<b>Preface</b>	<b>v</b>
<b>A Species-Specific Information — Techniques for Handling, Sexing, Injection, and Blood Collection</b>	<b>1</b>
A.1 Animal Handling	2
A.1.1 General principles for animal handling	2
A.2 Injections and Blood Collection	3
A.2.1 Injections	3
A.2.1.1 Animal handling	3
A.2.1.2 Administration volumes	4
A.2.1.3 Administrative routes	4
A.2.2 Blood collection	8
A.2.2.1 Cardiovascular physiology	8
A.2.2.2 Anatomy	9
A.2.2.3 Steps involved in blood collection	10
A.2.2.4 Recognition of signs of hypovolaemic shock and anaemia	10

A.2.2.5	Blood collection volumes	11
A.2.2.6	Equipment	13
A.2.2.7	Vein selection	18
A.2.2.8	Safety	19
A.2.2.9	Troubleshooting — what to do if no blood is obtained	20
A.2.2.10	Troubleshooting — what to do if blood stops flowing	21
A.2.2.11	Blood collection tubes	21
A.3	Mice ( <i>Mus musculus</i> )	23
A.3.1	Sentinels	23
A.3.2	Physiologic parameters	24
A.3.3	Volume for injection	24
A.3.4	Mouse handling and sexing — for removal from caging and transport	26
A.3.5	Mouse restraint techniques for technical manipulation	26
A.3.5.1	Scruffing	26
A.3.5.2	Mechanical restraint (plastic restrainer)	29
A.3.6	Ear punching for identification	30
A.3.7	Subcutaneous (SC) injection	31
A.3.8	Intraperitoneal (IP) injection	32
A.3.9	Intradermal (ID) injection	33
A.3.10	Intravenous (IV) injection utilising lateral tail veins	34
A.3.11	Gavaging of mouse	36
A.3.12	Blood withdrawal utilising retro- orbital sinus for large-volume blood collection	37
A.3.13	Blood withdrawal utilising lateral tail veins for small-volume blood collection	39
A.3.14	Blood withdrawal utilising saphenous veins for small-volume blood collection	40
A.3.15	Blood withdrawal utilising facial veins for small-volume blood collection	41
A.3.16	Intracardiac (IC) puncture for large- volume blood collection	42

A.4	Rats ( <i>Rattus norvegicus</i> )	44
A.4.1	Physiologic parameters	44
A.4.2	Rat handling and sexing	46
A.4.3	Rat restraint techniques for technical manipulation	47
	A.4.3.1 Manual restraint	47
	A.4.3.2 Mechanical restraint	48
A.4.4	Ear punching for identification	49
A.4.5	Intramuscular (IM) injection	50
A.4.6	Subcutaneous (SC) injection	51
A.4.7	Intraperitoneal (IP) injection	53
A.4.8	Intradermal (ID) injection	54
A.4.9	Intravenous (IV) injection utilising lateral tail veins	55
A.4.10	Gavaging of rat	57
A.4.11	Blood withdrawal utilising orbital sinus for large-volume blood collection	58
A.4.12	Blood withdrawal utilising lateral tail veins for small-volume blood collection	59
A.4.13	Intracardiac (IC) puncture for large-volume blood collection	61
A.5	Guinea Pigs ( <i>Cavia porcellus</i> )	62
A.5.1	Physiologic parameters	63
A.5.2	Guinea pig handling and sexing	64
A.5.3	Guinea pig restraint technique for technical manipulation	64
A.5.4	Ear punching for identification	64
A.5.5	Intramuscular (IM) injection	66
A.5.6	Subcutaneous (SC) injection	66
A.5.7	Intraperitoneal (IP) injection	67
A.5.8	Intradermal (ID) injection	68
A.5.9	Intravenous (IV) injection utilising saphenous or cephalic veins	70
A.5.10	Gavaging of guinea pig	71
A.5.11	Blood withdrawal utilising marginal ear veins for small-volume blood collection	71

A.5.12	Intracardiac (IC) puncture for large-volume blood collection	72
A.6	Rabbits ( <i>Oryctolagus cuniculus</i> )	73
A.6.1	Physiologic parameters	73
A.6.2	Rabbit handling and sexing	75
A.6.3	Rabbit restraint technique for technical manipulation	75
A.6.4	Intramuscular (IM) injection	78
A.6.5	Subcutaneous (SC) injection	79
A.6.6	Intraperitoneal (IP) injection	80
A.6.7	Intradermal (ID) injection	80
A.6.8	Intravenous (IV) injection utilising marginal ear vein	82
A.6.9	Gavaging of rabbit	82
A.6.10	Blood withdrawal utilising auricular (central ear) artery and marginal ear vein for large-volume blood collection	84
A.6.11	Intracardiac (IC) puncture for large-volume blood collection	85
A.7	Dogs ( <i>Canis familiaris</i> )	87
A.7.1	Physiologic parameters	88
A.7.2	Dog handling and sexing	90
A.7.3	Dog restraint technique for technical manipulation	90
A.7.4	Identification methods	92
A.7.5	Intramuscular (IM) injection	92
A.7.6	Subcutaneous (SC) injection	93
A.7.7	Intraperitoneal (IP) injection	94
A.7.8	Intradermal (ID) injection	95
A.7.9	Intravenous (IV) injection utilising cephalic vein	96
A.7.10	Intravenous (IV) injection utilising saphenous vein	97
A.7.11	Gavaging of dog/Gastric intubation	98
A.7.12	Blood withdrawal utilising cephalic vein for small-volume blood collection	98
A.7.13	Blood withdrawal utilising saphenous vein	99

A.7.14	Blood withdrawal utilising jugular vein for small- and large-volume blood collection	100
A.7.15	Intracardiac (IC) puncture for terminal collection of large blood volumes	101
A.8	Nonhuman Primates (NHPs)	102
A.8.1	Physiologic parameters	103
A.8.2	NHP handling and sexing	105
A.8.3	NHP physical restraint	105
A.8.4	Manual restraint of a caged, conscious NHP	106
A.8.5	NHP chemical immobilisation	107
A.8.6	Identification methods	108
A.8.6.1	Tattoo	108
A.8.6.2	Microchip	108
A.8.7	Intramuscular (IM) injection	109
A.8.8	Subcutaneous (SC) injection	110
A.8.9	Intraperitoneal (IP) injection	111
A.8.10	Intradermal (ID) injection	112
A.8.11	Intravenous (IV) injection utilising saphenous vein	112
A.8.12	Gavaging of NHP for delivery of intragastric medication	113
A.8.13	Blood withdrawal utilising cephalic vein for small-volume blood collection	114
A.8.14	Blood withdrawal utilising saphenous vein for small-volume blood collection	115
A.8.15	Blood withdrawal utilising femoral vein for large-volume blood collection	116
A.8.16	Intracardiac (IC) puncture for terminal collection of large blood volumes	117
A.9	Miniature Swine	118
A.9.1	Safety	119
A.9.2	Catheterisation	119
A.9.3	Miniature swine handling and sexing	120
A.9.4	Miniature swine restraint technique for technical manipulation	120

A.9.5	Identification methods	121
A.9.6	Intramuscular (IM) injection	122
A.9.7	Subcutaneous (SC) injection	123
A.9.8	Intraperitoneal (IP) injection	123
A.9.9	Intradermal (ID) injection	124
A.9.10	Intravenous (IV) injection utilising cephalic vein	125
A.9.11	Intravenous (IV) injection utilising saphenous vein	126
A.9.12	Intravenous (IV) injection utilising ear vein	127
A.9.13	Intravenous (IV) injection utilising cranial vena cava	127
A.9.14	Gavaging of miniature swine	128
A.9.15	Blood withdrawal utilising jugular vein for large-volume blood collection	130
A.9.16	Blood withdrawal utilising milk vein for small-volume blood collection	131
A.9.17	Blood withdrawal utilising tail vein for small-volume blood collection	131
	Notes	133
<b>B</b>	<b>General Issues Concerning Animal Research Work</b>	<b>137</b>
B.1	Occupational Health and Safety	138
B.1.1	General health and safety	138
B.1.2	Personal hygiene	139
B.1.3	Animal bites, scratches, kicks, and general safety	141
B.1.4	Chemicals	142
	B.1.4.1 Storage of chemicals	143
	B.1.4.2 Laboratory storage	143
	B.1.4.3 Spillage control and clean-up	144
B.1.5	Biologicals	144
B.1.6	Radiology	146

B.1.7	Sharps	147
B.1.8	Shoe covers	147
B.1.9	Clothing	148
B.1.10	Labelling of reagents	148
B.1.11	Microbiological waste management	149
	B.1.11.1 Biohazard materials tray	149
	B.1.11.2 Biohazard bin (biohazard symbol on the outside)	150
B.1.12	Reporting accidental injuries and occupational illnesses	150
	B.1.12.1 Reporting	150
	B.1.12.2 Definitions	150
B.1.13	Regulatory requirements	151
B.1.14	Components of an OHSE (occupational health, safety, and environment) programme	151
B.1.15	Medical evaluation and preventive medicine	151
B.1.16	Fire safety	151
B.2	Animal Husbandry	152
	B.2.1 Feeding	152
	B.2.2 Watering	153
	B.2.3 Bedding	153
	B.2.4 Sanitisation schedules — type and frequency	155
	B.2.5 Environmental enrichment	157
B.3	Animal Feed	158
	B.3.1 Diet contamination	158
	B.3.2 Diet types	158
	B.3.2.1 Natural-ingredient diets	158
	B.3.2.2 Purified (semisynthetic) diets	159
	B.3.2.3 Chemically defined diets	159
	B.3.2.4 Certified diets	159
	B.3.2.5 Medicated diets	160
	B.3.3 Available forms of feed	160
	B.3.3.1 Diet forms	160
	B.3.3.2 Meals	161
	B.3.3.3 Ground diet	161
	B.3.3.4 Pelleted diet	161

	B.3.3.5	Extruded/Expanded diet	162
	B.3.3.6	Liquid diets	164
B.3.4		Formula types	164
	B.3.4.1	Open formula	164
	B.3.4.2	Closed formula	165
	B.3.4.3	Fixed formula	165
	B.3.4.4	Least-cost formula	165
	B.3.4.5	Variable formula	165
	B.3.5	Diet hardness	166
	B.3.6	Irradiation vs. autoclaving	166
	B.3.7	Canned diet	169
B.4		Animal Identification	169
	B.4.1	Cage cards	169
	B.4.2	Short-term identification method	170
	B.4.3	Permanent identification methods	171
B.5		Diseases of Laboratory Animals	171
	B.5.1	Animal diseases and diagnosis	171
	B.5.2	Effects of infection on research	172
	B.5.3	Sources of infection	172
	B.5.4	Appearance of healthy animals	172
	B.5.5	Appearance of sick animals	172
	B.5.6	Examination	173
	B.5.7	Common health problems	173
	B.5.7.1	Mice and rats	173
	B.5.7.2	Guinea pigs	175
	B.5.7.3	Rabbits	176
	B.5.7.4	Dogs	177
	B.5.7.5	Nonhuman primates	179
	B.5.7.6	Mini-Pigs	180
B.5.8		Good management is essential for good health	181
	B.5.8.1	Observing and reporting disease	181
	B.5.8.2	Health monitoring	182
	B.5.8.3	Selection of animals	182
B.5.9		Infections of mice, rats, guinea pigs, and rabbits	183
	B.5.9.1	Mice	183
	B.5.9.2	Rats	184

B.5.9.3	Guinea pigs	185
B.5.9.4	Rabbits	185
B.5.9.5	Transmission between species (zoonoses)	186
B.5.10	Contamination from the environment	186
B.5.10.1	Water	186
B.5.10.2	Feed	186
B.5.10.3	Bedding	187
B.5.10.4	Cages/Equipment	187
B.5.10.5	Personnel	187
B.5.10.6	Air	188
B.5.11	What to look for	188
B.5.12	Diagnosis	188
B.5.13	Technique for postmortem examination	188
B.5.14	Samples for diagnosis	189
B.5.14.1	Blood	189
B.5.14.2	Microbiology	190
B.5.15	Human tissue and fluid handling risks	190
B.6	Caging Systems	190
B.6.1	Minimum space recommendations for laboratory animals	191
B.6.2	Wire-bottom caging	192
B.6.3	Individually ventilated cages (IVCs) or ventilated cage racks (VCRs) — rodents	192
B.6.4	Cage-changing stations	194
B.6.5	Static filter-top cages — rodents	196
B.6.6	Open-top cages/Conventional caging — rodents	196
B.6.7	Ventilated cabinets — rodents	197
B.6.8	Flexible film isolator — rodents and rabbits	198
B.6.9	Rabbit cages/pens	199
B.6.10	Nonhuman primate cages	199
B.6.11	Cage pens/runs — dogs and miniature swine	200
B.7	Anaesthesia and Analgesia	200
B.7.1	Definitions	201

B.7.2	Sedatives and tranquilisers	202
B.7.3	Reasons for using anaesthesia	202
B.7.4	Anaesthetic principles — points to consider	203
	B.7.4.1 Biological variations	203
	B.7.4.2 Environmental factors	203
	B.7.4.3 The experimental protocol	203
B.7.5	Four stages of anaesthesia	204
B.7.6	Methods of anaesthesia — routes of administration	204
	B.7.6.1 Parenteral anaesthesia (injection)	204
	B.7.6.2 Inhalation anaesthesia	205
B.7.7	Anaesthetic delivery	205
	B.7.7.1 Rebreathing circuit — e.g. circle and to-and-fro	205
	B.7.7.2 Nonrebreathing circuit — chamber box or Bain circuit	208
B.7.8	Preoperative treatment	208
B.7.9	Patient monitoring	209
B.7.10	Anaesthetic overdose — causes	210
B.7.11	Anaesthetic overdose — intervention	210
B.7.12	Recovery stages	211
	B.7.12.1 Postanaesthetic recovery	211
	B.7.12.2 Postanaesthetic care — first 12–24 hours	211
B.7.13	Recovery problems	211
B.7.14	Factors affecting anaesthesia	212
	B.7.14.1 Species	212
	B.7.14.2 Age	212
	B.7.14.3 Body condition	212
	B.7.14.4 Food intake	213
	B.7.14.5 Temperature	213
	B.7.14.6 Other factors	213
B.7.15	Preanaesthetic examination	213
B.7.16	Routes of anaesthesia administration	213
B.7.17	Stages of anaesthesia	214
B.7.18	Signs of adequate anaesthesia	214
B.7.19	Monitoring the depth of anaesthesia	215

B.7.20	Methods of anaesthesia	215
B.7.21	Hypothermia	215
B.7.22	Inhalant anaesthetics	216
	B.7.22.1 Open-drop method	216
B.7.23	Isoflurane	217
B.7.24	Carbon dioxide	218
B.7.25	Heat loss prevention	219
B.7.26	Fluid therapy	219
B.7.27	Eye ointment	219
B.7.28	Skullcaps	220
B.7.29	Neonates	220
B.7.30	Analgesia	220
	B.7.30.1 Definition	220
	B.7.30.2 Analgesics: nonsteroids	221
	B.7.30.3 Analgesics: opioids	221
B.8	Basic Surgery — Preoperative and Postoperative Care	222
B.8.1	Definitions	222
B.8.2	Multiple major survival surgery (MMSS)	222
B.8.3	Surgery	223
	B.8.3.1 Surgery record keeping	223
	B.8.3.2 Operating theatres	224
	B.8.3.3 Responsibilities of a surgeon	224
	B.8.3.4 Preparation for surgery	225
	B.8.3.5 Preoperative preparation	226
	B.8.3.6 Preparation of animal for surgery	226
	B.8.3.7 Preparation of the surgical team	228
	B.8.3.8 Gowning procedure	229
	B.8.3.9 Gloves	230
	B.8.3.10 Surgical procedures	230
	B.8.3.11 Emergency intervention	231
	B.8.3.12 Incision closure	231
	B.8.3.13 Suture material	232
	B.8.3.14 Causes of dehiscence (breakdown of surgical wound closure)	233

	B.8.3.15	Postoperative recovery	233
	B.8.3.16	Immediate postoperative care	233
	B.8.3.17	Postoperative care	234
	B.8.3.18	Long-term postoperative care	235
	B.8.3.19	Checklist for surgeries	235
B.9		Pain Management	237
	B.9.1	Pain and distress	237
	B.9.2	Singapore National Advisory Committee for Laboratory Animal Research (NACLAR) guidelines	237
	B.9.3	EU Council Directive 86/609/EEC — Article 8	238
	B.9.4	UK Animals (Scientific Procedures) Act 1986	238
	B.9.5	United States Department of Agriculture (USDA) pain categories	239
	B.9.6	Causes of pain and distress	240
	B.9.7	Monitoring	240
	B.9.8	Detecting clinical signs of pain and distress	240
	B.9.9	Physiological evidence	240
	B.9.10	Tumours	241
	B.9.11	Experimental endpoint	241
	B.9.12	Selection of endpoint	241
	B.9.13	Tumors: endpoint	242
	B.9.14	Alleviation of pain and distress	242
B.10		Euthanasia	243
B.11		Important Information	245
	B.11.1	Removal from animal facilities to researchers' laboratories	245
	B.11.2	Removal of animals from the institution	246
	B.11.2.1	Housing of animals in research laboratories	246
	B.11.3	Experimental procedures in animal housing areas	246
		Notes	247
