

CONTENTS

Preface	v
Cooperative Robotic System Using Distributed Decision Mechanisms with Deliberative Central Supervisor <i>Julien Beaudry, Richard Hurteau and Richard Gourdeau</i>	1
Localization of Compact Invariant Sets of the Rikitake System and Pikovsky-Rabinovich-Traktengertz System <i>K.E. Starkov and L.E. Vargas</i>	11
Stabilization of Linear Systems: A Polynomial Approach <i>B. Aguirre, J. Solis-Daun and R. Suárez</i>	21
Modelling of an Electrically Powered Helicopter Prototype <i>J.G. Benítez-Morales, R. Castro-Linares and E. Liceaga-Castro</i>	29
Timoshenko Beam Theory Based Mathematical Modelling of a Lightweight Flexible Link Robot Manipulator <i>Malik Loudini, Djamel Boukhetala and Mohamed Tadjine</i>	37
A New Approach for Modeling, Simulation and Control of Complex Electromechanical Systems: The Computational Mechatronics Scheme <i>L.-I. Lugo-Villeda, V. Parra-Vega and G. Nuñez-Esquer</i>	47
A Composite Approach to the Adaptive Neural Networks Control of Unknown Flexible Joint Robots <i>Han Yao, Wenfang Xie and Cang Ye</i>	57
Characterization of Rate Dependent Hysteresis <i>M. Al Janaideh, C.-Y. Su and S. Rakheja</i>	67
Modeling the Torque-Speed Hysteresis Behavior of an Ultrasonic Motor <i>Carlos C. Cuevas Gutiérrez, S. Rakheja and C.-Y. Su</i>	77
Modelling and Experimentation the Accreting Medium in the 1d Semi-Infinite Moving Solid for Heat Transfer with a Novel Control Volume Conductance Method <i>Luis Del Llano Vizcaya and Alejandro Castañeda-Miranda</i>	87
A Novel Hybrid Representation and Control of Convective Spatially Distributed Systems <i>J.P. García-Sandoval, B. Castillo-Toledo and V. González-Álvarez</i>	96

A Test-Based Methodology for Parameter Estimation for a Pilot Plant Distillation Column <i>C. Astorga, A. Santiago, F. López, V.M. Alvarado, A. Hernández and D. Juárez</i>	106
Performance Monitoring of Heat Exchangers Using Adaptive Observers <i>C.-M. Astorga, A. Santiago, R.-M. Méndez and A. Zavala</i>	116
Verification of Neurofuzzy Speed Control Tuning for a Combustion Turbogenerator <i>Luis Castelo-Cuevas and Raul Garduno-Ramirez</i>	124
Stable PID Controller Design via Parallel Feedforward Compensator <i>Zenta Iwai, Ikuro Mizumoto, Yuichi Nakashima and Masanori Takahashi</i>	136
The Partial Linearization Method for Tracking the Time-Variant Reference Function <i>Tomohiro Henmi, Mingcong Deng and Akira Inoue</i>	146
Fault Diagnosis and Identification for DC Motors <i>D.R. Espinoza-Trejo and D.U. Campos-Delgado</i>	155
Dynamic Principle Components Analysis with Adaptive Standardization for Fault Detection in MIMO Systems <i>J. Mina and C. Verde</i>	165
Adaptive Observer-Based Fault Detection to a Process Control Experimental System <i>A. Inoue, M. Deng, T. Ogita and S. Yoshinaga</i>	175
Vibration Suppression of Systems with Unknown Parameters <i>M. Takahashi, S. Kinoshita, M. Goromaru, Y. Kawasaki and Z. Iwai</i>	182
A Robust State Observer for nDOF Lagrangian Systems <i>David I. Rosas Almeida and Joaquin Alvarez</i>	190
Two Degree-of-Freedom of Self-Tuning Generalized Predictive Control Based on Polynomial Approach with Computational Savings <i>Akira Yanou, Shiro Masuda and Akira Inoue</i>	200
A Design Method of Generalized Minimum Variance Control Considering Safety of Sampled-Data Systems <i>T. Sato, S. Masuda and A. Inoue</i>	210

Tracking Control System Fault Diagnosis by Using Robust Right Coprime Factorization and Its Application <i>M. Deng, A. Inoue, T. Kuwamoto and N. Ueki</i>	219
Fault Accommodation and Reconfiguration in Variable Speed Drives <i>D.U. Campos-Delgado, E. Palacios and D.R. Espinoza-Trejo</i>	227
Development of Hard Landing Diagnosis System Based on Acceleration Sensing Using MEMs <i>A. Firoozrai, I. Stiharu and R. Sedaghati</i>	237
FDI in the Induction Motor Drive Under Varying Load Torque Using Bond Graphs <i>Aguilar-Justo Marving O., Guerrero-Ramírez Gerardo V. and Vela-Valdés L. Gerardo</i>	247
An Investigation into the Use of Acoustic Methods for Leak Detection in Black Liquor Recovery Boilers <i>Ville Järvinen, Juha Miettinen, Robert Hildebrand and Matthew C. Carroll</i>	257
Analysis of a Twin-Gas-Chamber Hydro-Pneumatic Vehicle Suspension <i>Dongpu Cao, Subhash Rakheja, Chun-Yi Su and A.K.W. Ahmed</i>	267
Constructing Operational Reliability Analysis Model of UMT Based On Petri Net <i>Huixiang Zhao, Yongsheng Hu and ZhengGuang Lu</i>	277
Trailer Swing with Flexibly Lashed Cargo <i>Robert Hildebrand, José Antonio Romero Navarrete and Miguel Martinez Madrid</i>	285
Non Linear Control Based in An Observer; Application to Sugar Evaporation <i>A. Osorio-Mirón, E. Arce-Medina and J. Carrillo-Ahumada</i>	295
Sensor Fusion- Sonar And Stereo Vision, Using Occupancy Grids and SIFT <i>Alfredo Chavez Plascencia and Jan Dimon Bendtsen</i>	303
Modeling and Analysis of a Micromachined Tactile Sensor for Minimally Invasive Surgery <i>Mohammad Ameen Qasaimeh, Ion Stiharu and Javad Dargahi</i>	315

Characterization of Fingerprints Using Two New Directional Morphological Approaches	325
<i>L.A. Morales-Hernández, I.R. Terol-Villalobos, A. Domínguez-González and G. Herrera-Ruiz</i>	
Polarization Based Modified Mirau Interferometry with Instantaneous Phase Shifting for Surface Profiling	335
<i>N.R. Sivakumar</i>	
Fuzzy Control of a Hydrodesulphurization Reactor	342
<i>S. Cruz Del Camino, F.S. Mederos Nieto, E. Arce Medina and A. Morales Sánchez</i>	
Dissolved Oxygen Control in an Aerobic Sequencing Batch Reactor for Toxic Wastewater Treatment	350
<i>A. Vargas, D. González, A. Núñez and F. Velarde</i>	
Computer-Driven Chemical Vapor Deposition Reactor for the Deposition of Metallic Oxide Layers and Multilayers	360
<i>Luis M. Apátiga C., Edgar Méndez M., Victor M. Castaño M. and Domingo Rangel M.</i>	
Noise Cancellation Using Adaptive Neural Networks	369
<i>Jesse Elí Quijano and Carlos Ramírez</i>	
Adaptive Neural Networks Forecasting and Its Role in Improving a Camless Engine Controller	379
<i>Moh'd Sami S. Ashhab</i>	
Dynamic Modeling of an Electrostatic Actuated Cantilevered Micromirror	389
<i>Jianliang You, Muthukumaran Packirisamy and Ion Stiharu</i>	
Autotuning of a DC Servomechanism Using Closed Loop Identification	400
<i>Rubén Garrido and Roger Miranda</i>
