

CONTENTS

Preface	v
Computational Efficiency of the ECMWF Forecasting System <i>Deborah Salmond</i>	1
The NERSC Experience Implementing a Facility Wide High Performance Filesystem <i>William T. C. Kramer</i>	12
Recent Developments of NCEP GFS for High Performance Computing <i>Hann-Ming Henry Juang</i>	25
Multi-Scale Coupled Atmosphere-Ocean GCM and Simulations <i>Keiko Takahashi</i>	36
HPC Activities in the Earth System Research Laboratory <i>M. Govett, J. Middlecoff, D. Schaffer and J. Smith</i>	55
Computational Cost of CPTec AGCM <i>J. Panetta, S. R. M. Barros, J. P. Bonatti, S. S. Tomita and P. Y. Kubota</i>	65
Large-Scale Computational Scientific and Engineering Code Development and Production Workflows <i>D. E. Post and R. P. Kendall</i>	84
Progress with the GEMS Project <i>Anthony Hollingsworth</i>	111
Variational Kalman Filtering on Parallel Computers <i>H. Auvinen, H. Haario and T. Kauranne</i>	121
Preparing the COSMO-MODEL for Next Generation Regional Weather Forecasting and Computing <i>U. Schättler, E. Krenzien and H. Weber</i>	137
A New Partitioning Approach for ECMWF's Integrated Forecasting System (IFS) <i>George Mozdzynski</i>	148

What SMT can do for you <i>John Hague</i>	167
Efficient Coupling of Iterative Models <i>R. W. Ford, G. D. Riley and C. W. Armstrong</i>	178
Tools, Trends and Techniques for Developers of Scientific Software <i>Thomas Clune and Brice Womack</i>	191
Analytic MPI Scalability on a Flat Switch <i>George W. Vandenberghe</i>	207
Initial Performance Comparison of the IBM p5-575 and the CRAY XT3 using Application Benchmarks <i>Mike Ashworth and Graham Fletcher</i>	219
Role of Precision in Meteorological Computing: A Study Using the NMITLI Varsha GCM <i>T. N. Venkatesh and U. N. Sinha</i>	237
Panel Experience on Using High Performance Computing in Meteorology <i>George Mozdzynski</i>	252
List of Participants	259
