

## CONTENTS

Preface	v
Conference Data	xi
<i>S. Abenda</i>	
Reciprocal Transformations and Integrable Hamiltonian Hydrodynamic Type Systems	
<i>B. Albers</i>	
Modeling and Numerical Analysis of Wave Propagation in Partially Saturated Porous Media	7
<i>G. Ali, R. Beneduci, G. Mascali</i>	
Application of Generalized Observables to Stochastic Quantum Models in Phase Space	13
<i>G. Ali, M. Carini</i>	
A Hydrodynamic Model for Semiconductors with Field-Dependent Mobility	19
<i>F. Bagarello</i>	
Stock Markets and the Operator Number Representation	25
<i>E. Barbera</i>	
An Application of Extended Thermodynamics and Fluctuation Principle to Stationary Heat Conduction in Radial Symmetry	31
<i>M. Bisi, L. Desvillettes, G. Spiga</i>	
Quantitative Estimates for the Large Time Behavior of a Reaction-Diffusion Equation with Rational Reaction Term	38
<i>G. Boillat, Y.J. Peng</i>	
Linearized Euler's Variational Equations in Lagrangian Coordinates	44

<i>F. Borghero, G. Bozis</i> A 3-Dimensional Inverse Problem of Geometrical Optics for Continuous Isotropic Inhomogeneous Media	54
<i>G. Borgioli, G. Frosali, C. Manzini</i> Derivation of a Quantum Hydrodynamic Model in the High-Field Case	60
<i>F. Brini, G. Mulone, M. Trovato</i> On the Magnetic Rayleigh-Bénard Problem for Compressible Fluids	66
<i>T. Brugarino, M. Sciacca</i> Solutions of Some Coupled Korteweg-de-Vries Equations in Terms of Hyperelliptic Functions of Genus Two	72
<i>B. Buonomo, D. Lacitignola</i> A Global Stability Result for a Certain Bilinear System	78
<i>B. Buonomo, S. Rionero</i> Restabilizing Forcing for a Diffusive Prey-Predator Model	84
<i>P. Capodanno, D. Vivona</i> Mathematical Study of the Planar Oscillations of a Heavy, almost Homogeneous Liquid in a Container	90
<i>F. Capone</i> Diffusion-Driven Stability for Beddington-DeAngelis Predator-Prey Model	96
<i>P. Carbonaro</i> Localized Structures in a Dusty Plasma	102
<i>F. Cardin</i> Fluid Dynamical Features of the Weak KAM Theory	108
<i>M. Carfora, T. Buchert</i> Ricci Flow Deformation of Cosmological Initial Data Sets	118

<i>S. Carillo</i> Bäcklund Charts & Applications	128
<i>S. Carnazza, S. Guglielmino, M. Nicolò, F. Santoro, F. Oliveri</i> A Paradox in Life Thermodynamics: The Long-Term Survival of Bacterial Populations	135
<i>M.C. Carrisi, S. Pennisi</i> The Macroscopic Relativistic Model in Extended Thermodynamics, Part I: A First Type of its Subsystems	141
<i>M.C. Carrisi, S. Pennisi, F. Rundo</i> The Macroscopic Relativistic Model in Extended Thermodynamics, Part II: The Second Type of its Subsystems	147
<i>Y. Choquet-Bruhat</i> Fuchsian Partial Differential Equations	153
<i>F. Conforto, S. Iacono, F. Oliveri</i> On the Generalized Riemann Problem for a $2 \times 2$ System of Balance Laws	162
<i>F. Conforto, R. Monaco, M. Pandolfi Bianchi</i> Boltzmann-Type Equations for Chain Reactions Modeling	168
<i>R. Conte, S. Bugaychuk</i> Analytic Structure of the Four-Wave Mixing Model in Photoreactive Material	177
<i>C. Currò, F. Oliveri</i> On Non-Homogeneous Quasilinear $2 \times 2$ Systems Equivalent to Homogeneous and Autonomous Ones	187
<i>M. De Angelis, P. Renno</i> On the Fitzhugh-Nagumo Model	193

<i>G. Della Rocca, F. Gargano, M. Sammartino, V. Sciacca</i> High Reynolds Number Navier-Stokes Solutions and Boundary Layer Separation Induced by a Rectilinear Vortex Array	199
<i>M. Destrade, G. Saccomandi</i> A Note about Waves in Dissipative and Dispersive Solids	210
<i>L. Desvillettes, C. Lin</i> Non Local Thermodynamical Equilibrium Line Radiative Transfer Quasi Stationary Approximation	218
<i>B. Düring, D. Matthes, G. Toscani</i> Exponential and Algebraic Relaxation in Kinetic Models for Wealth Distribution	228
<i>J. Engelbrecht, A. Berezovski, A. Salupere</i> Solitary Waves in Dispersive Materials	239
<i>M. Fabrizio</i> A Ginzburg-Landau Model for the Ice-Water and Liquid-Vapor Phase Transitions	247
<i>R. Fazio, S. Iacono</i> Local Error Reduction for First Order Implicit Pseudo-Spectral Methods Applied to Linear Advection Models	258
<i>R. Fazio, A. Jannelli</i> Positive Schemes for the Advection Equation	264
<i>G. Fiore</i> Travelling-Wave Solutions of a Modified Sine-Gordon Equation Used in Superconductivity	274
<i>L. Fiorino, P. Giovine</i> Some Remarks on Acceleration Waves in Porous Solids	280
<i>J.N. Flavin</i> Stability Considerations for Reaction-Diffusion Systems	287

<i>G. Gambino, M.C. Lombardo, M. Sammartino</i> Cross-Diffusion Driven Instability for a Lotka-Volterra Competitive Reaction-Diffusion System	297
<i>M.L. Gandarias</i> On a Procedure for Finding Hidden Potential Symmetries	303
<i>M. Gentile, A. Tataranni</i> Turing Instability for the Schnackenberg System	309
<i>M. Gentile, A. Tataranni</i> On Nonlinear Stability for a Reaction-Diffusion System Concerning Chemical reactions	315
<i>F. Golse, F. Salvarani</i> Radiative Transfer Equations and Rosseland Approximation in Gray Matter	321
<i>H. Gouin</i> A Mechanical Model for Liquid Nanolayers	327
<i>M. Groppi, M. Sammartino</i> A Particle Method for a Lotka-Volterra System with Nonlinear Cross and Self-Diffusion	337
<i>M. Groppi, G. Spiga</i> On Shock Structure in Reactive Mixtures	343
<i>G.M. Kremer</i> Transport Properties of Chemically Reacting Gas Mixtures	350
<i>G.M. Kremer, A.J. Soares</i> The Contribution of the Reaction Heat to Non-Equilibrium Effects of Chemically Reacting Gases	360
<i>S. La Rosa, V. Romano, G. Mascali</i> Nonlinear Closure Relations: A Case from Semiconductors	366

<i>S. Lombardo</i> Stability in the Bénard Problems with Competing Effects via the Reduction Method	372
<i>P. Maremonti</i> Navier-Stokes in Aperture Domains: Existence with Bounded Flux and Qualitative Properties	378
<i>L. Margheriti, M.P. Speciale</i> Unsteady Solutions of PDEs Generated by Steady Solutions	388
<i>A. Mentrelli, C. Rogers, W.K. Schief</i> On Two-Pulse Interaction in a Class of Model Elastic Materials	394
<i>A. Mentrelli, M. Sugiyama, N. Zhao</i> Interaction between a Shock and an Acceleration Wave in a Perfect Gas for Increasing Shock Strength	405
<i>C. Mineo, M. Torrisi</i> On a Particle-Size Segregation Equation	411
<i>R. Monaco, M. Pandolfi Bianchi, A.J. Soares</i> Modeling of Linear Stability of Planar Detonation Waves in Extended Kinetic Theory	421
<i>A. Montanaro</i> On Slow Processes in Piezothermoelastic Plates	427
<i>G. Mulone</i> Problems of Stability and Waves in Biological Systems	433
<i>A. Muracchini, L. Seccia</i> Multiple Cold and Hot Second Sound Shocks in HE II	443
<i>O. Muscato, V. Di Stefano, C. Milazzo</i> Extended Hydrodynamic Model for the Coupled Electron-Phonon System in Silicon Semiconductors	453

<i>F. Oliveri, G. Manno, R. Vitolo</i> Differential Equations and Lie Symmetries	459
<i>F. Paparella, F. Oliveri</i> A Particle-Mesh Numerical Method for Advection-Reaction-Diffusion Equations with Applications to Plankton Modelling	469
<i>A. Raimondi, C. Tebaldi</i> Bifurcation Analysis of Equilibria in Competitive Logistic Networks with Adaptation	475
<i>S. Rionero</i> Diffusion Influence on Stability-Instability	485
<i>S. Rionero, M. Vitiello</i> Stability Properties of the Solutions of a Reaction Diffusion Equation with Robin Boundary Conditions	495
<i>V. Romano, M. Ruggieri</i> Nonlinear Wave Propagation in an Elastic Soil	502
<i>V. Romano, M. Zwiery</i> Modeling the Heating of Semiconductor Crystal Lattice Based on the Maximum Entropy Principle	508
<i>M. Ruggieri, A. Valenti</i> Symmetry Analysis of a Viscoelastic Model	514
<i>S. Simić</i> Hyperbolic Multi-Temperature Model for Mixtures of Euler Fluids	520
<i>A. Soria, J.R. Sánchez-López, E.M. Salinas-Rodríguez</i> The Incompressibility Assumption Assessment in Fast Fluidized Bed Wave Propagation	530
<i>M.P. Speciale, F. Oliveri</i> Solutions to a System of PDEs Invariant with Respect to $k$ Lie Groups	536

<i>B. Straughan</i> Poiseuille Flow of a Fluid Overlying a Porous Media	542
<i>H. Struchtrup, M. Torrilhon</i> Regularization and Boundary Conditions for the 13 Moment Equations	548
<i>M. Svanadze</i> Plane Waves and Vibrations in the Thermoelastic Mixtures	554
<i>S. Tanigushi, M. Nakamura, M. Sugiyama, M. Isobe, N. Zhao</i> Analysis of Heat Conduction Phenomena in a One-Dimensional Hard-Point Gas by Extended Thermodynamics	560
<i>R. Tracinà, C. Sophocleous</i> Equivalence Transformations and Differential Invariants for Generalized Wave Equations	570
<i>M. Trovato</i> On the Formulation of the Quantum Extended Thermodynamics by Using the Semiclassical Interpretation of the Wigner Function	576
<i>A. Valenti</i> Approximate Symmetries of a Viscoelastic Model	582
<i>K. Wilanski</i> On Waves in Weakly Nonlinear Poroelastic Materials Modeling Impacts of Meteorites	589
