

## Contents

Preface		vii
Chapter 1	Foam as granular matter <i>D. Weaire, V. Langlois, M. Saadatfar and S. Hutzler</i>	1
Chapter 2	Delaunay simplex analysis of the structure of equal sized spheres <i>A.V. Anikeenko, N.N. Medvedev, T. Di Matteo, G.W. Delaney and T. Aste</i>	27
Chapter 3	On entropic characterization of granular materials <i>R. Blumenfeld</i>	43
Chapter 4	Mathematical modeling of granular flow-slides <i>I. Vardoulakis and S. Alevizos</i>	55
Chapter 5	The mechanics of brittle granular materials <i>I. Einav</i>	85
Chapter 6	Stranger than friction: force chain buckling and its implications for constitutive modelling <i>A. Tordesillas</i>	95
Chapter 7	Investigations of size effects in granular bodies during plane strain compression <i>J. Tejchman and J. Górski</i>	111

Chapter 8	Granular flows: fundamentals and applications <i>P.W. Cleary</i>	141
Chapter 9	Fine tuning DEM simulations to perform virtual experiments with three-dimensional granular packings <i>G.W. Delaney, S. Inagaki and T. Aste</i>	169
Chapter 10	Fluctuations in granular materials <i>R.P. Behringer</i>	187
Chapter 11	Statistical mechanics of dense granular media <i>M. Pica Ciamarra, A. de Candia, A. Fierro, M. Tarzia, A. Coniglio and M. Nicodemi</i>	217
Chapter 12	Compaction of granular systems <i>P. Richard, F. Lominé, P. Ribière, D. Bideau and R. Delannay</i>	245
