

## CONTENTS

<i>Preface</i>	v
<b>SESSION A. DARK MATTER</b>	
<b>Session A1: Theory and Experiment</b>	
Cosmology and Dark Matter at the LHC <i>R. Arnowitt et al.</i>	1
Experimental Searches for Dark Matter <i>D. Cline</i>	12
Dark Matter in SUGRA, Strings and Branes <i>P. Nath</i>	25
Studying Supersymmetry with Dark Matter Experiments <i>D. Hooper</i>	37
Is the Dark Matter Interpretation of the EGRET Gamma Ray Excess Compatible with Antiproton Measurements? <i>W. de Boer, I. Gebauer, C. Sander, M. Weber and V. Zhukov</i>	43
Status of the EDELWEISS II Experiment <i>F. Schwamm for the EDELWEISS Collaboration</i>	51
XENON <i>M. Yamashita on behalf of the XENON Collaboration</i>	58
Mass Estimates of Dark Matter Bodies from the Timescale of Quasar Variation <i>M. R. S. Hawkins</i>	65
New Signatures in Direct Dark Matter Searches <i>J. D. Vergados, N. Tetradis and A. Faessler</i>	71

Prospects for Direct Dark Matter Searches in the Constrained MSSM <i>R. Trotta, R. R. de Austri and L. Roszkowski</i>	81
MACCHIOs as Cold Dark Matter <i>B. J. Carr</i>	87
Neutralino Clumps and Cosmic Rays <i>P. Salati</i>	108
Search for a Dark Matter Annihilation Signal in the TeV Range with H.E.S.S. <i>E. Moulin on behalf of the H.E.S.S. Collaboration</i>	115
Dark Matter Clumps in the Galaxy <i>V. S. Berezinsky, V. I. Dokuchaev and Yu. N. Eroshenko</i>	122
Indirect Detection Techniques for Dark Matter* <i>G. Bertone</i>	–
The Bullet Cluster 1E0657-56: Implications for Dark Matter and Galaxy Evolution <i>A. H. Gonzalez et al.</i>	128
Overview of the ZEPLIN Two-Phase Program <i>D. Cline</i>	135
The Second Phase of the PICASSO Experiment <i>C. B. Krauss for the PICASSO Collaboration</i>	144
Investigations on Dark Matter and on Some Rare Processes by DAMA: Past, Present and Future <i>R. Bernabei et al.</i>	150
The First Halos <i>D. J. Schwarz</i>	158
Gravitino Dark Matter and the Implications <i>K.-Y. Choi</i>	166

---

\*Contribution not received.

What an Astrophysicist Can Tell About the Nature of Dark Matter? <i>S. Colafrancesco</i>	172
MIMAC-He3: Micro-tpc Matrix of Chambers of $^3\text{He}$ <i>D. Santos, O. Guillaudin, Th. Lamy, F. Mayet and E. Moulin</i>	180
The Transition Radiation Detector of AMS-02 to Search for Dark Matter in Space <i>F. R. Spada</i>	186
The CRESST Dark Matter Search <i>I. Bavykina et al.</i>	192
The ArDM Experiment <i>A. Bueno on behalf of the ArDM Collaboration</i>	198
DAMA/LXe at LNGS: Results and Perspectives <i>R. Bernabei et al.</i>	204
A Possible LMC Halo Contribution to Microlensing <i>P. Jetzer</i>	211
SUGRA Dark Matter* <i>C. Munoz</i>	–
Limits on the MACHOS from EROS-2 <i>J. Rich for the EROS-2 Collaboration</i>	217
Neutralino Contribution to DM, LHC and LC Searches* <i>G. Gounaris</i>	–
Status of the GENIUS-Test-Facility with Naked Germanium Detectors in Liquid Nitrogen <i>H. V. Klapdor-Kleingrothaus and I. V. Krivosheina</i>	222
Indirect Dark Matter Searches with the MAGIC Telescope <i>M. Doro for the MAGIC Collaboration</i>	231

Dark Matter NaI Searches at CANFRANC: Status of ANAIS <i>J. Amaré et al.</i>	237
XMASS Experiment <i>A. Takeda for the XMASS Collaboration</i>	243
Measuring the Daemon-Flux Seasonal Maxima at the Baksan Neutrino Observatory <i>E. M. Drobyshevski and M. E. Drobyshevski</i>	248
Threshold Improvements in Scintillation Experiments by Photon Individuation <i>C. Pobes et al.</i>	256
Measurement of the Scintillation Efficiency of Na Recoils in NaI(Tl) Down to 10 keV Nuclear Recoil Energy Relevant to Dark Matter Searches <i>H. Chagani, P. Majewski, E. J. Daw, V. A. Kudryavtsev and N. J. C. Spooner</i>	262
Constraining Kaluza-Klein Dark Matter Through Multiwavelength Observations of Sgr A <i>L. Pieri</i>	268
A Population to Dark Matter Bound to the Solar System* <i>A. Peter</i>	–
Dark Matter Detection and Mini-CLEAN* <i>K. Coakley</i>	–
COOP* <i>B. Odom</i>	–
<b>Session A2: WIMPs</b>	
Prospect of AMS Experiment for Dark Matter <i>M. Bourquin on behalf of the AMS Collaboration</i>	273

Search for Dark Matter with Space Experiments <i>A. Morselli</i>	282
The ZEPLIN III Detector: Results from Surface Calibrations <i>T. J. Sumner et al.</i>	288
WIMPs Search by Exclusive Measurements with Thin Multilayer NaI(Tl) Scintillators (PICO-LON) <i>K. Fushimi et al.</i>	296
High Performance Scintillating Bolometers in the Search for WIMPS: ROSEBUD Experiment <i>E. García et al.</i>	302
Detector Performance of the NEWAGE Experiment <i>K. Miuchi et al.</i>	308
WIMP Search with CsI(Tl) Crystals at KIMS* <i>S. K. Kim</i>	—
The DRIFT-II Dark Matter Detector <i>D. N. Muna and N. J. C. Spooner on behalf of the DRIFT Collaboration</i>	314
Detection of VUV Scintillation Light in One Ton of Liquid Argon <i>C. Regenfus</i>	325
Optimizing WIMP Directional Detectors <i>A. M. Green and B. Morgan</i>	331
The ZEPLIN-II Two-Phase Xenon Dark Matter Detector: Status Report <i>R. Lüscher on behalf of the ZEPLIN-II Collaboration</i>	337
Liquid Rare Gases and Inorganic Scintillators for WIMP Searches <i>A. Hitachi</i>	344

Neutralino-Neutralino Annihilation to $\gamma Z$ in MSSM <i>Th. Diakonidis, G. J. Gounaris, J. Layssac, P. I. Porfyriadis and F. M. Renard</i>	350
SuperWeakly Interacting Massive Particles (SuperWIMPs)* <i>F. Takayama</i>	–
<b>Session A3: Axions</b>	
Axion: Past, Present and Future <i>J. E. Kim</i>	357
Overlooked Astrophysical Signatures of Axion(-like) Particles <i>K. Zioutas, Y. Semertzidis and Th. Papaevangelou</i>	372
Micromegas for Rare Event Detection <i>I. G. Irastorza et al.</i>	382
Photon Regeneration Plans <i>A. Ringwald</i>	388
Axino Dark Matter from Q-Balls <i>L. Roszkowski and O. Seto</i>	396
CAST — Direct Search for Solar Axions* <i>M. Kuster</i>	–
Microwave Cavity Searches for Dark-Matter Axions; ADMX* <i>D. Kinion</i>	–
Laser Production of Axion-Like Bosons: Progress in the Experimental Studies at PVLAS* <i>G. Cantatore</i>	–
Use of Gases in the PVLAS Apparatus* <i>G. Ruoso</i>	–

**Session A4: Neutrinos**

Sterile Neutrino Dark Matter <i>M. Shaposhnikov</i>	403
Neutrino-Less Double Beta Decays and Neutrino Masses. The Present and Future Experiments <i>H. Ejiri</i>	412
A New View on the Future of Nuclear Double Beta Decay <i>H. V. Klapdor-Kleingrothaus</i>	423
The GERDA Neutrinoless-Double-Beta Decay Experiment <i>B. Majorovits for the GERDA Collaboration</i>	433
Majorana Dark Matter <i>A. Anisimov</i>	439
Reactor Neutrinos* <i>T. Lachenmaier</i>	—
IceCube, the World's Largest Dark Matter Detector <i>H. Landsman for the ICECUBE Collaboration</i>	450
The ANTARES Detector <i>A. Margiotta on behalf of the ANTARES Collaboration</i>	457
HELYCON: Towards a Sea-Top Infrastructure <i>S. E. Tzamarias</i>	464
Solving Cosmological Problem in Universal Extra Dimension Models by Introducing Dirac Neutrino <i>S. Matsumoto, J. Sato, M. Senami and M. Yamanaka</i>	489
MINOS Results: Observation of Muon Neutrino Disappearance with the MINOS Detectors* <i>G. Tzanakos</i>	—

CUORE\*

*C. Bucci***Session A5: Background Studies**

Neutron Background in Large-Scale Dark Matter Detectors <i>V. A. Kudryavtsev on behalf of ILIAS and UKDMC</i>	501
Background Studies for a Ton-Scale Argon Dark Matter Detector (ArDM) <i>L. Kaufmann and A. Rubbia</i>	508
Characterization of the Canfranc Underground Laboratory: Status and Future Plans <i>G. Luzón et al.</i>	514
First Measurement of Low Intensity Fast Neutron Background from Rock at the Boulby Underground Laboratory <i>E. Tziaferi et al.</i>	520
Simulation of Shielding Designs for Future Large-Scale Dark Matter Search Experiments <i>M. Bauer, J. Jochum and S. Scholl</i>	526
Simulation of Inelastic Neutron Scattering with GEANT4 <i>S. Scholl, M. Bauer and J. Jochum</i>	531
Calculation of Neutron Yield from Radioactivity in Materials Relevant to Dark Matter Searches <i>V. Tomasello and V. A. Kudryavtsev</i>	537
Backgrounds and Threshold of XENON10 Dark Matter Experiment <i>P. F. Sorensen on behalf of the XENON Collaboration</i>	542
Background Reduction for Germanium Double Beta Decay Detectors <i>H. Gómez, S. Cebrián, J. Morales and J. A. Villar</i>	549

Background Studies of the PN-CCD Detector of CAST <i>A. Rodriguez et al.</i>	554
---	-----

New Measurement of the Neutron Flux at the Modane Underground Laboratory* <i>R. Lemrani</i>	–
---	---

### **Session A6: Advanced Detectors**

ZEPLIN II Event Reconstruction <i>K. Mavrokoridis on behalf of the ZEPLIN II Collaboration</i>	559
---	-----

Three Dimensional Track Reconstruction in DRIFT-II <i>D. N. Muna on behalf of the DRIFT Collaboration</i>	565
--	-----

On the Sensitivity of Superfluid $^3\text{He}$ Bolometers for ULTIMA <i>J. Elbs, C. Winkelmann, Yu. M. Bunkov, E. Collin and H. Godfrin</i>	571
--	-----

ZEPLIN II Active Veto <i>E. J. Daw on behalf of the ZEPLIN II Collaboration</i>	576
--	-----

Detecting Low Energy Recoils with Micromegas* <i>I. Giomataris</i>	–
---	---

Low Energy Light Detectors in CRESST* <i>K. Rottler</i>	–
--	---

### **SESSION B. COSMOLOGY AND LARGE SCALE STRUCTURE**

Cosmological Parameters from 2dfGRS and SDSS* <i>C. Frenk</i>	–
--	---

The Southern Cosmology Survey. A Detection Strategy for DM and DE* <i>R. Jimenez</i>	–
--	---

Bekenstein-Sanders Tensor-Vector-Scalar Theory and Cosmology <i>C. Skordis</i>	582
Cosmology from XMM High-Z AGN Clustering <i>M. Plionis and S. Basilakos</i>	589
Modeling the Galaxy/Light-Mass Connection with Cosmological Simulations <i>A. Tasitsiomi</i>	596
CDM Abundance in Non-Standard Cosmologies <i>C. Pallis</i>	602
Deducing the Electron Spectrum in the Inner Galaxy from EGRET and WMAP Observations using GALPROP* <i>D. Finkbeiner</i>	–

## SESSION C. DARK ENERGY

Probing Dark Energy with Type Ia Supernovae <i>R. Pain</i>	609
Relaxation Dark Energy in Non-Critical String Cosmologies and Astrophysical Data <i>N. E. Mavromatos and V. A. Mitsou</i>	623
Dark Energy and CMB* <i>R. Crittenden</i>	–
Trapped Quintessential Inflation from Flux Compactifications <i>K. Dimopoulos</i>	635
Observational Signature of Extended Gravity Theories <i>L. Perivolaropoulos</i>	647
Akaike Model Selection Criterion Applied to Supernovae Data <i>M. Biesiada</i>	655

The $\Lambda$ CDM: Virtues and Shortcomings*	–
<i>E. Hayashi</i>	
DM Halos Interacting with DE. Implications to Direct DM Detection	662
<i>N. Brouzakis</i>	
<b>SESSION D. UNDERGROUND LABS/ NEW FACILITIES/FUTURE ASTROPARTICLE FACILITIES</b>	
Modane Underground Laboratory (Frejus)*	–
<i>G. Gerbier</i>	
EURECA — The European Underground Rare Event Calorimeter Array	668
<i>H. Kraus et al.</i>	
KM3NeT: The Future km <sup>3</sup> -Scale $\nu$ -Telescope in the Mediterranean Sea*	–
<i>U. Katz</i>	
An Astroparticle Physics Roadmap by ApPEC and ASPERA*	–
<i>S. Katsanevas</i>	
The Roadmap to Future Astroparticle Physics Research Infrastructures in Europe*	–
<i>I. Siotis</i>	
<i>List of Participants</i>	679
