<i>Foreword</i>	vii
<i>Preface</i>	ix
1. Introduction	1
1.1 Leibniz's dream	1
1.2 Development of geometric algebras	4
1.3 Conformal geometric algebra	10
1.4 Geometric computing with invariant algebras	12
1.5 From basic invariants to advanced invariants	15
1.6 Geometric reasoning with advanced invariant algebras	18
1.7 Highlights of the chapters	21
2. Projective Space, Bracket Algebra and Grassmann-Cayley Algebra	25
2.1 Projective space and classical invariants	25
2.2 Brackets from the symbolic point of view	32
2.3 Covariants, duality and Grassmann-Cayley algebra	37
2.4 Grassmann coalgebra	48
2.5 Cayley expansion	56
2.5.1 Basic Cayley expansions	56
2.5.2 Cayley expansion theory	59
2.5.3 General Cayley expansions	68
2.6 Grassmann factorization*	70
2.7 Advanced invariants and Cayley bracket algebra	81
3. Projective Incidence Geometry with Cayley Bracket Algebra	89
3.1 Symbolic methods for projective incidence geometry	89
3.2 Factorization techniques in bracket algebra	96
3.2.1 Factorization based on GP relations	96
3.2.2 Factorization based on collinearity constraints	97

3.2.3	Factorization based on concurrency constraints	101
3.3	Contraction techniques in bracket computing	103
3.3.1	Contraction	104
3.3.2	Level contraction	105
3.3.3	Strong contraction	107
3.4	Exact division and pseudodivision	110
3.4.1	Exact division by brackets without common vectors	110
3.4.2	Pseudodivision by brackets with common vectors	113
3.5	Rational invariants	116
3.5.1	Antisymmetrization of rational invariants	117
3.5.2	Symmetrization of rational invariants	123
3.6	Automated theorem proving	126
3.6.1	Construction sequence and elimination sequence	128
3.6.2	Geometric constructions and nondegeneracy conditions	131
3.6.3	Theorem proving algorithm and practice	133
3.7	Erdős' consistent 5-tuples*	138
3.7.1	Derivation of the fundamental equations	139
3.7.2	Proof of Theorem 3.40	144
3.7.3	Proof of Theorem 3.39	146
4.	Projective Conic Geometry with Bracket Algebra and Quadratic Grassmann-Cayley Algebra	151
4.1	Conics with bracket algebra	151
4.1.1	Conics determined by points	152
4.1.2	Conics determined by tangents and points	159
4.2	Bracket-oriented representation	165
4.2.1	Representations of geometric constructions	166
4.2.2	Representations of geometric conclusions	174
4.3	Simplification techniques in conic computing	178
4.3.1	Conic transformation	178
4.3.2	Pseudoconic transformation	181
4.3.3	Conic contraction	184
4.4	Factorization techniques in conic computing	185
4.4.1	Bracket unification	185
4.4.2	Conic Cayley factorization	187
4.5	Automated theorem proving	193
4.5.1	Almost incidence geometry	196
4.5.2	Tangency and polarity	199
4.5.3	Intersection	203
4.6	Conics with quadratic Grassmann-Cayley algebra*	208
4.6.1	Quadratic Grassmann space and quadratic bracket algebra	209
4.6.2	Extension and Intersection	214

5.	Inner-product Bracket Algebra and Clifford Algebra	219
5.1	Inner-product bracket algebra	219
5.1.1	Inner-product space	219
5.1.2	Inner-product Grassmann algebra	227
5.1.3	Algebras of basic invariants and advanced invariants	233
5.2	Clifford algebra	237
5.3	Representations of Clifford algebras	244
5.3.1	Clifford numbers	247
5.3.2	Matrix-formed Clifford algebras	250
5.3.3	Groups in Clifford algebra	253
5.4	Clifford expansion theory	255
5.4.1	Expansion of the geometric product of vectors	255
5.4.2	Expansion of square bracket*	259
5.4.3	Expansion of the geometric product of blades*	264
6.	Geometric Algebra	273
6.1	Major techniques in Geometric Algebra	273
6.1.1	Symmetry	278
6.1.2	Commutation	280
6.1.3	Ungrading	285
6.2	Versor compression	289
6.2.1	4-tuple compression	291
6.2.2	5-tuple compression	295
6.2.3	m -tuple compression	300
6.3	Obstructions to versor compression*	302
6.3.1	Almost null space	302
6.3.2	Parabolic rotors	305
6.3.3	Hyperbolic rotors	308
6.3.4	Maximal grade conjectures	315
6.4	Clifford coalgebra, Clifford summation and factorization*	318
6.4.1	One Clifford monomial	320
6.4.2	Two Clifford monomials	321
6.4.3	Three Clifford monomials	324
6.4.4	Clifford coproduct of blades	327
6.5	Clifford bracket algebra	332
7.	Euclidean Geometry and Conformal Grassmann-Cayley Algebra	339
7.1	Homogeneous coordinates and Cartesian coordinates	339
7.1.1	Affine space and affine Grassmann-Cayley algebra	339
7.1.2	The Cartesian model of Euclidean space	344
7.2	The conformal model and the homogeneous model	346
7.2.1	The conformal model	347

7.2.2	Vectors of different signatures	350
7.2.3	The homogeneous model	353
7.3	Positive-vector representations of spheres and hyperplanes	354
7.3.1	Pencils of spheres and hyperplanes	355
7.3.2	Positive-vector representation	357
7.4	Conformal Grassmann–Cayley algebra	362
7.4.1	Geometry of Minkowski blades	363
7.4.2	Inner product of Minkowski blades	370
7.4.3	Meet product of Minkowski blades	375
7.5	The Lie model of oriented spheres and hyperplanes	385
7.5.1	Inner product of Lie spheres	387
7.5.2	Lie pencils, positive vectors and negative vectors*	391
7.6	Apollonian contact problem	399
7.6.1	1D contact problem	399
7.6.2	2D contact problem	400
7.6.3	n D contact problem	407
8.	Conformal Clifford Algebra and Classical Geometries	411
8.1	The geometry of positive monomials	411
8.1.1	Versors for conformal transformations	412
8.1.2	Geometric product of Minkowski blades	419
8.2	Cayley transform and exterior exponential	425
8.3	Twisted Vahlen matrices and Vahlen matrices	435
8.4	Affine geometry with dual Clifford algebra	442
8.5	Spherical geometry and its conformal model	448
8.5.1	The classical model of spherical geometry	448
8.5.2	The conformal model of spherical geometry	450
8.6	Hyperbolic geometry and its conformal model*	452
8.6.1	Poincaré’s hyperboloid model of hyperbolic geometry	453
8.6.2	The conformal model of double-hyperbolic geometry	459
8.6.3	Poincaré’s disk model and half-space model	460
8.7	Unified algebraic framework for classical geometries	462
Appendix A	Cayley Expansion Theory for 2D and 3D Projective Geometries	469
A.1	Cayley expansions of p_{II}	469
A.2	Cayley expansions of p_{III}	470
A.3	Cayley expansions of p_{IV}	476
A.4	Cayley expansions of q_I, q_{II} and q_{III}	490
A.5	Cayley expansions of r_I and r_{II}	492
<i>Bibliography</i>		495
<i>Index</i>		505
