

CONTENTS

Preface	v
Numerical Approximation of a BGK-Type Relaxation Model for Reactive Mixtures	1
<i>A. Aimi, M. Diligenti, M. Groppi and C. Guardasoni</i>	
Energy-Transport Models for Semiconductor Devices and Their Coupling with Electric Networks	13
<i>G. Ali and M. Carini</i>	
Dimension Reduction for Discrete Systems	25
<i>R. Alicandro, A. Braides and M. Cicalese</i>	
Rectangular Dualization of Biconnected Planar Graphs in Linear Time and Related Applications	37
<i>M. Ancona, S. Drago, G. Quercini and A. Bogdanovych</i>	
Remarks on Contact Powers and Null Lagrangian Fluxes	49
<i>L. Ansini and G. Vergara Caffarelli</i>	
Innovative Financial Products for Environmental Protection in an Evolutionary Context	54
<i>A. Antoci, M. Galeotti and L. Geronazzo</i>	
Multiplicative Schwarz Algorithms for Symmetric Discontinuous Galerkin Methods	66
<i>P. F. Antonietti and B. Ayuso</i>	
Topological Calculus: Between Algebraic Topology and Electromagnetic Fields	78
<i>W. Arrighetti and G. Gerosa</i>	

Deterministic Solution of Boltzmann Equations Governing the Dynamics of Electrons and Phonons in Carbon Nanotubes <i>Ch. Auer, F. Schürerer and C. Ertler</i>	89
Development of Curve-Based Cryptography <i>R. M. Avanzi</i>	101
Model Order Reduction: An Advanced, Efficient and Automated Computational Tool for Microsystems <i>T. Bechtold, A. Verhoeven, E. J. W. Ter Maten and T. Voss</i>	113
A New Finite Element Method for Kirchhoff Plates <i>L. B. da Veiga, J. Niiranen and R. Stenberg</i>	125
A Two-Dimensional Trust-Region Method for Large Scale Bound-Constrained Nonlinear Systems <i>S. Bellavia, M. Macconi and B. Morini</i>	137
An Adaptive Finite Element Semi-Lagrangian Runge–Kutta–Chebychev Method for Combustion Problems <i>R. Bermejo and J. Carpio</i>	149
Active Infrared Thermography in Non-Destructive Evaluation of Surface Corrosion 2: Heat Exchange between Specimen and Environment <i>P. Bison, M. Ceseri, D. Fasino and G. Inglese</i>	161
Lexsegment Ideals and Simplicial Cohomology Groups <i>V. Bonanzinga and L. Sorrenti</i>	172
Nonlinear Electronic Transport in Semiconductor Superlattices <i>L. L. Bonilla, L. Bartetti, R. Escobedo and M. Alvaro</i>	184
Biomass Growth in Unsaturated Porous Media: Hydraulic Properties Changes <i>I. Borsi, A. Farina, A. Fasano and M. Primicerio</i>	196
Recovering Trivariate Functions by Data on Tracks <i>M. Bozzini and M. Rossini</i>	208
On the Use of an Approximate Constraint Preconditioner in a Potential Reduction Algorithm for Quadratic Programming <i>S. Cafieri, M. D’Apuzzo, V. De Simone and D. di Serafino</i>	220

Option Hedging for High Frequency Data Models <i>C. Ceci</i>	231
Mathematical Models and Methods in Micro-Nano-Technologies <i>C. Cercignani, M. Lampis and S. Lorenzani</i>	247
A General Model for Wax Diffusion in Crude Oils under Thermal Gradient <i>E. Comparini and F. Talamucci</i>	259
Wax Diffusion and Deposition in the Pipelining of Waxy Oils <i>S. Correr, D. Merino-Garcia, A. Fasano and L. Fusi</i>	271
Inverse Modeling in Geophysical Applications <i>G. Currenti, R. Napoli, D. Carbone, C. del Negro and G. Ganci</i>	279
Proteomic Multiple Sequence Alignments: Refinement Using an Immunological Local Search <i>V. Cutello, G. Nicosia, M. Pavone and I. Prizzi</i>	291
Convergence to Self-Similarity in an Addition Model with Power-Like Time-Dependent Input of Monomers <i>F. P. da Costa, J. T. Pinto and R. Sasportes</i>	303
Living Shell-Like Structures <i>A. Di Carlo, V. Varano, V. Sansalone and A. Tatone</i>	315
Dynamics of Materials with a Deformability Threshold <i>A. Farina, A. Fasano, L. Fusi and K. R. Rajagopal</i>	327
On the Stability of Semi-Lagrangian Advection Schemes under Finite Element Interpolations <i>R. Ferretti and G. Perrone</i>	339
A Method to Test Ballasted High-Speed Railway Tracks <i>G. Franceschini and A. Garinei</i>	351
A Simple Variational Derivation of Slender Rods Theory <i>L. Freddi, A. Londero and R. Paroni</i>	363
Kinetic Models for Nanofluidics <i>A. Frezzotti</i>	375

Thermodynamics of Piezoelectric Media with Dislocations <i>D. Germanó and L. Restuccia</i>	387
Estimating the Diffusion Part of the Covariation between Two Volatility Models with Jumps of Lévy Type <i>F. Gobbi and C. Mancini</i>	399
Modeling Horizontal Coastal Flows: Assessing the Role of Viscous Contributions <i>G. Grosso, M. Brocchini and A. Piattella</i>	410
Electronic Transport Calculation of Finite Single-Walled Carbon Nanotube Systems in the Two-Terminal Geometry <i>A. La Magna and I. Deretzis</i>	422
Multilevel Gradient Method with Bézier Parametrisation for Aerodynamic Shape Optimisation <i>M. Martinelli and F. Beux</i>	432
Nonlinear Exact Closure for the Hydrodynamical Model of Semiconductors Based on the Maximum Entropy Principle <i>G. Mascali and V. Romano</i>	444
A Thermodynamical Model of Inhomogeneous Superfluid Turbulence <i>M. S. Mongiòvi and D. Jou</i>	456
Convergence of Finite Elements Adapted for Weaker Norms <i>P. Morin, K. G. Siebert and A. Veiser</i>	468
ENO/WENO Interpolation Methods for Zooming of Digital Images <i>R. M. Pidotella, F. Stanco and C. Santaera</i>	480
Finite Element Discretizations for the Density Gradient Equation <i>R. Pinnau and V. J. M. Ruiz</i>	492
A Numerical Approach to the Dynamics of Magnetoelastic Materials <i>F. Pistella and V. Valente</i>	501
Constellations of Repeating Satellites for Local Telecommunication and Monitoring Services <i>M. Pontani</i>	513

Monomial Orders in the Vast World of Mathematics <i>G. Restuccia</i>	525
Geometric Multiscale Approach by Optimal Control for Shallow Water Equations <i>F. Saleri and E. Miglior</i>	537
Polar Sitter Mission for Continuous Observation of the Poles <i>S. Sgubini, S. Porfili and C. Circi</i>	549
Phase Equilibria of Polydisperse Hydrocarbons: Moment Free Energy Method Analysis <i>A. Speranza, F. Dipatti and A. Terenzi</i>	561
Optimization of Electronic Circuits <i>E. J. W. Ter Maten, T. G. A. Heijmen, C. Lin and A. El Guennouni</i>	573
Transmission Phenomena Across Highly Conductive Interfaces <i>L. Teresi and E. Vacca</i>	585
Some Exact Formulas for the Post-Gelation Mass of the Coagulation Equation with Product Kernel <i>H. Van Roessel and M. Shirvani</i>	597
Motif Discovery Fixing Mismatch Positions <i>M. Zantoni, A. Policriti, E. Dalla and C. Schneider</i>	609
Author Index	621
