

# CONTENTS

<b>PREFACE</b>	<b>v</b>
<b>FOREWORD</b>	<b>vii</b>
<b>I. CELL MECHANICS</b>	<b>1</b>
The effect of streptomycin and gentamicin on outer hair cell motility <i>B. Currall, X. Wang and D. Z. Z. He</i>	3
Mechanotransduction in bone cell networks <i>X. E. Guo, E. Takai, X. Jiang, Q. Xu, G. M. Whitesides, J. T. Yardley, C. T. Hung and K. D. Costa</i>	13
Intracellular measurements of strain transfer with texture correlation <i>C. L. Gilchrist, F. Guilak and L. A. Setton</i>	36
<b>II. CELL RESPONSE TO MECHANICAL STIMULATION</b>	<b>49</b>
Identifying the mechanisms of flow-enhanced cell adhesion via dimensional analysis <i>C. Zhu, V. I. Zarnitsyna, T. Yago and R. P. McEver</i>	51
A sliding-rebinding mechanism for catch bonds <i>J. Lou, C. Zhu, T. Yago and R. P. McEver</i>	66
Role of external mechanical forces in cell signal transduction <i>S. R. K. Vedula, C. T. Lim, T. S. Lim, G. Rajagopal, W. Hunziker, B. Lane and M. Sokabe</i>	80
<b>III. TISSUE ENGINEERING</b>	<b>105</b>
Evaluation of material property of tissue-engineered cartilage by magnetic resonance imaging and spectroscopy <i>S. Miyata, K. Homma, T. Numano, K. Furukawa, T. Ushida and T. Tateishi</i>	107

Scaffolding technology for cartilage and osteochondral tissue engineering <i>G. Chen, N. Kawazoe, T. Tateishi and T. Ushida</i>	118
<b>IV. COMPUTATIONAL BIOMECHANICS</b>	<b>131</b>
MRI measurements and CFD analysis of hemodynamics in the aorta and the left ventricle <i>M. Nakamura, S. Wada, S. Yokosawa and T. Yamaguchi</i>	133
A fluid-solid interactions study of the pulse wave velocity in uniform arteries <i>T. Fukui, Y. Imai, K. Tsubota, T. Ishikawa, S. Wada, T. Yamaguchi and K. H. Parker</i>	146
Rule-based simulation of arterial wall thickening induced by low wall shear stress <i>S. Wada, M. Nakamura and T. Karino</i>	157
<b>SUBJECT INDEX</b>	<b>167</b>
