

CONTENTS

| | |
|---|----|
| Preface | v |
| Longitudinal Gauge Theory of Surface Second Harmonic Generation <i>Bernardo S. Mendoza</i> | 1 |
| Parameter-free Calculations of Optical Properties for Systems with Magnetic Ordering or Three-dimensional Confinement <i>F. Bechstedt, C. Rödl, L. E. Ramos, F. Fuchs, P. H. Hahn, J. Furthüller</i> | 28 |
| Excited State Properties Calculations: from 0 to 3 Dimensional Systems <i>M. Marsili, V. Garbuio, M. Bruno, O. Pulci, M. Palummo, E. Degoli, E. Luppi, R. Del Sole</i> | 41 |
| Dielectric Response and Electron Energy Loss Spectra of an Oxidized Si(100)-(2 × 2) Surface <i>L. Caramella, G. Onida, C. Hogan</i> | 62 |
| Dielectric Function of the Si(113)3 × 2ADI Surface from <i>ab-initio</i> Methods <i>K. Gaál-Nagy, G. Onida</i> | 70 |
| Modeling of Hydrogenated Amorphous Silicon (a-Si:H) Thin Films Prepared by the Saddle Field Glow Discharge Method for Photovoltaic Applications <i>A. V. Sachenko, A. I. Shkrebtii, F. Gaspari, N. Kherani, A. Kazakevitch</i> | 76 |
| High Spatial Resolution Raman Scattering for Nano-structures <i>E. Speiser, B. Buick, S. Delgobbo, D. Calestani, W. Richter</i> | 82 |

| | |
|--|-----|
| Investigation of Compositional Disorder in GaAs _{1-x} N _x :H <i>R. Trotta, M. Felici, F. Masia, A. Polimeni, A. Miriametro, M. Capizzi</i> | 103 |
| Vibrational Properties and the Miniband Effect in InGaAs/InP Superlattices <i>A. D. Rodrigues, J. C. Galzerani, Yu. A. Pusep, D. M. Cornet, D. Comedi, R. R. La Pierre</i> | 109 |
| Electronic and Optical Properties of ZnO between 3 and 32 eV <i>M. Rakel, C. Cobet, N. Esser, P. Gori, O. Pulci, A. Seitsonen, A. Cricenti, N. H. Nickel, W. Richter</i> | 115 |
| Order and Clusters in Model Membranes: Detection and Characterization by Infrared Scanning Near-Field Microscopy <i>J. Generosi, G. Margaritondo, J. S. Sanghera, I. D. Aggarwal, N. H. Tolk, D. W. Piston, A. Congiu Castellano, A. Cricenti</i> | 124 |
| Chemical and Magnetic Properties of NiO Thin Films Epitaxially Grown on Fe(001) <i>A. Brambilla</i> | 130 |
| Nonlinear Magneto-Optical Probing of Magnetic Nanostructures: Observation of NiO(111) Growth on a Ni(001) Single Crystal <i>V. K. Valev, A. Kirilyuk, Th. Rasing</i> | 137 |
| Photoluminescence under Magnetic Field and Hydrostatic Pressure in GaAs _{1-x} N _x for Probing the Compositional Dependence of Carrier Effective Mass and Gyromagnetic Factor <i>G. Pettinari, F. Masia, A. Polimeni, M. Felici, R. Trotta, M. Capizzi, T. Niebling, H. Günther, P. J. Klar, W. Stolz, A. Lindsay, E. P. O'Reilly, M. Piccin, G. Bais, S. Rubini, F. Martelli, A. Franciosi</i> | 156 |
| Probing the Dispersion of Surface Phonons by Light Scattering <i>G. Benedek, J. P. Toennies</i> | 162 |
