

Contents

<i>Preface</i>	v
1 A Note on Finitely Generated Semigroups of Regular Languages <i>S. Afonin and E. Khazova</i>	1
2 Complete Reducibility of Pseudovarieties <i>J. Almeida, J. C. Costa and M. Zeitoun</i>	9
3 Finite Generation of P-semigroups with Almost G-invariant Idempotents <i>C. A. Carvalho</i>	26
4 Open Problems on Regular Languages: A Historical Perspective <i>L. Chaubard and J.-É. Pin</i>	39
5 Solving Systems of Equations Modulo Pseudovarieties of Abelian Groups and Hyperdecidability <i>M. Delgado, A. Masuda and B. Steinberg</i>	57
6 Finite Residue Class Rings of Integers Modulo n from the Viewpoint of Global Semigroup Theory <i>A. Egri-Nagy and C. L. Nehaniv</i>	66
7 A P-theorem for Ordered Groupoids <i>N. D. Gilbert</i>	84
8 On the Finite Basis Problem for the Monoids of Extensive Transformations <i>I. A. Goldberg</i>	101
9 A Freiheitssatz for Subsemigroups of One-relator Groups with Small Cancellation Condition <i>A. Juhász</i>	111
10 Wreath Product Decompositions for Triangular Matrix Semigroups <i>M. Kambites and B. Steinberg</i>	129
11 In McAlister's Footsteps: A Random Ramble around the P-theorem <i>M. V. Lawson and S. W. Margolis</i>	145

12	On the Structure of the Lattice of Combinatorial Rees–Sushkevich Varieties	
	<i>E. W. H. Lee and M. V. Volkov</i>	164
13	On Trivializers and Subsemigroups	
	<i>A. Malheiro</i>	188
14	Semilattice Ordered Inverse Semigroups	
	<i>D. B. McAlister</i>	205
15	Isomorphism Problems for Transformation Semigroups	
	<i>S. Mendes-Gonçalves</i>	219
16	On McAlister’s Monoid and Its Contracted Algebra	
	<i>W. D. Munn</i>	230
17	Relative Monoid Presentations and Finite Derivation Type	
	<i>F. Otto</i>	240
18	Literal Varieties and Pseudovarieties of Homomorphisms onto Abelian Groups	
	<i>L. Polák</i>	255
19	Factorizability in Certain Classes over Inverse Semigroups	
	<i>M. B. Szendrei</i>	266
