<i>Foreword</i>	v
<i>Preface</i>	ix
PART I. INTRODUCTION	
1. The Postulates of the Special Theory of Relativity	3
2. Time Dilation	11
3.* The Hafele–Keating Experiment	19
4. Length Contraction	23
5.* The Unification of Electric and Magnetic Forces	29
6. Lorentz Transformation	37
7. Minkowski Diagrams	47
Examples	
(1) Events	50
(2) Simultaneity	52
(3) World Lines	53
(4) Time Dilation	55
(5) Length Contraction	56
(6) Past, Future, Causality	57
(7) Speed Faster than Light	59
8. Simultaneity	61
Problems for Part I	73
PART II. KINEMATICS	
9. Transformation of Velocities	81
10.* Aberration of Light	89
11. Transformation of Accelerations	95

12.	Accelerated Motion	99
13.*	The Rocket-Rope Paradox (Bell's Paradox)	109
14.	Doppler Effect	117
15.	The Twin Paradox and k -Calculus	127
16.*	Images of Fast Moving Objects	137
17.*	Rotation and Lorentz Transformation	149
18.*	Lorentz Transformation in Two and Three Spatial Directions	155
19.*	The Rod-Through-The-Window Paradox	163
	Problems for Part II	171

PART III. DYNAMICS

20.	Mass and Momentum	177
21.*	Motion of a Rocket	183
22.*	Force	191
23.	Energy	199
24.	Energy-Momentum Equation and Diagrams	207
25.	Lorentz Transformation of Energy and Momentum	213
26.	Invariance and Distance in Three-Dimensional Space	219
27.	Invariance and Distance in Four-Dimensional Space-Time	223
	Problems for Part III	229

PART IV. FOUR-VECTORS AND ELECTROMAGNETISM

28.	Four-Vectors and Scalar Products	235
29.	Calculus with the Energy-Momentum Vector	243
	Examples	
	(1) Completely Inelastic Collision of two Particles	243
	(2) Production of a Proton-Antiproton Pair	247
	(3) Absorption of a Photon by an Atom	249
	(4) Emission of a Photon by an Atom	251
	(5) Decay of a Particle at Rest into two Particles	252
	(6) Production of an Electron-Positron Pair from a Photon (Pair Production)	254
	(7) Dematerialization of an Electron-Positron Pair into two Photons (Pair Annihilation)	256
	(8) Compton Effect	258

(9) Inverse Compton Effect	259
(10) Bremsstrahlung	261
30.* Four-Velocity and Four-Acceleration	263
31.* The Angular Frequency–Wave Number Vector	269
32.* The Charge Density–Current Density Vector	273
33.* The Power-Force Vector (Minkowski Force)	275
34.* Transformation of Electric and Magnetic Fields	279
35.* Fields of a Passing Point Charge	289
36.* The Shape Invariance of Maxwell’s Equations	293
Problems for Part IV	299
<i>Solutions</i>	303
<i>Further Reading</i>	307
<i>Index</i>	309
