

## Contents

<i>Preface</i>	vii
Boris Rozovskii	ix
Publications of B. L. Rozovskii	xi
1. Stochastic Evolution Equations	1
<i>N. V. Krylov and B. L. Rozovskii</i>	
2. Predictability of the Burgers Dynamics Under Model Uncertainty	71
<i>D. Blömker and J. Duan</i>	
3. Asymptotics for the Space-Time Wigner Transform with Applications to Imaging	91
<i>L. Borcea, G. Papanicolaou, and C. Tsogka</i>	
4. The Korteweg-de Vries Equation with Multiplicative Homogeneous Noise	113
<i>A. de Bouard and A. Debussche</i>	
5. On Stochastic Burgers Equation Driven by a Fractional Laplacian and Space-Time White Noise	135
<i>Z. Brzeźniak and L. Debbi</i>	
6. Stochastic Control Methods for the Problem of Optimal Compensation of Executives	169
<i>A. Cadenillas, J. Cvitanić, and F. Zapatero</i>	

7.	The Freidlin-Wentzell LDP with Rapidly Growing Coefficients <i>P. Chigansky and R. Liptser</i>	197
8.	On the Convergence Rates of a General Class of Weak Approximations of SDEs <i>D. Crisan and S. Ghazali</i>	221
9.	Flow Properties of Differential Equations Driven by Fractional Brownian Motion <i>L. Decreusefond and D. Nualart</i>	249
10.	Regularity of Transition Semigroups Associated to a 3D Stochastic Navier-Stokes Equation <i>F. Flandoli and M. Romito</i>	263
11.	Rate of Convergence of Implicit Approximations for Stochastic Evolution Equations <i>I. Gyöngy and A. Millet</i>	281
12.	Maximum Principle for SPDEs and Its Applications <i>N. V. Krylov</i>	311
13.	On Delay Estimation and Testing for Diffusion Type Processes <i>Yu. A. Kutoyants</i>	339
14.	On Cauchy-Dirichlet Problem for Linear Integro-Differential Equation in Weighted Sobolev Spaces <i>R. Mikulevicius and H. Pragarauskas</i>	357
15.	Strict Solutions of Kolmogorov Equations in Hilbert Spaces and Applications <i>G. Da Prato</i>	375
	<i>Author Index</i>	391
	<i>Subject Index</i>	393
