

## CONTENTS

<b>Contributors</b>	ix
<b>Preface</b>	xvii
<b>Acknowledgments</b>	xix
<b>SECTION I: INTRODUCTORY CHAPTERS</b>	
<b>Chapter 1:</b> Overview	3
<i>Shu Chien</i>	
<b>Chapter 2:</b> Perspectives of Biomechanics	13
<i>Yuan-Cheng B. Fung and Wei Huang</i>	
<b>SECTION II: CARDIOVASCULAR BIOENGINEERING</b>	
<b>Chapter 3:</b> Cardiac Electromechanics in the Healthy Heart	37
<i>Roy C. P. Kerckhoffs and Andrew D. McCulloch</i>	
<b>Chapter 4:</b> Cardiac Biomechanics and Disease	53
<i>Jeffrey H. Omens</i>	
<b>Chapter 5:</b> Bioengineering Solutions for the Treatment of Heart Failure	69
<i>John T. Watson and Shu Chien</i>	
<b>Chapter 6:</b> Molecular Basis of Modulation of Vascular Functions by Mechanical Forces	79
<i>Shu Chien</i>	
<b>Chapter 7:</b> Autoregulation of Blood Flow: Examining the Process of Scientific Discovery	99
<i>Paul C. Johnson</i>	
<b>SECTION III: BLOOD CELL BIOENGINEERING</b>	
<b>Chapter 8:</b> Molecular Basis of Cell and Membrane Mechanics	117
<i>Lanping Amy Sung</i>	
<b>Chapter 9:</b> Cell Activation in the Circulation: The Auto-Digestion Hypothesis	131
<i>Geert W. Schmid-Schönbein</i>	

- Chapter 10:** Blood Substitutes and the Design of Oxygen Non-Carrying and Carrying Fluids 149

*Marcos Intaglietta*

**SECTION IV: RESPIRATORY-RENAL BIOENGINEERING**

- Chapter 11:** Analysis of Human Pulmonary Circulation: A Bioengineering Approach 163

*Wei Huang, Michael R. T. Yen and Qinlian Zhou*

- Chapter 12:** Pulmonary Gas Exchange 181

*Peter D. Wagner*

- Chapter 13:** Engineering Approaches to Understanding the Kidney 209

*Scott C. Thomson*

**SECTION V: TISSUE ENGINEERING AND REGENERATIVE MEDICINE**

- Chapter 14:** Skeletal Muscle Tissue Bioengineering 225

*Richard L. Lieber and Samuel R. Ward*

- Chapter 15:** Multi-Scale Biomechanics of Articular Cartilage 243

*Won C. Bae and Robert L. Sah*

- Chapter 16:** Design and Development of an *In Vivo* Force-Sensing Knee Prosthesis 261

*Darryl D. D'Lima and Peter C. Y. Chen*

- Chapter 17:** The Implantable Glucose Sensor in Diabetes: A Bioengineering Case Study 279

*David A. Gough*

- Chapter 18:** Stem Cells in Regenerative Medicine 291

*Shu Chien and Lawrence S. B. Goldstein*

**SECTION VI: NANOSCIENCE AND NANOTECHNOLOGY**

- Chapter 19:** Engineering Compounds Targeted to Vascular Zip Codes 313

*Erkki Ruoslahti*

---

<b>Chapter 20:</b> The Structure of the Central Nervous System and Nanoengineering Approaches for Studying and Repairing It	327
<i>Gabriel A. Silva</i>	
<b>Chapter 21:</b> Cellular Biophotonics: Laser Scissors (Ablation)	353
<i>Michael W. Berns</i>	
<b>Chapter 22:</b> Microelectronic Arrays: Applications from DNA Hybridization Diagnostics to Directed Self-Assembly Nanofabrication	369
<i>Michael J. Heller and Dietrich Dehlinger</i>	
<b>SECTION VII: GENOMIC ENGINEERING AND SYSTEMS BIOLOGY</b>	
<b>Chapter 23:</b> Systems Biology: A Four-Step Process	387
<i>Jennifer L. Reed and Bernhard O. Palsson</i>	
<b>Chapter 24:</b> Bioinformatics and Systems Biology: Obtaining the Design Principles of Living Systems	401
<i>Shankar Subramaniam</i>	
<b>Chapter 25:</b> Synthetic Biology: Bioengineering at the Genomic Level	427
<i>Natalie Ostroff, Mike Ferry, Scott Cookson, Tracy Johnson and Jeff Hasty</i>	
<b>Chapter 26:</b> Network Genomics	453
<i>Trey Ideker</i>	
<b>Chapter 27:</b> Genomes, Genomic Technologies and Medicine	473
<i>Xiaohua Huang</i>	
<b>SECTION VIII: SOCIO-ECONOMICAL ASPECTS OF BIOENGINEERING</b>	
<b>Chapter 28:</b> Ethics for Bioengineers	489
<i>Michael Kalichman</i>	
<b>Chapter 29:</b> Opportunities and Challenges in Bioengineering Entrepreneurship	507
<i>Jen-Shih Lee</i>	
<b>Chapter 30:</b> How to Move Medical Devices from Bench to Bedside	521
<i>Paul Citron</i>	
<b>Index</b>	533
