

CONTENTS

Preface	v
Generalized Riemann Problems: From the Scalar Equation to Multidimensional Fluid Dynamics <i>M. Ben-Artzi and J. Falcovitz</i>	1
Some Observations on a Multiscale Finite Element Method for Problems with Variables Separated Coefficients <i>S. Jiang and Y.-Q. Huang</i>	50
A Finite Element Method for the Simulation of a Liquid Droplet Impinging on a Solid Surface <i>S. Ganesan and L. Tobiska</i>	65
Applications of Moving Mesh Methods to the Fourier Spectral Approximations of Phase-Field Equations <i>P. Yu, L. Q. Chen and Q. Du</i>	80
On the Comparison of Evolution Galerkin and Discontinuous Galerkin Schemes <i>K. Baumbach and M. Lukáčová-Medviďová</i>	100
Time-Domain Finite Element Methods for Maxwell's Equations in Dispersive Media: A Review <i>J. Li and Y. Chen</i>	116
Superconvergence and <i>A Posteriori</i> Error Estimates of Nonconforming FEM for Boundary Control Governed by Stokes Equations <i>H. Liu and N. Yan</i>	133

Optimal Superconvergent One Step Quadratic Spline Collocation Methods for Helmholtz Problems <i>B. Bialecki, G. Fairweather, A. Karageorghis and Q. N. Nguyen</i>	156
Some Progress on Superconvergence for Mixed Finite Element Methods <i>S. Jia, H. Xie and X. Yin</i>	175
Convergence of Green Iterations for Schrödinger Equations <i>M. J. Mohlenkamp and T. Young</i>	201
Convolution and Wiener Amalgam Spaces on the Affine Group <i>C. Heil and G. Kutyniok</i>	209
An Approximation Formula in Hilbert Space <i>Z. Zhang and N. Saito</i>	218
The Gibbs Phenomenon: A Digression in Wavelet Hybrid Sampling Series <i>X. A. Shen</i>	228
A Unified Framework for Segmentation-Assisted Image Registration <i>J. Liu and W. Yang</i>	243
Geometric Hermite Interpolation with Pythagorean Hodograph Cubics <i>X.-A. Han, Y.-C. Ma and H.-Y. Sun</i>	255
Shape Gradient for the Stokes Flow by Differentiability of a Saddle Point <i>Z. Gao and Y. Ma</i>	261
Numerical Simulation of Flow Over Two Rotating Self-Moving Circular Cylinders <i>S. Sungnul and N. P. Moshkin</i>	278

A Note on PPT Forms and Separability of Multipartite States <i>X.-H. Wang, S.-M. Fei and K. Wu</i>	297
A Structured Data Least Squares Algorithm and Its Application in Digital Filtering <i>H. Guo and R. Renaut</i>	304
Short Implementation of Bisection in Matlab <i>L. Chen</i>	318
An Improved Iterative Regularization Based on Varying the Singular Values of the Regularization Operator <i>R. Zhang, Y.-C. Ma and X.-B. Duan</i>	333
Linear Algebra: A Happy Chance to Apply Mathematics <i>G. Strang</i>	346
Calculus's Accuracy <i>Q. Lin</i>	357
Teaching of Mathematics at Various Levels in an International University-System, and Connections to Research and to Current Trends in Technology <i>P. Jorgensen</i>	371
Author Index	381
