

# Contents

Chapter 1	The Jade Mountain	1
Chapter 2	What are Models?	11
	Kinds of Models	13
	Models as Abstract Images	20
	Why Build Models?	25
	Simulations as Models in Motion	30
Chapter 3	The Modeling Process	37
	Identification of Systems	39
	Boundary Conditions and Interfaces	42
	System Analysis I: Find System Components	46
	System Analysis II: State Variables and Transformations	50
	Simulation Management: A Digression	57
	Model Synthesis: Implementing, Verifying, Validating	59
	Summary: The Modeling Paradigm	62
Chapter 4	An Object-Oriented Universe	66
	Modeling Through Object-Oriented Languages	68
	Class Patterns	78
	The Categories of Object-Oriented Reason	79
	Cellular Automata as Micro-Objects	83

Chapter 5	The Crossroads of Theory and Experiment	89
	Models and the Synthesis of Data and Theory	92
	Induction, Deduction, and the Socrates File	98
	The Limits of Empiricism, Or, Will the Sun Rise Tomorrow?	102
	Summary: Modeling, Simulation, and the Dynamic of Discovery	108
Chapter 6	Modeling the Appearances	110
	Observables for Celestial Mechanics	112
	Ptolemy and the Circular Motions of the Heavens	114
	From Ptolemy to Copernicus	120
	Kepler, Galileo, and the Extension of the Heliocentric Model	124
	Newton Completes the Classical Model	128
	Extending the Newtonian Picture: The Discovery of Neptune	130
	Einstein's Theory of Relativity and the Precession of Mercury's Perihelion	132
	Summary: How Models Progress	134
Chapter 7	Laplace's Mirage, or the Impossibility of the Exact Calculation of the World	138
	Intrinsic Limitations of Models and the "Categories"	141
	Extrinsic Limitations	152
	Reductionism, Determinism, and Reality	156
	Between Order and Randomness: Chaotic Systems	163
	Summary: Laplace Humbled, but Not Destroyed	165
Chapter 8	Climates of Fact	167
	Climate and Conceptual Models	169
	Towards a More Detailed Model	174
	Global Circulation Models	185
	Validation and Climate Change	190

Chapter 9	Calculating War and Peace	202
	Population Modeling	203
	Predator-Prey Cycles	209
	Why do Population Models Work?	212
	Social and Economic Analogies	215
Chapter 10	From the Past into the Future: Is Historical Simulation Possible?	220
	Through the Lens of the Modeling Paradigm	221
	Historical Order as Natural Order?	223
	Not Nature, but Culture	230
	Theory versus History: The Problem of the Indeterminate and the Singular	234
	Summary and a Modeling Thought-Experiment	237
Chapter 11	Virtual Reality ... and Reality	240
	The Interactive Image	243
	Fictions, Simulations, and Cyberspace	247
	Seeing is Believing?	248
	Virtual Bodies	251
	The Real and the Objective	253
	Summary: The Mixed Success of VR	256
	Notes and References	258
	Index	273
