

CONTENTS

Preface	v
Organizing Committees	vii
A Stability Criterion for Delay Differential Equations with Impulse Effects	1
<i>J.O. Alzabut</i>	
On the Use of Korn's Type Inequalities in the Existence Theory for Cosserat Elastic Surfaces with Voids	11
<i>M. Bîrsan</i>	
Time Periodic Viscosity Solutions of Hamilton–Jacobi Equations	21
<i>M. Bostan and G. Namah</i>	
A Viability Result for Semilinear Reaction-diffusion Systems	31
<i>M. Burlică and D. Roşu</i>	
Necessary Optimality Conditions for Hyperbolic Discrete Inclusions	45
<i>A. Cernea</i>	
Controllability of Damped Second-Order Initial Value Problem for a Class of Differential Inclusions with Nonlocal Conditions on Noncompact Intervals	55
<i>D.N. Chalishajar</i>	
Averaging of Evolution Inclusions in Banach Spaces	69
<i>T. Donchev</i>	
Influence of Variable Permeability on Vortex Instability of a Horizontal Combined Free and Mixed Convection Flow in a Saturated Porous Medium	79
<i>A.M. Elaiw, F.S. Ibrahim and A.A. Bakr</i>	

Analyticity of Stable Invariant Manifolds for Ginzburg–Landau Equation	93
<i>A. V. Fursikov</i>	
Approximate Solutions for Non-linear Autonomous ODEs on the Basis of PWL Approximation Theory	113
<i>A.G. Garcia, S.I. Biagiola, J.L. Figueroa, O.E. Agamennoni and L.S. Castro</i>	
On the Influence of a Subquadratic Convection Term in Singular Elliptic Problems	127
<i>M. Ghergu and V. Rădulescu</i>	
Existence and Uniqueness Results in the Micropolar Mixture Theory of Porous Media	139
<i>I.-D. Ghiba</i>	
Approximate Controllability for Linear Stochastic Differential Equations with Control Acting on the Noise	153
<i>D. Goreac</i>	
Numerical Solutions of Two-point Boundary Value Problems for Ordinary Differential Equations Using Particular Newton Interpolating Series	165
<i>G. Groza and N. Pop</i>	
On the Integral and Asymptotic Representation of Singular Solutions of Elliptic Boundary Value Problems Near Components of Small Dimensions of Boundary	177
<i>N. Jitaraşu</i>	
An Existence Result for a Class of Nonlinear Differential Systems	185
<i>R. Luca-Tudorache</i>	
Well-posedness for a Non-autonomous Model of Fast Diffusion	199
<i>G. Marinoschi</i>	

Backward Stochastic Generalized Variational Inequality <i>L. Maticiuc and A. Răşcanu</i>	217
Trichotomy for Linear Skew-product Semiflows <i>M. Megan, C. Stoica and L. Buliga</i>	227
Feedback Control of Constrained Parabolic Systems in Uncertainty Conditions via Asymmetric Games <i>B.S. Mordukhovich and T.I. Seidman</i>	237
Implicit Parallel Solvers in Computational Electrocardiology <i>M. Munteanu and L.F. Pavarino</i>	255
Fan's Inequality in the Context of M_P -Convexity <i>C.P. Niculescu and I. Roventă</i>	267
Range Condition in Optimization and Optimal Control <i>N.H. Pavel</i>	275
Limits of Solutions to the Initial Boundary Dirichlet Problem for Semilinear Hyperbolic Equation with Small Parameter <i>A. Perjan</i>	281
Well-posedness of the Fixed Point Problem for Multivalued Operators <i>A. Petruşel and I.A. Rus</i>	295
Some Remarks on a Nonlinear Semigroup Acting on Positive Measures <i>E. Popa</i>	307
Integral Inclusions in Banach Spaces Using Henstock-Type Integrals <i>B. Satco</i>	319
Good Intermediate-rank Lattice Rules Based on the Weighted Star Discrepancy <i>V. Sinescu and S. Joe</i>	329

On the Minimum Energy Problem for Linear Systems in Hilbert Spaces	343
<i>A.I. Vieru</i>	
Author Index	351
