structure from the Lattice <i>R. D. Young</i>	56
Recent Results from HAPPEX <i>R. Michaels</i>	65
Chiral Symmetries and Low Energy Searches for New Physics <i>M. J. Ramsey-Musolf</i>	77
Kaon Physics: Recent Experimental Progress <i>M. Moulson</i>	89

Status of the Cabibbo Angle <i>V. Cirigliano</i>	104
Lattice QCD and Nucleon Spin Structure <i>J. W. Negele</i>	116
Spin Sum Rules and Polarizabilities: Results from Jefferson Lab <i>J-P. Chen</i>	126
Compton Scattering and Nucleon Polarisabilities <i>Judith A. McGovern</i>	138
Virtual Compton scattering at MIT-bates <i>R. Miskimen</i>	148
Physics Results from the BLAST Detector at the BATES Accelerator <i>R. P. Redwine</i>	158
The $\pi NN$ system — recent progress <i>C. Hanhart</i>	170
Application of Chiral Nuclear Forces to Light Nuclei <i>A. Nogga</i>	182
New Results on Few-Body Experiments at Low Energy <i>Y. Nagai</i>	194
Few-Body Lattice Calculations <i>M. J. Savage</i>	207
Research Opportunities at the Upgraded HI $\gamma$ S Facility <i>H. R. Weller</i>	219
<b>Part B GOLDSTONE BOSON DYNAMICS</b>	<b>231</b>
Working Group Summary: Goldstone Boson Dynamics <i>G. Colangelo and S. Giovannella</i>	233

Recent results on radiative Kaon decays from NA48 and NA48/2 <i>S. G. López</i>	246
Cusps in $K \rightarrow 3\pi$ Decays <i>B. Kubis</i>	248
Recent KTeV Results on Radiative Kaon Decays <i>M. C. Ronquest</i>	250
The $\pi\pi$ Scattering Amplitude <i>J. R. Peláez</i>	252
Determination of the Regge Parameters in the $\pi\pi$ Scattering Amplitude <i>I. Caprini</i>	254
$e^+e^-$ Hadronic Cross Section Measurement at DAΦNE with the KLOE Detector <i>P. Beltrame</i>	256
Measurement of the form factors of $e^+e^- \rightarrow 2(\pi^+\pi^-)$ , $p\bar{p}$ and the resonant parameters of the heavy charmonia at BES. <i>H. Hu</i>	259
Measurement of $e^+e^-$ Multihadronic Cross Sections Below 4.5 GeV with BABAR <i>A. Denig</i>	261
The Pion Vector Form-Factor and $(g - 2)_\mu$ <i>C. Smith</i>	265
Partially Quenched CHPT Results to Two Loops <i>J. Bijnens</i>	268
Pion-Pion Scattering with Mixed Action Lattice QCD <i>P. F. Bedaque</i>	270
Meson Systems with Ginsparg-Wilson Valence Quarks <i>A. Walker-Loud</i>	272

Low Energy Constants from the MILC Collaboration <i>C. Bernard</i>	275
Finite Volume Effects: Lattice Meets CHPT <i>G. Schierholz</i>	277
Lattice QCD simulations with two light dynamical (Wilson) quarks <i>L. Giusti</i>	279
Do we understand the low-energy constant $L_8$ ? <i>M. Golterman</i>	280
Quark mass dependence of LECs in the two-flavour sector <i>M. Schmid</i>	282
Progress Report on the $\pi^0$ Lifetime Experiment (PRIMEX) at JLab <i>D. E. McNulty</i>	284
Determination of Charged Pion Polarizabilities <i>L. V. Fil'kov</i>	286
Proposed Measurements of Electroproduction of $\pi^0$ near Threshold using a Large Acceptance Spectrometer <i>R. A. Lindgren</i>	288
The $\kappa$ Meson in $\pi K$ Scattering <i>B. Moussallam</i>	291
Strangeness $-1$ Meson-Baryon Scattering in S-wave <i>J. A. Oller</i>	293
Results on light mesons decays and Dynamics at KLOE <i>M. Martini</i>	295
Studies of Decays of $\eta$ and $\eta'$ Mesons with WASA Detector <i>A. Kupsc</i>	297
Heavy Quark-Diquark Symmetry and $\chi$ PT for Doubly Heavy Baryons <i>T. Mehen</i>	299

HHChPT Applied to the Charmed-Strange Parity Partners <i>R. P. Springer</i>	302
Study of Pion Structure Through Precise Measurements of the $\pi^+ \rightarrow e^+ \nu \gamma$ Decay <i>D. Počanić</i>	304
Exceptional and non-exceptional contributions to the radiative $\pi$ decay <i>V. Mateu</i>	306
Leading chiral logarithms from unitarity, analyticity and the Roy equations <i>A. Fuhrer</i>	308
All orders symmetric subtraction of the nonlinear sigma model in D=4 <i>A. Quadri</i>	310
<b>Part C CHIRAL DYNAMICS IN FEW-NUCLEON SYSTEMS</b>	<b>313</b>
Working Group Summary: Chiral Dynamics in Few-Nucleon Systems <i>H.-W. Hammer, N. Kalantar-Nayestanaki, and D. R. Phillips</i>	315
Power Counting in Nuclear Chiral Effective Field Theory <i>U. van Kolck</i>	330
On the Consistency of Weinberg's Power Counting <i>U-G. Meißner</i>	332
Renormalization of Singular Potentials and Power Counting <i>M. P. Valderrama</i>	334
The Challenge of Calculating Baryon-Baryon Scattering from Lattice QCD <i>S. R. Beane</i>	337

Precise Absolute np Scattering Cross Section and the Charged $\pi$ NN Coupling Constant <i>S. E. Vigdor</i>	339
Probing Hadronic Parity Violation Using Few Nucleon Systems <i>S. A. Page</i>	342
Extracting the Neutron-Neutron Scattering Length from Neutron-Deuteron Breakup <i>C. R. Howell</i>	344
Extraction of $a_{nn}$ from $\pi^- d \rightarrow nn\gamma$ <i>A. Gårdestig</i>	346
The Three- and Four-Body System with Large Scattering Length <i>L. Platter</i>	348
3N and 4N Systems and the $A_y$ Puzzle <i>T. Clegg</i>	350
Recent Progress in Nuclear Lattice Simulations with Effective Field Theory <i>D. Lee</i>	353
Few-Body Studies at KVI <i>J. G. Messchendorp</i>	355
Results of Three Nucleon Experiments from RIKEN <i>K. Sekiguchi</i>	357
A New Opportunity to Measure the Total Photoabsorption Cross Section of Helium <i>P. T. Debevec</i>	359
Three-Body Photodisintegration of ${}^3\text{He}$ with Double Polarizations <i>X. Zong</i>	363
Large two-pion-exchange contributions to the $pp \rightarrow pp\pi^0$ reaction <i>F. Myhrer</i>	365

Towards a Systematic Theory of Nuclear Forces <i>E. Epelbaum</i>	367
<i>Ab Initio</i> Calculations of Electromagnetic Reactions in Light Nuclei <i>W. Leidemann</i>	369
Electron Scattering from a Polarized Deuterium Target at BLAST <i>R. Fatemi</i>	371
Neutron–Neutron Scattering Length From the Reaction $\gamma d \rightarrow \pi^+ nn$ <i>V. Lensky</i>	374
Renormalization Group Analysis of Nuclear Current Operators <i>S. X. Nakamura</i>	376
Recent Results and Future Plans at MAX-LAB <i>K. G. Fissum</i>	378
Nucleon Polarizabilities from Deuteron Compton Scattering, and Its Lessons for Chiral Power Counting <i>H. W. Griefhammer</i>	380
Compton Scattering on HE-3 <i>D. Choudhury</i>	382
<b>Part D HADRON STRUCTURE AND MESON-BARYON INTERACTIONS</b>	<b>385</b>
Summary of the Working Group on Hadron Structure and Meson-Baryon Interactions <i>G. Feldman and T.R. Hemmert</i>	387
Finite Volume Effects: Lattice Meets CHPT <i>G. Schierholz</i>	396
Lattice Discretization Errors in Chiral Effective Field Theories <i>B. C. Tiburzi</i>	398

SU(3)-breaking effects in hyperon semileptonic decays from lattice QCD <i>S. Simula</i>	400
Uncertainty Bands for Chiral Extrapolations <i>B. U. Musch</i>	402
Update of the Nucleon Electromagnetic Form Factors <i>C. B. Crawford</i>	404
N and N to $\Delta$ Transition Form Factors From Lattice QCD <i>C. Alexandrou</i>	406
The $\gamma^*N \rightarrow \Delta$ Transition at Low $Q^2$ and the Pionic Contribution <i>S. Stave</i>	409
Strange Quark CoNtributions to the Form Factors of the Nucleon <i>F. Benmokhtar</i>	411
Dynamical Polarizabilities of the Nucleon <i>B. Pasquini</i>	413
Hadron magnetic moments and polarizabilities in lattice QCD <i>F. X. Lee</i>	415
Spin-dependent Compton scattering from $^3\text{He}$ and the neutron spin polarizabilities <i>H. Gao</i>	417
Chiral Dynamics from Dyson-Schwinger Equations <i>C. D. Roberts</i>	420
Radiative neutron $\beta$ -decay in effective field theory <i>S. Gardner</i>	423
Comparison between different renormalization schemes for covariant BChPT <i>T.A. Gail</i>	426

Non-Perturbative Study of the Light Pseudoscalar Masses in Chiral Dynamics	429
<i>José Antonio Oller</i>	
Masses and Widths of Hadrons in Nuclear Matter	431
<i>M. Kotulla</i>	
Chiral Effective Field Theory at Finite Density	433
<i>R. J. Furnstahl</i>	
The $\bar{K}$ -Nuclear Interaction: A Search For Deeply Bound $\bar{K}$ -Nuclear Clusters	436
<i>P. Camerini</i>	
Moments of GPDs from Lattice QCD	438
<i>D. G. Richards</i>	
Generalized Parton Distributions in Effective Field Theory	441
<i>J-W. Chen</i>	
Near-Threshold Pion Production: Experimental Update	443
<i>M. W. Ahmed</i>	
Pion Photoproduction Near Threshold Theory Update	446
<i>L. Tiator</i>	
Author Index	455
