

CONTENTS

Preface		v
Contributors		xiii
Chapter 1	Scale-Free Networks in Biology <i>Eivind Almaas, Alexei Vázquez and Albert-László Barabási</i>	1
Chapter 2	Modularity in Biological Networks <i>Ricard V. Solé, Sergi Valverde and Carlos Rodriguez-Caso</i>	21
Chapter 3	Inference of Biological Regulatory Networks: Machine Learning Approaches <i>Florence d'Alché-Buc</i>	41
Chapter 4	Transcriptional Networks <i>François Képès</i>	83
Chapter 5	Protein Interaction Networks <i>Kai Tan and Trey Ideker</i>	133
Chapter 6	Metabolic Networks <i>David A. Fell</i>	163
Chapter 7	Heterogeneous Molecular Networks <i>Vincent Schächter</i>	199
Chapter 8	Evolution of Regulatory Networks <i>Amélie Veron, Dion Whitehead and Erich Bornberg-Bauer</i>	257

Chapter 9	Complexity in Neuronal Networks <i>Yves Frégnac, Michelle Rudolph, Andrew P. Davison and Alain Destexhe</i>	291
Chapter 10	Networks of the Immune System <i>Robin E. Callard and Jaroslav Stark</i>	341
Chapter 11	A History of the Study of Ecological Networks <i>Louis-Félix Bersier</i>	365
Chapter 12	Dynamic Network Models of Ecological Diversity, Complexity, and Nonlinear Persistence <i>Richard J. Williams and Neo D. Martinez</i>	423
Chapter 13	Infection Transmission through Networks <i>James S. Koopman</i>	449
Index		507
