

CONTENTS

List of Contributors	vii
Part I: Metallothionein in Neurological Disorders	1
1. Metallothionein Structure and Reactivity <i>Milan Vašák and Gabriele Meloni</i>	3
2. Thiol Reactivity as a Central Aspect of Metallothionein's Mechanism of Action <i>Wolfgang Maret</i>	27
3. Metallothioneins and Neurodegenerative Diseases <i>Silvia Bolognin and Paolo Zatta</i>	47
4. Metallothionein and Brain Inflammation <i>Juan Hidalgo</i>	71
5. Metallothionein and Autism <i>Sarah E. Owens, Marshall L. Summar and Michael Aschner</i>	93
6. The Role of Metallothionein and Astrocyte–Neuron Interactions in Injury to the CNS <i>Samantha J. Fung, Roger S. Chung and Adrian West</i>	117

Part II: Metallothionein in Oncology	139
7. Metallothioneins and Oncology <i>Stamatios E. Theocharis</i>	141
8. Metallothionein and Melanoma <i>Georg Weinlich and Bernhard Zelger</i>	167
9. Metallothionein and Breast Cancer <i>Yiyang Lai, George Wai-Cheong Yip, Puay-Hoon Tan, Srinivasan Dinesh Kumar and Boon-Huat Bay</i>	183
10. Metallothioneins and Prostate Cancer <i>Narassa Narayani and K. C. Balaji</i>	201
11. Metallothionein and Colorectal Tumors <i>Daisuke Shirasaka</i>	217
Part III: Metallothionein in Cardiopathy	225
12. Metallothionein and Cardiomyopathy <i>Lu Cai</i>	227
13. Zinc Status, Metallothioneins and Atherosclerosis in the Elderly <i>Eugenio Mocchegiani, Robertina Giacconi and Marco Malavolta</i>	271
Part IV: Metallothionein in Hepatology	287
14. Metallothioneins and Liver Diseases <i>Lydia Oliva, Renata D'Incà, Valentina Medici and Giacomo Carlo Sturniolo</i>	289
